

Overview about WMO Water Conference – by Claudio Caponi

Thursday 07 December 2017
3er meeting of FFI-AG
WMO, Geneva

The **WMO Global Conference: Prosperity through Hydrological Services** is a catalyst for collaboration among initiatives that are aimed at increasing the availability and use of hydrological services worldwide. The Conference seeks to create better interfaces between hydrological service providers and decision-makers, in turn generating increased societal benefits.

A preliminary agenda was presented by Mr Caponi during FFI-AG meeting.
