Purposes

- To review the development and implementation status of the HDRFFG System, including;
 - Provision of historical and real-time hydrometeorological data to HRC,
 - Bias adjustments,
 - Basin delineations.
- To review HDRFFGS concept and products;
 - Diagnostic products,
 - Prognostic products,
 - Threat products.

Purposes

- How to use of FFGS products in operation through case study presentation and hands-on exercises of the past flood events;
- How to prepare flash flood bulletins for issuing of flash flood watches, warnings, and alerts;
- How to perform flash flood warning verification studies;
- To review the FFG Advances; and
- Participants feedbacks for the further developments and needs.

Expected Outcomes

- Understanding of local, regional and international cooperation among related institutions and organizations to reduce the adverse effects of flash floods;
- Understanding of flash flood guidance system concept, its implementation and data requirements among participants;
- To become familiar with the operational use of HDRFFGS and warning verifications, and
- To become familiar with the FFG advances.

Thank you
