Regional and National Aspects

Project Steering Committee (PSC)

- Project steering committee will consist of delegates from WMO, RC, NHMSs, Hydrologic Research Center (HRC), and USAID such that each will be represented with one delegate.
- If deemed necessary, additional experts/representatives may attend the PSC meeting on an ad-hoc basis as required.
- WMO will work with PSC members in coordination and steering of the project.

Communication

- Available communication channels shall be open between the Regional Center and its participating NHMSs;
- Operational performances of the system depend on, among others, the exchange of knowledge, ideas, information, data and products; and
- Lack of communication may not only cause interruption of the services but also decrease the quality of products and services provided.

Common Principles

- Data providers remain owners of data;
- Access to data and information generated by the project for project partners and beyond – where applicable – as per WMO Resolutions 25 (CG-XIII) and 40 (CG-XII);
- Services provided by the technical development partner, namely HRC, and the Regional Centre(s) are of an advisory nature; and
- Full responsibility for national guidance and warning services remains with the participating NMHSs.
