- Strong Winds: **> 30 Knots (over land and Sea) > 50 Knots (over Sea)**

Assessment Scale for the Degree of Confidence of Forecast:

Confidence Level >75% **(High)**; Confidence Level 50-75% **(Medium)**; and Confidence Level <50% **(Low)**

Risk Tables

Date of issue: 4 June, 2014 (Wednesday)

Validity: 4 to 5 June 2014

Two tables (for Day 1 and Day 2, respectively), summarizing the risk of severe weather as assessed by the RFSC Ha Noi are given below. In order to provide more information about the geographical location of the severe event the following convention is adopted when filling in the cells: X for the whole country, N for the northern part, S for the southern part, W for the western part and E for the eastern part. Similarly, NE for the northeastern part and SW for the southwestern part etc.
