

## EC/WGAM-IX/Doc. 4.4, Appendix

### Results of the specific monitoring of the exchange of Antarctic meteorological data

#### 1. Description of the presentation of the monitoring results

The monitoring results compiled by the WMO Secretariat are presented in Figures 1 to 4, and Tables I to IX as follows:

- (a) Figures 1 to 4 show the availability of SYNOP reports and part A or TEMP, CLIMAT and CLIMAT TEMP reports at the monitoring centres in a chart format.
- (b) Table I includes a compilation of the information available in the Secretariat related to the collection of data from the stations comprising the Antarctic Basic Synoptic Network (ABSN). This information includes:
  - (i) The index number of the station, the name of the station, the programme of observation of the station and the country operating the station, in accordance with the information given in the WMO Publication No. 9 – Volume A;
  - (ii) The means used to transmit the data from the station to the collecting centre, the GTS Regional Telecommunication Hub (RTH) which will be the first to relay the data on the GTS;
  - (iii) The abbreviated headings of the bulletins in which SYNOP reports from the stations were received by MTN centres during the special MTN monitoring (SMM) exercise (same period of monitoring); it is indicated whether the abbreviated headings are included in the WMO Publication No.9 – Volume C1;
  - (iv) The number of reports received from the stations during the specific monitoring of the exchange of Antarctic Data (SAM) and the SMM exercise.
- (c) Tables II to VIII contain monitoring results for:
  - (i) SYNOP reports (Table II),
  - (ii) Parts A, B, C and D of TEMP reports (Tables III to VI),
  - (iii) CLIMAT reports (Table VII),
  - (iv) CLIMAT TEMP reports (Table VIII) ;

The format of presentation used in this respect is the format A (see paragraph 2 below).

- (d) Information relating to the implementation of monitoring procedures at centres is compiled in Table IX.

## **2. Format A: Availability of reports received at monitoring centres**

2.1. Format A is used to present the monitoring results with the aim of comparing the availability of data issued from each Antarctic station at the monitoring centres. The monitoring results relating to each Antarctic station are presented in three sections:

- (a) Section 1: stations transmitting their reports via ARGOS,
- (b) Section 2: stations transmitting their reports to an Antarctic collecting centre,
- (c) Section 3: stations transmitting their reports to a GTS centre located outside Antarctica.

In each of these sections 2 and 3, the stations are grouped under the associated Antarctic collecting centre or the associated GTS centre located outside Antarctica.

2.2. The first column of the Tables contains the index numbers of the stations and the observation programmes of the stations for the various standard times of observation as required from the Antarctic Basic Synoptic Network (ABSN). The second column gives the number of stations included in the ABSN.

2.3. The remaining columns contain figures showing the availability of reports received from each Antarctic station at each centre listed in the heading. These figures are percentages calculated with reference to reports required from the ABSN/ABCN and are presented on one or several lines for each station according to the type of data as follows

- (a) For SYNOP reports, daily average of reports received within one hour, three hours and 12 hours of the standard observation time;
- (b) For TEMP reports, daily average of reports received within three hours and twelve hours of the standard observation time;
- (c) For CLIMAT and CLIMAT TEMP reports, reports received during the monitoring period.

Figure 1

**SPECIAL MONITORING OF THE EXCHANGE OF ANTARCTIC DATA**  
Monitoring period: 1 to 15 January 2006  
**SYNOP reports**

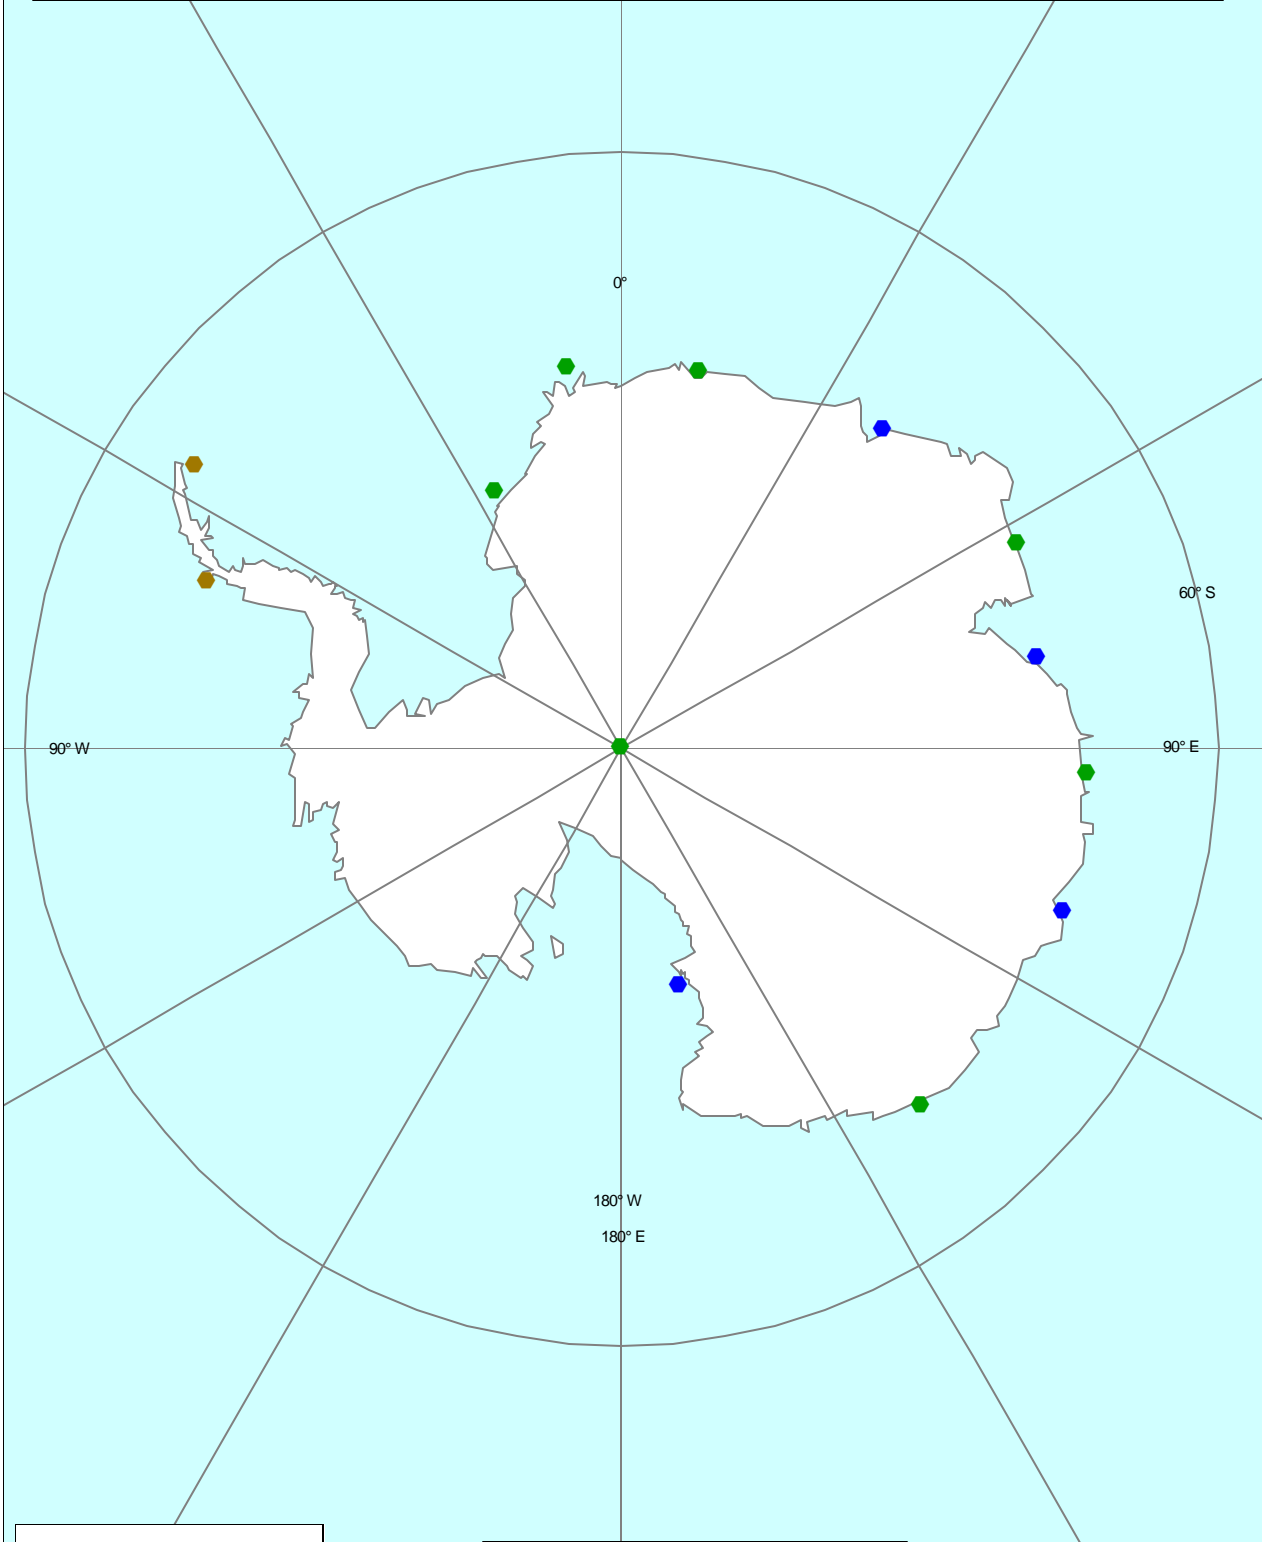

- 90% to 100% (50)
- 45% to 90% (9)
- 1% to 45% (2)
- silent station (13)

The designations employed and the presentation of material in this chart do not imply the expression of any opinion whatsoever on the part of the Secretariat of the World Meteorological Organization concerning the legal status of any country.

**WMO Secretariat**

Figure 2

**SPECIAL MONITORING OF THE EXCHANGE OF ANTARCTIC DATA**  
Monitoring period: 1 to 15 January 2006  
**TEMP reports Part A**

- 90% to 100% (4)
- 45% to 90% (7)
- 1% to 45% (2)
- silent station (0)

The designations employed and the presentation of material in this chart do not imply the expression of any opinion whatsoever on the part of the Secretariat of the World Meteorological Organization concerning the legal status of any country.
