

## Appendix A

### Results of the 2005 Annual Global Monitoring (AGM) of the operation of the WWW for SYNOP and TEMP reports

1. The monitoring results compiled by the WMO Secretariat are presented in sections A to H as follows:

- (a) Part I of Section A includes information on the availability of SYNOP reports, Parts A of TEMP reports and Parts A of PILOT reports at MTN centres at the global level for the full monitoring period (1-15 October); in Tables 1 to 3, the numbers of reports received at MTN centres are compared to the numbers of reports expected from stations included in the Regional Basic Synoptic Networks (RBSNs); in Tables 4 and 5, the availability of data at MTN centres is given for the last four global monitoring exercises. The numbers of stations comprising the RBSNs in comparisons with previous years are given in Tables 6 and 7.
- (b) Sections B and C include monitoring results detailed at the regional level for:
  - (I) SYNOP reports (section B),
  - (ii) Part A of TEMP reports (section C),

The format of presentation used is format 1 (see paragraph 2 below).

- (c) Section D includes an analysis of the monitoring results with reference to the observing programmes given in Volume A of WMO Publication No.9. It points out the non-reception of expected data from so-called "silent" stations and the reception of unexpected data at WWW centres; this information should in particular assist WWW centres in reviewing the content of Volume A and sending appropriate amendments to the WMO Secretariat; Section D contains two Parts:
  - (I) the list of "silent" stations is given in Part 1; when considering the observational data expected from the stations in accordance with the observing programmes given in Volume A of WMO Publication No. 9, these "silent" stations are those stations from which the responsible NMC, the associated RTH and several MTN centres have not received any report;
  - (ii) centres reported the reception of observational data which was not expected according to the observing programmes given in Volume A of WMO Publication No. 9; Part 2 includes the list of stations from which unexpected observational data were received by the responsible NMC, the associated RTH and/or several MTN centres.

The lists of stations are presented as tables with two columns; for each type of data (SYNOP reports and Parts A of TEMP reports), the location of the station (i.e. country or area by which the stations are grouped in Volume A) is given in column (a) and the index number of the stations in column (b).

- (d) Information relating to the implementation of monitoring procedures at centres is compiled in Section E. The monitoring centres are given in column (a) and the columns 1 to 11 correspond to the columns 1 to 11 of the format J of Table D of

Attachment I.5 of Manual on the GTS.

- (e) Sections F and G give the following information by blocks of 5 degrees by 5 degrees for SYNOP and TEMP reports respectively:
- (i) Numbers of stations comprising the RBSN in the Region and mentioned in Volume A; see pages 1 of sections F and G
  - (ii) Reports made as indicated in Volume A (percentages calculated with reference to reports required from RBSN stations); see pages 2 of sections F and G;
  - (iii) Reports received daily at MTN centres from RBSN stations during the monitoring period (percentages calculated with reference to reports required from RBSN stations); see page 3 of section F for SYNOP reports and page 3 of section G for parts A of TEMP reports;
  - (iv) Differences between the percentages of reports received daily at MTN centres from RBSN stations during the 2005 monitoring period, and the 2003 and 2004 monitoring periods (percentages calculated with reference to reports required from stations included in RBSNs both in 2003 and 2005, and in 2004 and 2005 respectively); see pages 4 and 5 of section F for SYNOP reports, and pages 4 and 5 of section G for Parts A of TEMP reports.
- (f) The percentages of SYNOP reports and parts A of TEMP reports received by MTN centres from each station are shown in section H. The percentages are calculated with reference to reports required from RBSN stations.

2. Format 1: availability of data issued from a country or other area at the responsible NMC, the associated RTH and/or several MTN centres

2.1 Format 1 is used to present the monitoring results with the aim of comparing the availability of data issued from a country or other area at the responsible NMC, the associated RTH and/or several MTN centres. The countries or areas are grouped by zones of responsibilities of RTHs. In addition, totals are presented for each zone of responsibility for the RTH concerned and/or MTN centres as well as at the regional level for these MTN centres.

2.2 If the monitoring periods were not identical for all centres, the period of reference corresponds to the period for which most of centres provided monitoring results. If a centre provided monitoring results only for another period, the monitoring results for this period are nevertheless presented.

2.3 The monitoring results are presented in columns as follows (all percentages are calculated with the RBSN as the reference):

- (a) Column (a): location, i.e. country or area by which the stations are grouped in Volume A;
- (b) Column (b): number of stations included in the RBSN;
- (c) Column (c): number of days for which monitoring results are shown in the same line for the responsible NMC, the associated RTH and the MTN centre

responsible for inserting the data into the MTN respectively;

- (d) Column (d): percentage of stations monitored by the responsible NMC, the associated RTH and the MTN centre responsible for inserting the data into the MTN respectively;
- (e) Columns (e) to (l), for each standard time and/or in total according to the type of data:
  - (i) percentage of reports to be prepared at stations implemented in accordance with the information included in Volume A as updated before the monitoring period (column Impl.);
  - (ii) percentage of reports received at the responsible NMC, the associated RTH and several MTN centres as a whole.

**Summary of the results of the annual global monitoring of the operation of the WWW carried out from 1 to 15 October 2005**

*Terminology used in the Tables:*

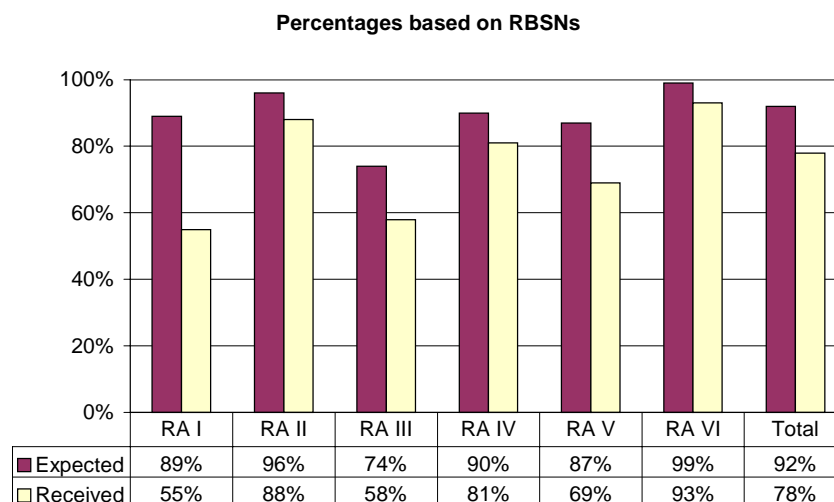

*Required:* Number of reports required daily from RBSN stations for global exchange (four observations a day for SYNOP reports and two observations a day for TEMP and PILOT reports)

*Expected:* Number of reports expected daily from RBSN stations as committed to by Members, according to WMO Publication No. 9, Volume A

*Received:* Average number of reports received daily on the Main Telecommunication Network (MTN) of the GTS

**1. Availability of SYNOP and parts A of TEMP reports at MTN centres in comparison with the requirements**

*Table 1 - SYNOP reports (Observation times: 00, 06, 12 and 18 UTC)*

Section A, Part I, p. 2

Table 2 - *Parts A of TEMP reports*  
(Observation times: 00 and 12 UTC)

Number of reports

Percentages based on RBSNs

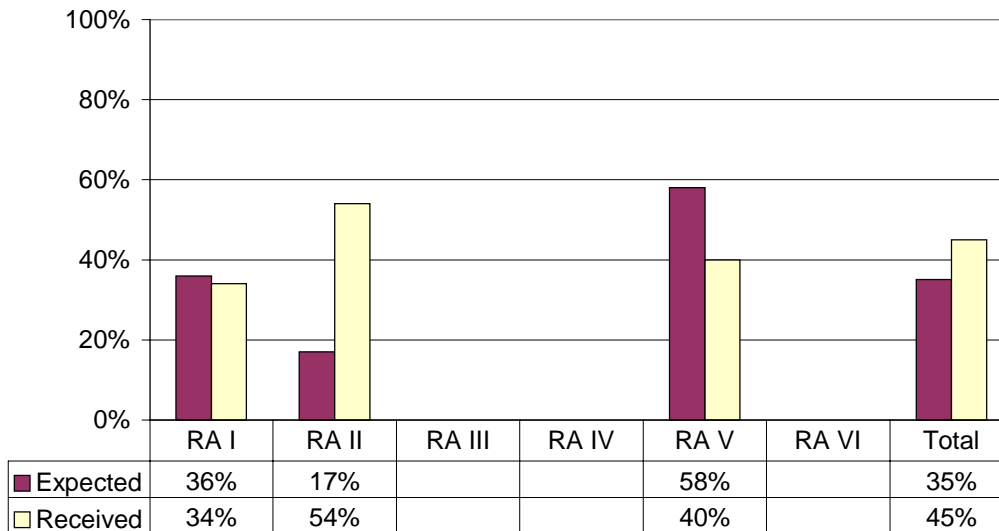

Section A, Part I, p. 3

Table 3 - Parts A of PILOT reports  
(Observation times: 00 and 12 UTC)

Number of reports

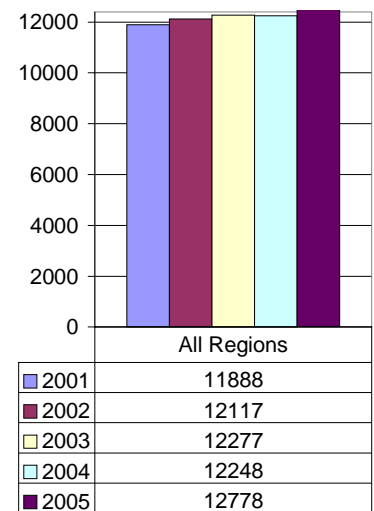

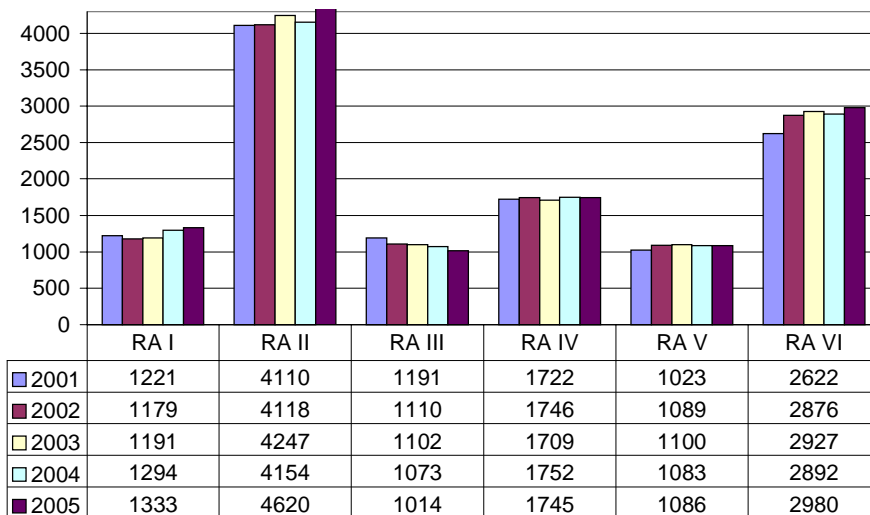

Percentages based on RBSNs

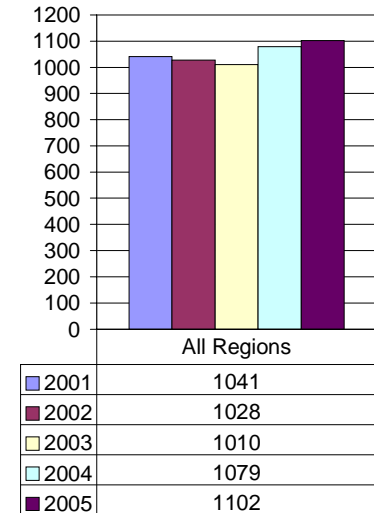

**2. Availability of SYNOP reports and parts A of TEMP reports at MTN centres in comparison with previous years**

*Table 4 - SYNOP reports*

*Table 5 - Parts A of TEMP reports*

### 3. Number of stations comprising the RBSNs in comparison with the previous years

Table 6 - Surface stations

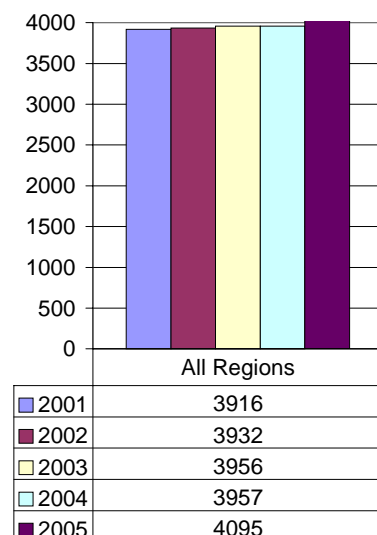

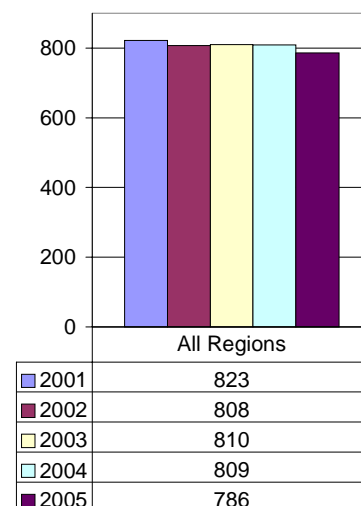

Table 7 - Upper air stations (TEMP reports)

## RESULTS OF THE ANNUAL GLOBAL MONITORING OF THE OPERATION OF THE WWW

Availability of SYNOP reports from Region I (Format 1)

### RESULTS OF THE ANNUAL GLOBAL MONITORING OF THE OPERATION OF THE WWW

Questionnaire related to the implementation of procedures of the monitoring at centres in Region I

Monitoring period: 1 to 5 October 2005

Geographical Location	Is the monitoring automated ?	Is the counting of bulletins and reports performed before quality control ?	Are bulletins and reports counted only if received or transmitted on the GTS channels ?	Are duplicated bulletins disregarded ?	Are bulletins including only NIL reports counted ?	Are bulletins including COR or CCx counted in addition to bulletins to be corrected ?	Are duplicated reports included in bulletins having the same abbreviated heading disregarded ?	Are duplicated reports included in bulletins having different abbreviated heading disregarded ?	Are NIL reports disregarded ?	Are reports included in bulletins with indicator COR or CCx disregarded to avoid double counting of these reports ?	Are all AIREP/ AMDAR reports made at different positions during the flight counted as different reports ?
