

GAPS AND WEAKNESS ON DATA AND COMUNICATION

- Low station network coverage
- Non real time data transition
- State of infrastructure
- Weak conditions of Data Bases
- Communication
 - Bad communication network eg. Mobile
 - Bad Internet connection
 - Administrative gaps - late payment to service providers
 - Weak communication between countries
 - Weak communication between Agro-Met-Hydro services

GAPS AND WEAKNESS ON DATA AND COMUNICATION

- Lack of Capability and Capacity of Observers
- Lack of Motivation

Solutions

- Need for administrative actions for better increase in the networks
- Database connectors for the national data
- Better achieving of the data
- Plans for the new networking
- Automation of the existing gauges
- Request for budget from both Government & other implementation partners
- Better proposals for the need for all data processing & collection to better justify Implementing partners to come in to assist

Solutions

- Computerize the observers results then use email to send data for processing
