

USAID/OFDA Role

USAID/OFDA has an interest in the FFG Program due to its mandate to **save lives, alleviate human suffering and lessen the socio-economic impact of humanitarian emergencies worldwide**. USAID/OFDA supports programs to mitigate the adverse impact of **recurrent natural disasters, such as flash floods**, throughout the world.

- Provide technical advice for the design, development and operations of the FFG System for areas including:
 - onsite and distance training programs,
 - operational concepts,
 - flash flood warning operations and protocols, and
 - communication and dissemination systems.
- Provide technical assistance for the development and implementation of FFG pilot programs.
