

LIBERIA

Update on Implementation of ICAO/WMO requirements for ACMA

1. QMS implementation status for National Meteorological Service transition from ISO9001:2008 to ISO 9001:2015

QMS has not yet been implemented in Liberia, but in an effort to transition, the following have been undertaken:

- Construction of a new terminal building;
 - Construction of a synoptic station;
 - Rehabilitation of the National Meteorological Center (NMC); and
 - Recruitment of additional staff
2. Status on Competency of the personnel
Training program is being developed for Aeronautical Meteorological personnel to undergo training at WMO RTCs (Nairobi, Lagos and Cairo) to fulfill WMO AMF, AMO and BIP-M for Aeronautical Meteorological Forecasters (AMF) and Aeronautical Meteorological Observers (AMO) requirements.
 3. Qualification of the personnel providing services to aviation
The personnel have undergone several in-service trainings and five (5) personnel underwent short-term training in Aeronautical Meteorological course at WMO RTC-Lagos, Nigeria.
 4. Cost recovery implementation
 - The NMS has not been transformed into an Agency therefore cost recovery is not implemented.
 5. Implementation GANP/ASBU
 - The GANP and ASBU are not yet implemented.
