GENEVA, 30 April 1991

Subject : Monthly letter on the operation of the World Weather Watch (WWW) and Marine Meteorological Services (MMS) April 1991

Action required : To be noted and brought to the attention of appropriate operational units

Dear Sir/Madam,

As you are aware, all the information on changes to the operation of the World Weather Watch (WWW) and Marine Meteorological Services (MMS) is being assembled and distributed by the Secretariat on a monthly basis to facilitate updating and follow-up action.

In this connection, please find attached the annexes providing the latest operational information on WWW and MMS. Those items and sub-items for which information is provided are listed below:

Annex I - Global Observing System

C. Information on operational status of elements of the surface-based sub-system

1. Publication No. 9, Volume A - Stations

- 1.1 New stations
- 1.2 Deleted stations
- 1.3 Changes to existing stations
- 1.5 Temporary changes

2. WMO Catalogue of Radiosondes in use by Members

To: Permanent Representatives (or Directors of Meteorological or Hydro-meteorological Services) of Members of WMO (PR-4619)
Directors of Meteorological Services of non-Member countries (MC-2446)
Presidents and Vice-Presidents of Regional Associations (P.RA-1269)
Presidents and Vice-Presidents of Technical Commissions (P.TC-1387)
Chairmen of CBS Working Groups
Secretary-General of ICAO
Director-General of IATA
Secretary of IOC
Director-General of ASECNA
Director of ECMWF

4. Automatic marine stations

5. ARGOS

5.1 ARGOS monthly status report

6. Feed-back from Members to the Secretariat on any changes in the observing network

D. Information on operational status of space sub-system

Annex IV - Codes

B. Manual on codes

3. National practices

3.3 Changes to codes

Annex V - Marine Meteorological Services (MMS) and related oceanographic activities

C. Information on the operation of Marine Meteorological Services

1. Broadcasts for shipping and other marine activities (Publication No. 9, Volume D, Part A)

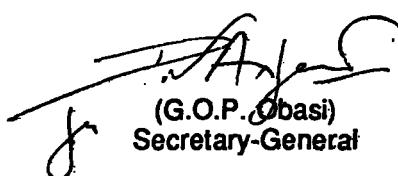

1.3 Changes in schedules/technical specifications

2. Marine meteorological services available for main ports (Publication No. 9, Volume D, Part C₁)

The CBS Advisory Working Group recommended that a special table should be added to the monthly letter to report changes of the present status of implementation of observing programmes of SYNOP, TEMP and PILOT reporting stations. You will note, therefore, that a new item, number 6, "Feed-back from Members to the Secretariat on any changes in the observing network" has been added to Annex I - Global Observing System.

Your co-operation in ensuring that the above information reaches the appropriate operational units of your service is greatly appreciated. If you wish to receive additional copies of the monthly circular letter, please inform the Secretariat accordingly.

Yours faithfully,

(G.O.P. Obasi)
Secretary-General

**Notification from Argentina that 1200 UTC radiosonde/radiowind observations at station 87155
RESISTENCIA AERO have been resumed as from 25 March 1991.**

2. WMO Catalogue of Radiosondes in use by Members

Notification from Australia that :

- (a) The following radiosonde stations changed to using PC-CORA radiosonde ground equipment. Data are computed at 3 hPa. Solar radiation corrections are applied. VAISALA RS-80 radiosondes will continue to be used:

94527 MOREE on 15 April 1991 at 2300 UTC

94646 FORREST AIRPORT on 27 March 1991 at 2300 UTC

94659 WOOMERA METEOROLOGICAL OFFICE on 19 March 1991 at 2300 UTC

94672 ADELAIDE AIRPORT on 17 April 1991 at 2300 UTC

94975 HOBART AIRPORT on 2 March 1991 at 2300 UTC

- (b) The following radiosonde stations changed to using PC-CORA radiosonde ground equipment. VAISALA RS-80 radiosondes will continue to be used:

94332 MT ISA AIRPORT ON 28 March 1991 at 2300 UTC

94578 BRISBANE AIRPORT on 29 March 1991 at 2300 UTC

94610 PERTH AIRPORT on 22 March 1991 at 2300 UTC

94637 KALGOORLIE AIRPORT on 10 April 1991 at 1

94638 **ESPERANCE** on 19 March 1991 at 21

94711 COBAR on 2 April 1991 at 2300 UTC

94776 WILLIAMTOWN AERODROME on 22 March 1991 at 2300 UTC

94802 ALBANY AIRPORT on 25 March 1991 at 2300 UTC

Notification from New Zealand that as from 8 April 1991 at 1200 UTC station 93844 INVERCARGILL AERODROME changed from manual processing of radiosonde observations to the VAISALA PC-CORA system. VAISALA RS-80-15 radiosondes will continue to be used.

4. Automatic marine stations

Canada

Data from moored and drifting buoys are collected via geostationary and polar orbiting satellites respectively. Meteorological reports from moored buoys using FM 13-IX SHIP code are distributed on the GTS from the Direct Readout Station located in Vancouver, B.C. Reports from drifting buoys are received at the Argos Local User Terminal in Edmonton and distributed on the GTS using the FM 14-VIII DRIBU code.

5. ARGOS service**5.1 ARGOS monthly status report**

As at 4 April 1991 the Argos service was handling reports from 615 drifting buoys, 130 moored buoys, 6 balloons, 35 ships, 148 animal trackings, 413 fixed stations, 195 boats and 40 miscellaneous platforms. DRIBU reports from 85 drifting buoys and BATHY reports from 27 selected ships were transmitted to the RTH Paris and DRIBU reports from 227 drifting buoys were transmitted to the WMC Washington for insertion into the GTS. The list of platforms reporting through Argos and distributed over the GTS follows:

6. Feed-back from Members to the Secretariat on any changes in the observing network

In view of the difficulties experienced at present in identifying non-implemented observing stations or implemented stations which are closed or suspended for a certain period, or stations making observations but not reaching their NMCs, the ninth session of the CBS Advisory Working Group recommended that a special table be added to the WWW monthly operational letter to serve as feed-back from Members to the Secretariat on any changes of the present state of implementation of observing programmes of SYNOP, TEMP and PILOT reporting stations.

The special table, accompanied by explanatory notes overleaf, is attached as an appendix to this annex. Members are urged to fill in this appendix, as and when appropriate, and to return it to the Secretariat before the 1st of each month to enable changes to be included in the next monthly letter.

D. Information on operational status of space-based sub-system

GOES Status Report - (from 15 April 1991 to 21 April 1991)

GOES-7:

Prime spacecraft (GOES-7)

(A) VAS operations, mode AAA, with MSI at 01 and 31 minutes past each hour with the following comment(s) exception(s):

1. MSI at 1820 UTC each Wednesday cancelled for visible channel calibration.
2. MSI at 1222 UTC each Sunday and Thursday cancelled for torque management.
3. Sun avoidance operations 10 April through to 17 April 1991.

(B) WEFAX broadcasts: simultaneous, see operational message broadcast at 1055 UTC for schedule.

Status of NOAA polar orbiting satellites

NOAA-D: Is scheduled for launch on 14 May 1991, at approximately 1552 UTC, and will cross the equator at 0730 (local time) descending. NOAA-D to become NOAA-12 will replace NOAA-10 as the operational morning descending spacecraft.

NOAA-10: (Operational), morning descending, AVHRR (HRPT, APT), DCS, MSU, SAR, SEM. ERBE scanner failed 22 May 1989. AVHRR scan motor has high jitter. DTR-1B designated safestate DTR, not used for daily operations.

NOAA-11: (Operational), afternoon ascending, AVHRR (HRPT, APT), SSU, DCS, SBUV, SAR. ROLL(Y) GYRO failed 19 September 1989. NOAA-11 is still experiencing difficulty in the Inertial Measurement Unit (IMU). When an IMU switch periodically occurs, new GYRO software is activated. IMU switching can cause yaw errors up to 1 degree that can remain for 4 revolutions.

	HRPT	APT	BCN
NOAA-9	1707(HSB)	137.62(VTX2)	137.77(BTX2)
NOAA-10	1698(LSB)	137.50(VTX1)	136.77(BTX1)
NOAA-11	1707(HSB)	137.62(VTX2)	137.77(BTX2)

Status of FY-1B

FY-1B: On 14 February 1991, a computer memory failure resulted in the un-commanded firing of the control jets. All nitrogen has apparently been depleted. FY-1B is rotating about the pitch axis at about 9 revolutions per minute. Some reduction in the initial rotation has been achieved from the magnetic and GYRO control systems. Solar power is still available and all instruments appear to be in good condition.

Status of U.S.S.R. satellites

METEOR 2-20 continues to transmit daytime visible mode imagery during south to north passes each morning. The synchronizing bars are missing from METEOR 2-20 imagery at this time. METEOR 3-3 now transmits visible mode imagery during daytime passes. In addition, IR imagery is available during night time passes. A single, short, 240 line per minute transmission was heard on 137.400 MHz recently, possibly coming from OKEAN-2.

Status of EUMETSAT satellites

METEOSAT-5 was successfully launched at 2336 UTC on 02 March 1991. All spacecraft systems currently tested appear normal. The spacecraft is presently around 3 degrees West. Radiometer commissioning began on 3 April. The first visible image was taken at 1155 UTC on 3 April. Quality of images looks very good. The first IR and WV images were taken at 0830 UTC on 4 April. Although uncalibrated and with still varying detection temperature, quality of both images also appears very good. End of commissioning expected within two weeks.

METEOSAT-4 is the operational satellite at 0 degrees East/West and all missions are nominal.

Feed-back from Members to the Secretariat on any changes in the observing network
 (explanatory notes overleaf)

Global Exchange/Regional Exchange (delete as appropriate)

Country: _____

Station index number	Bulletin identification TTAAii CCCC	Implementation of observing programme								Alternate observing station	Remarks
		00	03	06	09	12	15	18	21		

1. SYNOP

2. TEMP

3. PILOT

Explanatory notes for Feed-back from Members to the Secretariat on any changes in the observing network

1. Separate tables should be prepared for global exchange and regional exchange respectively. These tables should contain information concerning any changes of the present state of implementation of observing programmes of SYNOP, TEMP and PILOT reporting stations given in Attachment I-4 of the Manual on the GTS, Volume I for global exchange and, as applicable, Attachments AF-I, AI-1, SA-1, NA-1, PS-1 and EU-1 of the Manual on the GTS, Volume II for regional exchange.
2. For entries in these tables, the following should be taken into account:
 - (a) In the column "Station index number", the index number (IIii) of each station should be entered in case of any changes in the observing programmes of the stations;
 - (b) In the column "Bulletin identification", the TTAAii CCCC of the abbreviated heading of the meteorological bulletins which contains reports from the station should be inserted;
 - (c) In the column "Implementation of observing programme", "X" for implementation and "-" for non-implementation should be inserted as appropriate. In order to easily identify changes in the programme, this should be marked in red;
 - (d) In the column "Alternate observing station", the index number (IIii) of an alternate observing station should be inserted in case another station is available with a view to filling gaps which are caused by suspension of observing programmes of the original station;
 - (e) The required information concerning the observing programme of the alternate station should be inserted in the next horizontal line of the original station;
 - (f) In the column "Remarks", reasons of temporary suspension of observing programmes and an expected date of resumption of the programmes should be given as far as possible. Non-standard collection and/or distribution times should also be included.
3. These tables should be sent to the Secretariat before the 1st of the month for inclusion of the changes in the monthly operational letter, as appropriate.

Annex IV - Codes

Date: April 1991

B. Manual on codes

3. National practices

Annex V - Marine Meteorological Services (MMS) and related oceanographic activities

Date: April 1991

C. Information on the operation of Marine Meteorological Services

1. Broadcasts for shipping and other marine activities (Publication No. 9, Volume D, Part A)

1.3 Changes in schedules/technical specifications

Germany

AII-VI Notification from RTH Offenbach that: OFFENBACH(MAIN)-HAMBURG/PINNEBERG (DDH3/DDK3/DDK6) radio-facsimile broadcast for shipping effective 15 April 1991 changes as follows:

Chart 97909 at 1520 UTC replace H+36 by H+60.

Chart 97962 replace transmission time 0611 by 0651 UTC

Chart 97878 at 0745 UTC and 97879 at 1845 UTC amend to read in column 8: "Arrows showing the movement of pressure systems, tropical storms, significant weather"

Sweden

Ai-VI Group(e)s: B,D SVERIGES RADIO, effective 1 April 1991, modify as follows:

Column 8: replace 1542(1442) by 1540(1440)

1725(1625) by 1730(1630)

Under "List of Stations(3)" replace 02382 Härnö by Lungö

2. Marine meteorological services available for main ports (Publication No.9, Volume D, Part C1)

Israel - Israël (1.IV.1991)
