## National Oceanographic Observation Network

00

- 91 observing stations will be established by 2010 (80 stations, 2010)
  - Ocean observation base : 2
  - Lighthouse observatory : 14
  - Dolphin observatory : 4
  - Ocean buoy : 8
  - Tidal station : 41
  - HF-RADAR : 3
- Ocean phenomenon such as tide, wave, water temperature, current and weather, etc. Systematically is observed and provided in real-time

leodo Ocean Research Station

### \* 이어도해양과학기술지 관측장비 (Equipment of IORS)

- ▶ 해양관측장비 : 14종 30점
- ▶ 대기관측장비 : 13종 20점
- ▶ 구조물 안정성 계측장비 : 3종 10점
- ▶ 환경관측 및 기타장비 : 6종 8점
  
- ▶ Ocean observation instruments : 14kinds
- ▶ Atmosphere observation instruments : 13kinds
- ▶ Structural stability measurement equipments : 3kinds
- ▶ Environmental observation and other instruments : 6kinds

## OBSERVATION

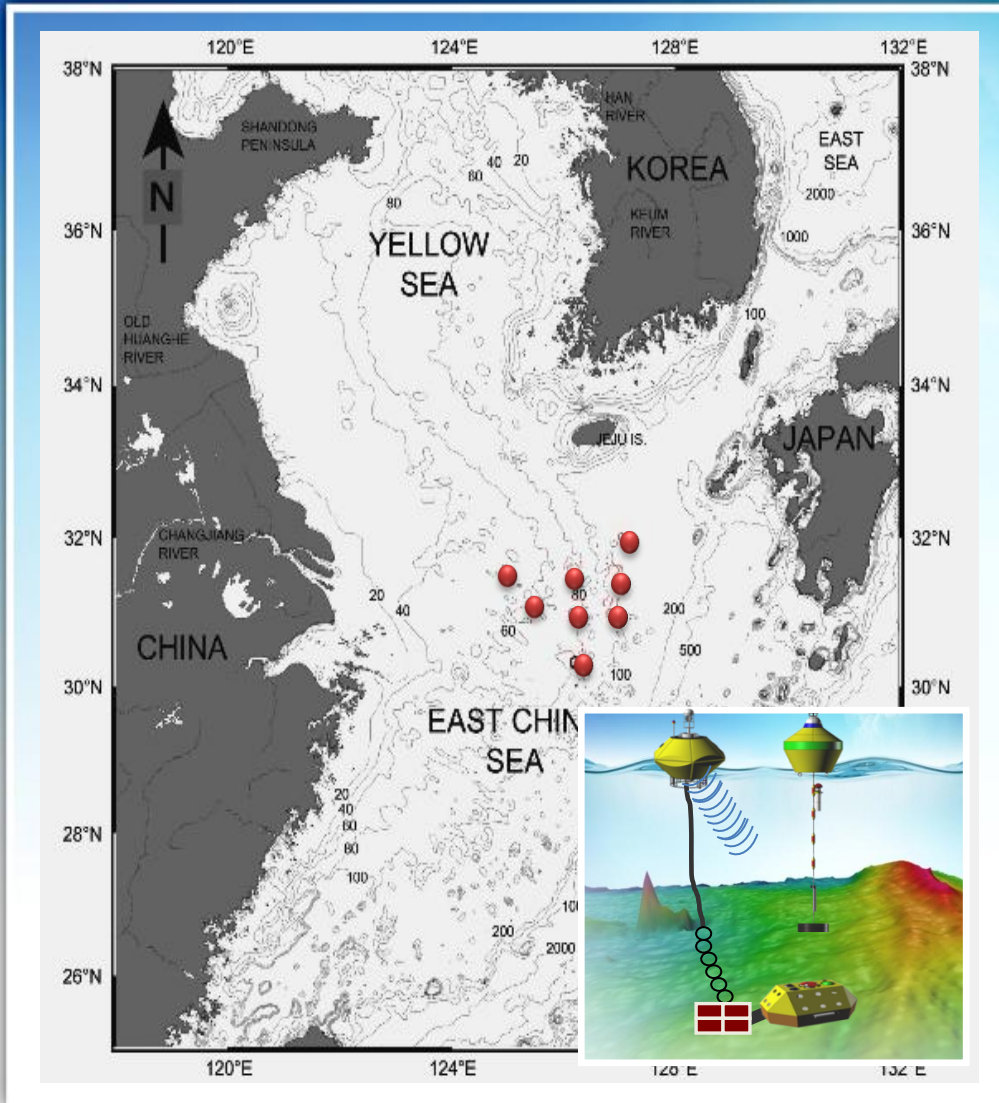

### Equipment & Planning

<p>01 가속도계 Accelerometer 가속도, 속도, 변위</p>	<p>02 경사계 Inclinometer 구조물경사도</p>	<p>03 풍향·풍속계 Wind Monitor 풍향, 풍속</p>	<p>04 온도·습도계 Humidity &amp; Temperature Gauge 기온, 습도</p>	<p>05 기압계 Digital barometric sensor 기압</p>
<p>06 일사계 Pyrometer 일사량</p>	<p>07 일조계 Sunshine Duration Meter 일조시간</p>	<p>08 지외일사계 UV-B Radiometer 자외선</p>	<p>09 강우량계 Rain Gauge 강우량</p>	<p>10 정밀증발계 Vaporimeter 증발량</p>
<p>11 시정계 Present Weather Detector 가시거리, 강우강도</p>	<p>12 스펙트로레디오메터 Ocean Colour Radiometer System 대기 및 해양 분광량</p>	<p>13 IR 온도계 IR Thermometer 원격 해표면온도</p>	<p>14 WAVE RADAR Directional Wave &amp; Surface Current Radar System 파고, 주기, 파향, 스펙트럼, 표층유속</p>	<p>15 온도계 Cellometer 구름높이, 구름량</p>
<p>16 Sea Level Monitor Wave &amp; Sea Level Sensor 조위, 파고</p>	<p>17 ARGOS Drifter Buoy 표층수온·기압·해류</p>	<p>18 ROSSET SAMPLER&amp;CTD Water sampler &amp; Conductivity Temperature Depth 채수, 수온, 염분</p>	<p>19 AEROSOL 채취기 PM2.5 Sequential filter sampler system 무기이온, 금속, 유기산</p>	<p>20 CO<sub>2</sub>측정계 CO<sub>2</sub> Gas Analyzer brochure 대기중 CO<sub>2</sub>량</p>
<p>21 FLUX측정계 3D Sonic Anemometer 3차원풍향, 풍속</p>	<p>22 RDCP Recording Doppler Current Profiler 층별 유속, 유향</p>	<p>23 SMART Release Acoustic Release &amp; Underwater Modem 수중통신, 장비회수</p>	<p>24 CTR7 Conductivity &amp; Temperature Sensor 층별 수온, 염분</p>	<p>25 차세대조위계 High Quality Sea Level Monitor 조위</p>
<p>26 태양력발전기 Solar Power Generator 전원공급</p>	<p>27 풍력발전기 Wind Power Generator 전원공급</p>	<p>28 디젤발전기 Diesel Generator 보조전원공급</p>	<p>29 자동사다리 Auto Ladder 침입방지</p>	<p>30 등대 Light House 항해안전</p>

# 1. KOGA Project Concept

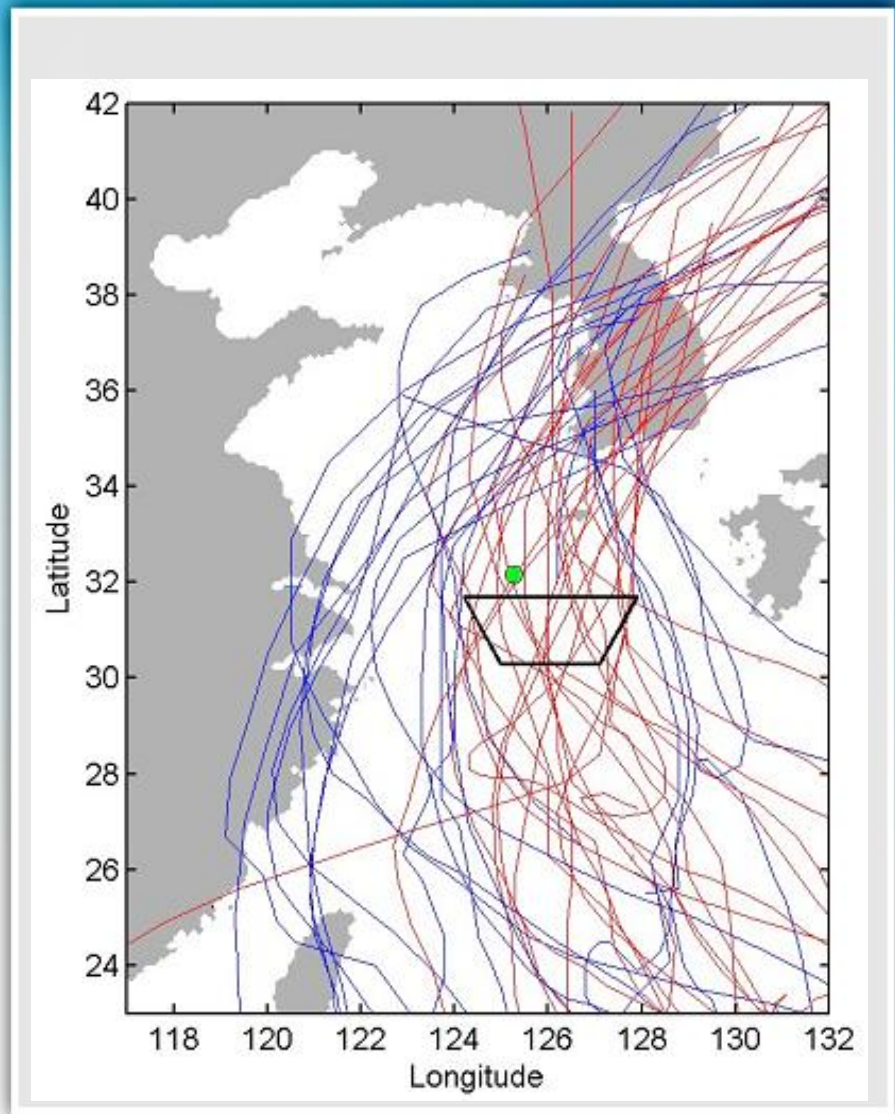

- Main path of the typhoon affecting Korea
- The branching area of the Tsushima Current from Kuroshio Current
- Sea of detectable Earthquake occurred along Ryukyu Trench
- Boundary Condition area of oceanography and meteorology Numerical Modeling
- Entering Gateway of ship out to the Ocean

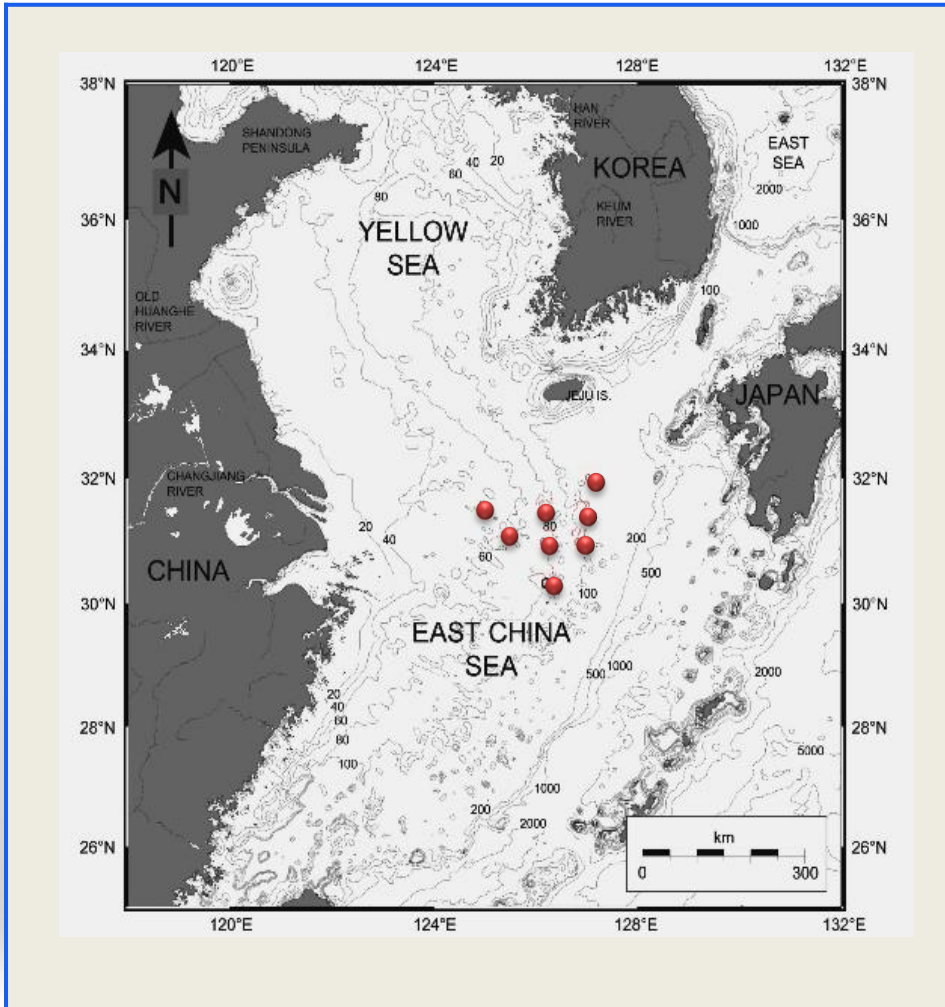

# 1. KOGA Project Concept

# 2. KOGA System\_Location

## Installation Area of KOGA

Site	Lat.	Long	Depth(m)	Sediment	Slope
koga06	32-00-04.115	127-02-40.528	118	sM	Gentle
koga07	31-27-47.600	126-57-53.195	106	M	Gentle
koga05	31-27-47.600	126-10-14.762	75	sM	Gentle
koga01	31-27-47.600	125-01-49.757	55	sM	Gentle
koga04	30-59-14.518	126-49-33.178	97	sM	Gentle
koga08	30-59-14.518	126-09-10.731	86	sM	Gentle
koga02	30-59-14.518	125-28-15.101	63	M	Gentle
koga03	30-19-49.682	126-12-07.460	83	sM	Gentle

# 3. KOGA System\_Hardware

Remote Control Sys.(Data Communication: two-way Iridium)

Iridium (Satellite communication)

### KOGA\_buoy

- Wind direction, Wind speed, Temp., Air pressure
- Water Temp., Conductivity, Wave height, Wave direction, Wave period
- CO<sub>2</sub>, Hydrophone

Acoustic Telemetry

### KOGA\_bottom(Trawl Resistant Bottom Mount)

- Current profiler, Conductivity, Water Temp., Tide, Wave..

### KOGA\_scripps

- Wind, Temp., Air pressure
- Water Temp., pressure, current, Wave

## Functions

	Functions
Specification	<ul style="list-style-type: none"> <li>• Auto reset function in case of System halt</li> <li>• Dual operating by Standby and Normal Mode</li> <li>• Data input of a variety of sensor data (analog, digital and so on)</li> <li>• Time synchronization of Internal controller using the GPS time</li> <li>• The image data acquisition using camera sensor and transmission</li> <li>• Checking the power supply system</li> <li>• Remote control</li> </ul>
system control	<ul style="list-style-type: none"> <li>• Setting and data transmission using serial and wireless connection</li> <li>• Change of Communication method</li> <li>• Mark and adjustment of time</li> <li>• Controller check or Reset function</li> <li>• Select ion of Data transmission interval</li> </ul>
Data acquisition and transmission	<ul style="list-style-type: none"> <li>• Logging and transmission of observed data</li> <li>• Logging System error message</li> <li>• Emergency data</li> <li>• Transmission using Dual satellite system</li> </ul>

	Functions
Watching mode	<ul style="list-style-type: none"> <li>• Watching of work condition of the Controller, power supply and output</li> <li>• Automatic reset function : Obstacle to communication system</li> <li>• Creating of Monitoring, logging and saving log data and transmission</li> </ul>
Remote control mode (close range RF)	<ul style="list-style-type: none"> <li>• Direct Mode               <ul style="list-style-type: none"> <li>▪ Connect collecting part to data processing part directly that watch a work status by remote command</li> <li>▪ Data Transmission of RESET and watching about work condition</li> <li>▪ Display the result on the Remote control part</li> </ul> </li> <li>• Bypass Mode               <ul style="list-style-type: none"> <li>▪ Checking status of main controller, modem, etc. and transmission of check result in the data logger system</li> <li>▪ Transfer the checked data</li> <li>▪ Setting the parameters</li> </ul> </li> </ul>

### KOGA Hardware Configuration

KOGA\_Buoy configuration

KOGA\_Buoy(Oversized)

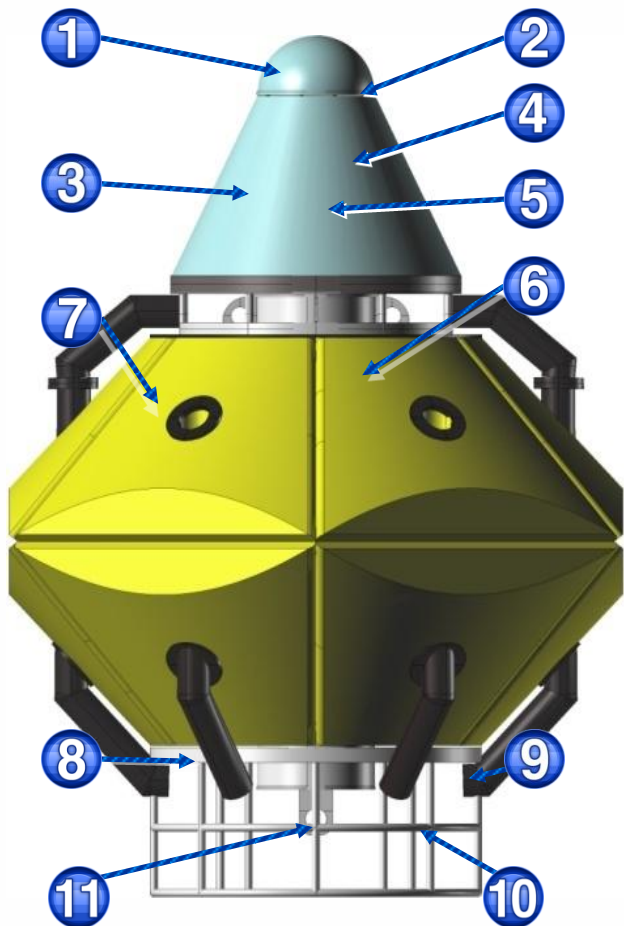

KOGA\_bottom(Underwater System)

## Buoy system(oversized)

### Specifications and Features

NO.	item	Specification	Features
1	Antenna	Installation of satellite communication antenna	Prevention of external force
2	Wave sensor	Wave high, wave direction, wave periods	Measurement of long and short wave at the same time with GPS
3	LED Light	In accordance with IALA Recommendations	Charges the battery during daylight hours
4	Radar reflector	In accordance with Recommendations	active Radar Reflector
5	Weather sensor	Measurement of Wind speed, wind direction, temperature, pressure	Integrated seismometer wind sensor
6	Buoy internal	Data logger/control	Acquirement and control of data, transport of data though iridium communication
		Power supply system	1year
		Black Box	Storage of all of data
7	Buoy form	Dia. 4.3m, PE form	Made from strong and durable Excellent buoyancy and stability
8	C/T sensor	Measurement of Conductivity, water temperature	Defense system for a long term observation Real time integrated calculations(salinity, density, speed of sound)
9	CO <sub>2</sub> sensor	Measurement of CO <sub>2</sub>	No need calibration
10	surface USN node	Acoustic telemetry modems	Low frequency acoustic telemetry confidence modem
11	Mooring system	Depth of 1,5times	Durable material

# 3. KOGA System\_Hardware

## Underwater system

### Specification and Features

NO.	Item	Specification	Features
1	Emergency Transponder	Underwater acoustic transponder	To accommodate more batteries, and functions identically Providing three times the operational life
2	Under water USN node	Acoustic telemetry modems	Low frequency acoustic telemetry confidence modem
3	Acoustic Doppler current profiler (ADCP, RDCP)	Measurement of the water direction, water speed, pressure, conductivity and temperature for each layers	Broadband signal processing delivers very low-noise data, resulting in unparalleled data resolution and minimal power consumption
4	Submersible Argos Beacon	Satellite tracking and alerting system	Transmit the signal through satellite communication To minimize corrosion never mount the pressure case to metal.
5	Pop up Buoy & A.R. Integration system	Underwater acoustic release system	Integrated marking buoy and A.R. system
6	TRBM	Trawl resistant bottom mounts	With Gimbals for ADCP, RDCP
7	Buoyancy form	High density buoyancy	High density buoyancy form for recovering TRBM
8	A.R. System	Acoustic Releasing system	Released between TRBM and anchor by acoustic signal
9	External Battery Pack	Power supply system	High performance battery (Low electric discharge rate)

## Buoy system(small)

### Specifications and Features

NO.	Item	Specification	Features
1	Weather sensor	Measurement of Wind speed, wind direction, temperature, pressure	Integrated seismometer wind sensor
2	Antenna	Installation of satellite communication antenna	Prevention of external force
3	Wave sensor	Wave high, wave direction, wave periods	Measurement of long and short wave at the same time with GPS
4	Buoy internal	Community/controller	Transmit the signal through satellite communication To minimize corrosion never mount the pressure case to metal.
		barometer	Waterproof
		Power supply system	1year
5	Buoy form	Dia. 0.73m, PE form	Minimum of exposal Prevent of damage
6	Mooring system	Automatic mooring system	Integrated buoy-sensor-mooring system
7	ADCP	Measurement of water direction, water speed	High accuracy
8	P/T sensor	Measurement of temperature and pressure	Data transmit by Inductive modem
9	Underwater releasing system	Acoustic Release	Released by acoustic signal

## Plan of construction and test

Item	Content
Construction schedule	<ul style="list-style-type: none"> <li>◦ Cooperation : production of the buoy topside, trail construction and review of the construction propriety and then taking to pieces</li> <li>◦ Reconstruction after moving around the embargo</li> <li>◦ Land test and check the function realization</li> <li>◦ Move the installation ship</li> </ul>
Test schedule	<ul style="list-style-type: none"> <li>◦ Select the test site on the south sea (depth : 80 -100)</li> <li>◦ Mooring and installation test using the ship</li> <li>◦ Realization of the observation system function</li> <li>◦ Test of the power consumption</li> <li>◦ Recovery test</li> </ul>

Example of the Buoy construction (July 2010)

### Process of installation

1. TRBM installation	2. Sinker installation	3. Buoy installation
<ul style="list-style-type: none"> <li>Using the self-mooring system</li> <li>Connect the mooring system to the TRBM using the A.R.</li> <li>Balance themselves, safe arrival down to sub-bottom</li> <li>Recovery the A.R</li> </ul>	<ul style="list-style-type: none"> <li>Using the self-mooring system</li> <li>Connect the mooring system to the sinker using the A.R.</li> <li>Balance themselves, safe arrival down to sub-bottom</li> <li>Recovery the A.R</li> </ul>	<ul style="list-style-type: none"> <li>Connect the buoy to mooring system</li> <li>Buoy installation using a crane</li> <li>Recovery of the Installing mooring line using the vessel</li> <li>Final test</li> <li>The KOGA_small buoy installation</li> </ul>

# 5. Participate in PP-WET

Thank you!
