

Review Criteria for the FFI Strategy and Action Plan

The review of the Flood Forecasting Initiative Strategy and Action Plan should address at least the following questions:

1. Is the scope of the Plan appropriate for a WMO activity; i.e., does it clearly define those things that are traditionally within the WMO mission and omit those things that are not?
2. Does the Plan unambiguously state its purpose, and does it articulate a sense of what it hopes to achieve over the coming 5-10 years; i.e., what constitutes a successful initiative?
3. Are FFI priorities clearly defined, are they tractable, and do they complement the broader suite of objectives associated with related flood programmes.
