GENEVA, 31 December 1990

**Subject** : Monthly letter on the operation of the World Weather Watch (WWW) and Marine Meteorological Services (MMS) December 1990

**Action required :** To be noted and brought to the attention of appropriate operational units

Dear Sir/Madam,

As you are aware, all the information on changes to the operation of the World Weather Watch (WWW) and Marine Meteorological Services (MMS) is being assembled and distributed by the Secretariat on a monthly basis to facilitate updating and follow-up action.

In this connection, please find attached the annexes providing the latest operational information on WWW and MMS. Those items and sub-items for which information is provided are listed below:

**Annex I - Global Observing System**

**C. Information on operational status of elements of the surface-based sub-system**

**1. Publication No. 9, Volume A - Stations**

- 1.1 New stations
- 1.2 Deleted stations
- 1.3 Changes to existing stations
- 1.5 Temporary changes

To: Permanent Representatives (or Directors of Meteorological or Hydro-meteorological Services) of Members of WMO (PR-4588)  
 Directors of Meteorological Services of non-Member countries (MC-2440)  
 Presidents and Vice-Presidents of Regional Associations (P.RA-1265)  
 Presidents and Vice-Presidents of Technical Commissions (P.TC-1382)  
 Chairmen of CBS Working Groups  
 Secretary-General of ICAO  
 Director-General of IATA  
 Secretary of IOC  
 Director-General of ASECNA  
 Director of ECMWF

**2. WMO Catalogue of radiosondes in use by Members**

**4. Automatic marine stations**

**5. ARGOS**

**5.1 ARGOS monthly status report**

**6. Feed-back from Members to the Secretariat on any changes in the observing network**

**Annex III - Global Telecommunication System**

**C. Information on the operation of the GTS**

**1. Catalogue of Meteorological Bulletins (Publication No. 9, Volume C, Chapter I)**

**1.1 New bulletins**

**1.3 Changes to bulletins**

**2. Transmission schedules (Publication No. 9, Volume C, Chapter II)**

**2.2 Deleted transmissions/broadcasts**

**G. Miscellaneous information**

**Annex IV - Codes**

**B. Manual on Codes**

**2. Regional practices**

**2.3 Changes to codes**

Annex V - Marine Meteorological Services (MMS)  
and related oceanographic activities

C. Information on the operation of Marine Meteorological Services

1. Broadcasts for shipping and other marine activities  
(Publication No. 9, Volume D, Part A)

1.2 Deleted broadcasts

The CBS Advisory Working Group recommended that a special table should be added to the monthly letter to report changes of the present status of implementation of observing programmes of SYNOP, TEMP and PILOT reporting stations. You will note, therefore, that a new item, number 6, "Feed-back from Members to the Secretariat on any changes in the observing network" has been added to Annex I - Global Observing System.

Your co-operation in ensuring that the above information reaches the appropriate operational units of your service is greatly appreciated. If you wish to receive additional copies of the monthly circular letter, please inform the Secretariat accordingly.

Yours faithfully,

(G.O.P. Obasi)  
Secretary-General

# Annex I - Global Observing System

Date: December 1990

## C. Information on operational status of elements of the surface-based sub-system

### 1. Publication No. 9, Volume A - Stations

#### 1.1 New stations

## • 1.5 Temporary changes

**Notification from Djibouti that 1200 UTC pilot-balloon observations at station 63125 DJIBOUTI are being temporarily suspended.**

## **2. WMO Catalogue of Radiosondes in use by Members**

**Notification from Australia that:**

- (1) Radiosonde station 94865 LAVERTON changed to using PC-CORA radiosonde ground equipment on 1 November 1990 at 0000 UTC. Data is computed to 3 hPa. Solar radiation corrections are applied. VAISALA RS-80 radiosondes will continue to be used.
  - (2) Radiosonde station 96996 COCOS ISLAND changed to using MARWIN radiosonde ground equipment for temperature and OMEGA (VLF) derived winds on 28 November 1990 at 2224 UTC. Data is computed to 3 hPa. Solar radiation corrections are applied. VAISALA RS-80-15N radiosondes will be used.

**Notification from New Zealand that as from 17 December 1990 at 0000 UTC the station 93417 PARAPARAUMU AERODROME changed from manual processing of radiosonde observations to the VAISALA PC-CORA system.**

#### 4. Automatic marine stations

Canada

Data from moored and drifting buoys are collected via geostationary and polar orbiting satellites respectively. Meteorological reports from moored buoys using FM 13-IX SHIP code are distributed on the GTS from the Direct Readout Station located in Vancouver, B.C. Reports from drifting buoys are received at the Argos Local User Terminal in Edmonton and distributed on the GTS using the FM 14-VIII DRIBU code.

\*\* Primarily for National Weather Service (NWS) support; however, all stations report data to NWS.

\* Sensor/system failure.

## 5. ARGOS service

### 5.1 ARGOS monthly status report

As at 3 December 1990, the Argos service was handling reports from 595 drifting buoys, 130 moored buoys, 4 balloons, 31 ships, 102 animal trackings, 399 fixed stations, 222 boats and 23 miscellaneous platforms. DRIBU reports from 66 drifting buoys, SHIP reports from 30 selected ships and BATHY reports from 24 selected ships were transmitted to the RTH Paris and DRIBU reports from 222 drifting buoys were transmitted to the WMC Washington for insertion into the GTS. The list of platforms reporting through Argos and distributed over the GTS follows:

#### ATLAS buoys

This report does not list the ATLAS buoys. The new software previously announced for the end of this year is not yet operational.

#### Note

Members operating Argos Local Users Terminals (LUTs) are invited to submit to the Secretariat by telex, the list of platforms entering reports into the GTS through their LUTs, effective on or around the 20th of each month.

6. Feed-back from Members to the Secretariat on any changes in the observing network

In view of the difficulties experienced at present in identifying non-implemented observing stations or implemented stations which are closed or suspended for a certain period, or stations making observations but not reaching their NMCs, the ninth session of the CBS Advisory Working Group recommended that a special table be added to the WWW monthly operational letter to serve as feed-back from Members to the Secretariat on any changes of the present state of implementation of observing programmes of SYNOP, TEMP and PILOT reporting stations.

The special table, accompanied by explanatory notes overleaf, is attached as an appendix to this annex. Members are urged to fill in this appendix, as and when appropriate, and to return it to the Secretariat before the 1st of each month to enable changes to be included in the next monthly letter.

**Feed-back from Members to the Secretariat on any changes in the observing network  
 (explanatory notes overleaf)**

<b>Global Exchange/Regional Exchange (delete as appropriate)</b>								<b>Country:</b> _____		
<b>Station index number</b>	<b>Bulletin identification</b> <b>TTAAii CCCC</b>	<b>Implementation of observing programme</b>							<b>Alternate observing station</b>	<b>Remarks</b>
		00	03	06	09	12	15	18	21	

**1. SYNOP**

**2. TEMP**

**3. PILOT**

## Explanatory notes for Feed-back from Members to the Secretariat on any changes in the observing network

1. Separate tables should be prepared for global exchange and regional exchange respectively. These tables should contain information concerning any changes of the present state of implementation of observing programmes of SYNOP, TEMP and PILOT reporting stations given in Attachment I-4 of the Manual on the GTS, Volume I for global exchange and, as applicable, Attachments AF-I, AI-1, SA-1, NA-1, PS-1 and EU-1 of the Manual on the GTS, Volume II for regional exchange.
2. For entries in these tables, the following should be taken into account:
  - (a) In the column "Station index number", the index number (IIii) of each station should be entered in case of any changes in the observing programmes of the stations;
  - (b) In the column "Bulletin identification", the TTAAii CCCC of the abbreviated heading of the meteorological bulletins which contains reports from the station should be inserted;
  - (c) In the column "Implementation of observing programme", "X" for implementation and "--" for non-implementation should be inserted as appropriate. In order to easily identify changes in the programme, this should be marked in red;
  - (d) In the column "Alternate observing station", the index number (IIii) of an alternate observing station should be inserted in case another station is available with a view to filling gaps which are caused by suspension of observing programmes of the original station;
  - (e) The required information concerning the observing programme of the alternate station should be inserted in the next horizontal line of the original station;
  - (f) In the column "Remarks", reasons of temporary suspension of observing programmes and an expected date of resumption of the programmes should be given as far as possible. Non-standard collection and/or distribution times should also be included.
3. These tables should be sent to the Secretariat before the 1st of the month for inclusion of the changes in the monthly operational letter, as appropriate.

# Annex III - Global Telecommunication System

Date: December 1990

## C. Information on the operation of the GTS

### 1. Catalogue of Meteorological Bulletins (Publication No. 9, Volume C, Chapter I)

#### 1.1 New bulletins

Notification from Argentina that as from 15 December 1990 the RSMC Buenos Aires will transmit 700 hPa, 500 hPa and 250 hPa analysis and prognosis charts in grid code form in meteorological bulletins with the following abbreviated headings:

GHXA70 SABM  
GHXA50 SABM  
GHXA25 SABM  
GHXE70 SABM  
GHXE50 SABM  
GHXE25 SABM

#### 1.3 Changes to bulletins

Notification from USSR that as from 1200 UTC on 1 February 1991 the SYNOP data will be transmitted on the GTS broadcasts from station 30683 EROFEJ PAVLOVIC instead of station 30597 URUSA.

### 2. Transmission schedules (Publication No. 9, Volume C, Chapter II)

#### 2.2 Deleted transmissions/broadcasts

VI-ii      Potsdam RTT broadcast effective 31 December 1990.  
VI-ii      Tirana RTT broadcast

## G. Miscellaneous information

Notification from WMO Secretariat that the new WMO telex number is 41 41 99 A OMM CH.

Notification from Japan that as from 1700 UTC on 31 December 1990 new telephone and telefax numbers for Japan Meteorological Agency will be:

Telephone: +81 3 3211 4966  
Telefax:    +81 3 3211 2032

Notification from USSR that the State Committee for Hydrometeorology now has a telefax outlet to the international automatic exchange:

Telefax:    +70 95 253 94 84  
Telex:       411117 RUMS SU
