Role of WMO

WMO OMM

World Meteorological Organization

Organisation météorologique mondiale

Role of WMO

WMO will be the primary liaison with its National Meteorological and Hydrological Services and the designated Regional Centre and intends to perform the following activities:

- Provide technical and administrative assistance for the *design, development, implementation and operations* of the regional flash flood guidance system as part of the global flash flood guidance system;
- Provide support in the design and implementation of various *training programs* (e.g., workshops), including the development of distance training techniques;
- Provide support in the development of *operations concepts* for inclusion of the FFG diagnostic tool into current National Meteorological and Hydrological Services operations;

Role of WMO

- Provide support in developing *collaborations* between the National Meteorological and Hydrological Services and disaster risk management organizations;
- Provide support in developing regional collaborations and cooperation between the National Meteorological and Hydrological Services and the Regional Centre and in collaborations between regions;
- Provide support in the use of the WMO Global Telecommunications System (GTS) and WMO Information System (WIS) for data access and distribution;

Role of WMO

- Encourage, where appropriate, cooperation and inter-operability of the South East Asia Flash Flood Guidance project *with other national and regional projects*;
- Ensure integrity of the project with other regional implementations of the Flash Flood Guidance programme;
- Ensure full integration of the Flash Flood Guidance programme in the *WMO Flood Forecasting Initiative*; and
- Facilitate the use of products and information generated in aggressively reducing exposure to disaster risk and improving disaster risk management in participating countries.
