### **WWW-RELATED CO-OPERATION ACTIVITIES**

*(Submitted by the Secretariat)*

#### **Summary and purpose of document**

This document presents information on WWW-related co-operation activities.

#### **ACTION PROPOSED**

The Meeting invited to consider the information on WWW-related co-operation activities included in the document.

1. The Pacific Meteorological Services Needs Analysis Project provides information identifying the national/regional/international obligations and needs relating to Meteorological Services. Details on the Project are given in documents 4(1) and 4(4). The Informal Planning Meeting (IPM) on the Voluntary Co-operation Programme (VCP) and related Technical Co-operation Programmes (Melbourne, Australia, 26 February-1March 2001) encouraged the donors to use the Needs Analysis for funding projects in the Region.
2. No UNDP/Trust Funds projects were implemented during the period 1999-2001 in Region V.
3. The status of the requests for assistance and the projects developed within the framework of the Voluntary Co-operation Programme (VCP) is given in the next pages.
4. Eight VCP projects were fully or partially completed in 1999-2001. Two projects were related to the observation system, four to the data processing system and two to the telecommunication system.
5. One VCP project related to the observing system is on-going.
6. Ten VCP projects still need support. Seven projects are related to the observation system, two to the data processing system and one to the telecommunication system.

VCP projects fully or partially supported and reported as completed in 1999-2001
