# Role of WMO

WMO will be the primary liaison with the Department of Meteorology and Hydrology of Myanmar and intends to perform the following activities:

- Provide technical and administrative assistance for the *design, development, implementation* and *operations* of the flash flood guidance system as part of the global flash flood guidance system;
- Provide support in the design and implementation of various *training programs* (e.g., workshops), including the development of distance training techniques;
- Provide support in the development of *Concept of Operations* for inclusion of the FFG diagnostic tool into current Department of Meteorology and Hydrology of Myanmar operations;

# Role of WMO

- Provide support in developing *collaborations* between the National Meteorological and Hydrological Services and disaster risk management organizations;
- Provide support in developing regional collaborations and cooperation between the National Meteorological and Hydrological Services and the Regional Centre and in collaborations between regions;
- Provide support in the use of the WMO Global Telecommunications System (GTS) and WMO Information System (WIS) for data access and distribution;

# Role of WMO

- Encourage, where appropriate, cooperation and inter-operability of the Myanmar Flash Flood Guidance project *with other regional projects*;
- Ensure integrity of the project with other regional implementations of the Flash Flood Guidance programme;
- Ensure full integration of the Flash Flood Guidance programme in the *WMO Flood Forecasting Initiative*; and
- Facilitate the use of products and information generated in aggressively reducing exposure to disaster risk and improving disaster risk management in Myanmar.

# Thank you

Paul Pilon
