About NUIST

A Brief Introduction to NUIST

Message from President

History

Overview

Nanjing University of Information Science & Technology (NUIST), founded in 1960, is one of the key institutions of higher learning in China. A total of 47 specialties for bachelors, 22 for masters, and 13 for doctors are provided. With a scientific research center for post-doctoral students, the university enjoys a complete educational system. It began enrolling students from foreign countries and Hong Kong, Macao and Taiwan in 1990.

NUIST occupies an area of nearly 140 hectares with a floor space of more than 600,000 square meters. There are at present 1300 staff members, many of which undertake a wide range of scientific research programs for the state, ministries and provinces while fulfilling their teaching load. The university also invites foreign teachers and experts to teach on the campus. More than 50 laboratories with up-to-date facilities are available. Facilities of sports and recreation facilitate students' spare-time activities.

In recent years, academic exchanges with foreign universities and research communities have been carried out. Through the ratification of WMO, in 1993, the WMO Regional Training Center was established to train senior meteorological personnel for developing countries around the world. The university is also qualified to enroll overseas students with Chinese Government Scholarship.

About NUIST

A Brief Introduction to NUIST

Message from President

History

Overview

The development of a University depends on the strengthening of its disciplines. First-rate disciplines contribute to the attraction and cultivation of first-rate talents, then to the production of first-rate research achievements , and then to the making of a first-rate university.

History

[Overview](#)

Historical Development
 In 1960, Meteorology College of Nanjing University, the first higher institution of meteorology in China, was founded.

In 1963, its name was changed into Nanjing Meteorology Institute.

In 1978, it was ratified as a key university in China and was approved to recruit students for master's degree.

In 2004 the new name Nanjing University of Information Science and Technology (NUIST) has been adopted upon the approval of the Ministry of Education.

In 2005 the quality of its undergraduate education was

History

Overview

Nanjing University of Information Science & Technology is an institution of higher learning in China, giving priority to Science, Engineering and Commerce with characteristics of Atmospheric Science, Information Science & Technology, and Environmental Science & Engineering. It consists mainly of 20 schools and faculties, which are granted to confer bachelor's, master's and doctoral degrees. In addition, a post-doctoral research center has been set up for holders of doctoral degree. The University has trained students and meteorologists for more than 100 countries and regions. The total enrollment of students is currently about 20000, including 1300 postgraduates and Ph.D. candidates.

I was very pleased to visit the Nanjing Institute of Meteorology again and to see the outstanding progress and advances you are doing!

Your efforts in helping other WMO members in developing human resources are noteworthy. The new RTC facilities are excellent!

Thanks, many thanks for your unflinching cooperation and support to WMO's education and training activities

G. V. NECCO
May 16, 2000

with kinship of the time and the same staff and my dear friends and dear work.

On behalf of the World Meteorological Organization and myself, I wish the Institute continued success and further extension to global meteorology.

WMO is my proud to be associated with you.

G. O. P. OSAKI
Secretary General
World Meteorological Organization
16 Sept 2000.

I was privileged to visit NUIST which is one of the best in the network of WMO RTCs. I wish to place on record my warmest appreciation to Prof SUN Zhaobo, President of NUIST and his highly qualified colleagues for their unparalleled commitment to Education and Training in Meteorology and related science, particularly for the benefit of developing countries.

I also wish to extend on behalf of WMO and by error, my appreciation to the Tianjin Province Authorities for their continued valuable support to NUIST.

I was impressed by the development plan for the future of this important institution. Thank you for the warm welcome extended to me.

Best wishes,
G. O. P. OSAKI

?International students can apply for Chinese Government Scholarship from CSC (China Scholarship Council).

?NUIST is one of ten universities in Jiangsu Province which are qualified to enroll students with Chinese Government Scholarship.

? Chinese Government Scholarship falls into two categories: full scholarship and partial scholarship.

Details of the Scholarship

1. Full scholarship:

- Exempt from registration fee, tuition fee, fee for laboratory experiment, fee for internship, fee for basic learning materials and accommodation on campus;
- Living allowance;
- One-off settlement subsidy after registration;
- Fee for outpatient medical service, Comprehensive Medical Insurance and Benefit Plan for International Students in China;
- One-off inter-city travel subsidy.

2. Partial scholarship

School Culture

Nanjing

Nanjing is the capital city of Jiangsu with a population about 7.0 million. Owing to its superior geographic location, the city has remained the transportation center of the Yangzi Delta region. Once prospering on its shipyards, Nanjing has now grown into a commercial hub and cultural center of southeast China.

For almost 2,000 years, Nanjing ("China's Southern Capital") has witnessed some of the most significant events in Chinese history, including its position as nation's capital during the Six Dynasties (220-589 AD) and the Southern Song Dynasty (1127-1279 AD), the onset of Ming Dvnastv in 1368 by Zhu
