

**NOAA Climate Database Modernization Program (CDMP)  
Imaging Support Task, October 2006—Title: WMO Pub. No. 47 (1973-98)**

**Series reference information:** WMO (World Meteorological Organization), 1955-: *International List of Selected, Supplementary and Auxiliary Ships*. WMO-No. 47, Geneva, Switzerland. (Serial publication; recently annual. Editions prior to 1966 were titled *International List of Selected and Supplementary Ships*.)

**Task background:** This is a follow-up to an earlier CDMP task that imaged and digitized WMO-No. 47 editions and supplements for 1955-72, which were previously available only in paper form. Starting with the 1973 edition, the ship metadata contained in the publication were made available digitally by WMO, but not images of the printed material—which this task accomplishes through 1998 (Table 1). Reproduced by permission of the World Meteorological Organization. We gratefully acknowledge the assistance of the UK Met Office in providing photocopies of two editions.

**Table 1:** Editions of WMO-No. 47 imaged for this task. The individual document contained in this file is shaded in the table.

## Introduction

This edition of the *International List of Selected, Supplementary and Auxiliary Ships* contains information valid in 1998 about the ships participating in the WMO Voluntary Observing Ships Scheme. This information has been supplied by the countries (listed in the Table of Contents) which have recruited ships within the framework of this programme, in accordance with Regulations 2.2.3.3 and 2.2.3.4 as contained in WMO Publication No. 544 - *Manual on the Global Observing System, Volume I, Part III*.

The list of ships is preceded by two statistical tables:

- Statistical Table 1 - *Number of ships* recruited by the various countries within the framework of the WMO Voluntary Observing Ship Scheme, and
- Statistical Table 2 - *Equipment* for upper-air observations and telecommunications on board the ships.

As a guide to users in finding information on a particular ship, this publication contains two appendices at the back of the book:

- Appendix A - *Index of Ships' Call Signs*;
- Appendix B - *Index of Ships' Names*.

The ship name index lists each ship in the publication by name in alphabetical order, gives its call sign and refers the reader to the country heading and ship category (selected, supplementary or auxiliary) under which the ship appears in the main ship list.

The call sign index contains the same information, but lists all the ships first by call sign in alphabetical order, followed by ship name.

## Introduction

Cette édition de la *Liste internationale de navires sélectionnés, supplémentaires et auxiliaires* contient les renseignements valables en 1998 au sujet des navires participant au système de navires d'observation bénévoles. Ces renseignements ont été fournis par les pays (énumérés dans la Table des Matières) ayant recruté des navires dans le cadre de ce programme, conformément aux règles 2.2.3.3 et 2.2.3.4 qui figurent dans la partie III du Volume I de la Publication N° 544 de l'OMM - *Manuel du système mondial d'observation*.

La liste des navires est précédée par deux tableaux de statistiques :

- Tableau statistique 1 - *Nombre de navires* recrutés par les différents pays dans le cadre du système de navires d'observation bénévoles établi par l'OMM, et
- Tableau statistique 2 - *Équipement* d'observation en altitude et moyens de télécommunications à bord des navires.

Pour aider l'utilisateur à trouver des renseignements sur un navire donné, cette publication comporte deux appendices à la fin de la publication :

- Appendice A - *Répertoire des indicatifs d'appel des navires*;
- Appendice B - *Répertoire des noms de navires*.

Le répertoire des noms liste, par ordre alphabétique, le nom de chaque navire compris dans cette publication, suivi de son indicatif d'appel, et réfère le lecteur au pays et à la catégorie (navires sélectionnés, supplémentaires ou auxiliaires) sous lesquels le navire apparaît dans la liste principale des navires.

Le répertoire des indicatifs d'appel présente ces mêmes informations, mais les navires y sont classés par ordre alphabétique d'indicatif d'appel, suivi du nom du navire.

## International List of Ships

### Explanatory Notes:

## Layout, Description of Contents and Abbreviations Used

### 1. General presentation of data

An entry is given for each country participating in the WMO Voluntary Observing Ships Scheme (VOS), in alphabetical order. Each country entry consists of two tables:

- **Table (a) - Route codes:** Each country has its own list of areas or routes on which the ships it has recruited are normally plying. Each country's entry begins with a route code table - Table (a) - showing that country's list of routes and the code or reference number assigned to each one. These codes are used in column 5 of Table (b) where the routes of each ship are specified.

- **Table (b) - List of Ships recruited:** Ships are listed by name under the country which recruited them into the VOS programme. They are shown in each country's Table (b), in alphabetical order under the appropriate VOS category ("Selected Ships", "Supplementary Ships" or "Auxiliary Ships", or a sub-category thereof). Table (b) contains data on each ship's specifications, routes and the meteorological and telecommunications instruments on board.

### 2. Column layout

The data available for each ship is listed in columns which bear the following headings:

Column No:	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18

## Liste internationale de navires

## Notes explicatives :

Disposition et description du contenu,  
et abréviations employées

## 1. Présentation générale des données

Les données sont présentées sous l'en-tête de chaque pays participant au système de navires d'observation bénévoles de l'OMM, par ordre alphabétique des noms de pays en anglais. Chaque pays comprend deux tableaux :

- **Tableau (a) - Codes des routes:** Une liste spécifique à chaque pays définit les régions ou routes parcourues par les navires que ce pays a recrutés. De ce fait, la liste des navires pour chaque pays est précédée d'un Tableau (a) qui décrit les routes relatives au pays concerné et le numéro de référence ou code attribué à chacune de ces routes. Ces numéros de référence sont utilisés dans la colonne 5 du Tableau (b) où sont indiquées les routes de chaque navire.
- **Tableau (b) - Liste des navires recrutés:** Sous l'en-tête de chaque pays figure le Tableau (b) comportant la liste des navires que le pays a recrutés dans le cadre du programme des navires d'observation bénévoles. Les navires y sont présentés par ordre alphabétique des noms, regroupés selon la catégorie de navire d'observation (navires sélectionnés, supplémentaires ou auxiliaires, ou l'une de leurs subdivisions). La Tableau (b) fournit des données quant à la description du navire, ses routes, et les instruments météorologiques et moyens de télécommunications à son bord.

## 2. Disposition des colonnes

Les données disponibles pour chaque navire sont regroupées dans des colonnes qui comportent les en-têtes suivants :
