GENEVA, 30 September 1991

Subject : Monthly letter on the operation of the World Weather Watch (WWW) and Marine Meteorological Services (MMS) September 1991

Action required : To be noted and brought to the attention of appropriate operational units

Dear Sir/Madam,

As you are aware, all the information on changes to the operation of the World Weather Watch (WWW) and Marine Meteorological Services (MMS) is being assembled and distributed by the Secretariat on a monthly basis to facilitate updating and follow-up action.

In this connection, please find attached the annexes providing the latest operational information on WWW and MMS. Those items and sub-items for which information is provided are listed below:

Annex I - Global Observing System

C. Information on operational status of elements of the surface-based sub-system

1. Publication No. 9, Volume A - Stations

- 1.1 New stations
- 1.2 Deleted stations
- 1.3 Changes to existing stations
- 1.5 Temporary changes

4. Automatic marine stations

To: Permanent Representatives (or Directors of Meteorological or Hydro-meteorological Services) of Members of WMO (PR-4672)
 Directors of Meteorological Services of non-Member countries (MC-2453)
 Presidents and Vice-Presidents of Regional Associations (P.RA-1277)
 Presidents and Vice-Presidents of Technical Commissions (P.TC-1395)
 Chairmen of CBS Working Groups
 Secretary-General of ICAO
 Director-General of IATA
 Secretary of IOC
 Director-General of ASECNA
 Director of ECMWF

5. ARGOS

5.1 ARGOS monthly status report

7. Feed-back from Members to the Secretariat on any changes in the observing network

Annex III - Global Telecommunication System

- A. GTS regulatory or guidance material
- 3. Amendments to the Manual on the Global Telecommunication System
- C. Information on the operation of the GTS
 - 1. Catalogue of Meteorological Bulletins (Publication No. 9, Volume C, Chapter I)
 - 1.1 New bulletins
 - 2. Transmission schedules (Publication No. 9, Volume C, Chapter II)
 - 2.3 Changes in schedules/technical specifications

Annex IV - Codes

- B. Manual on codes
 - 1. Global practices
 - 1.3 Changes to codes
 - 2. Regional practices
 - 2.3 Changes to codes

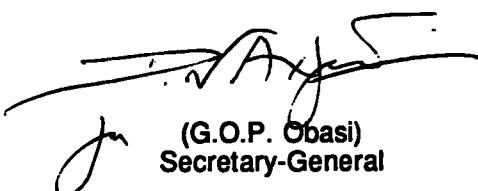

Annex V - Marine Meteorological Services (MMS) and related oceanographic activities

- C. Information on the operation of Marine Meteorological Services
 - 1. Broadcasts for shipping and other marine activities (Publication No. 9, Volume D, Part A)
 - 1.2 Deleted broadcasts
 - 1.3 Changes in schedules/technical specifications

The CBS Advisory Working Group recommended that a special table should be added to the monthly letter to report changes of the present status of implementation of observing programmes of SYNOP, TEMP and PILOT reporting stations. You will note, therefore, that a new item, number 7, "Feed-back from Members to the Secretariat on any changes in the observing network" has been added to Annex I - Global Observing System.

Your co-operation in ensuring that the above information reaches the appropriate operational units of your service is greatly appreciated. If you wish to receive additional copies of the monthly circular letter, please inform the Secretariat accordingly.

Yours faithfully,

(G.O.P. Obasi)
Secretary-General

Annex I - Global Observing System

Date: September 1991

1.5 Temporary changesChanges in observing hours due to daylight saving time in Australia

Tasmania will introduce one hour daylight saving (summer time) from 1600 UTC 5 October 1991 until 1500 UTC 28 March 1992 and Victoria, New South Wales, Australian Capital Territory, South Australia and Queensland from 1600 UTC 26 October 1991 until 1500 UTC 29 February 1992. Western Australia and Northern Territory will not be implementing summer time. Surface observations at stations in those states implementing summer time will be made one hour earlier. Surface observations at stations in Western Australia and Northern Territory will continue on the present schedule. All upper-air stations in Tasmania will make ascents one hour earlier. Times of release will be 1615, 2215, 0415 and 1015 UTC. They will commence on 5 October 1991 and will cease on 28 March 1992 and in all other upper-air stations of the Australian continent from 26 October 1991 until 29 February 1992. Other stations under Australian control will adopt the following schedules:

94299	Willis Island	will follow Queensland practice
94995	Lord Howe Island	will follow New South Wales practice
94996	Norfolk Island)

94998	Macquarie Island.....	entire observation programme one hour earlier
96996	Cocos Island	will follow Western Australian practice
Surface and upper-air programmes of Antarctic stations operated by Australia remain unchanged.		

Temporary suspension of observing stations in Brazil

Due to technical problems the observations of following stations are being temporarily suspended until further notice:

(a) Surface observations:

82024	BOA VISTA
82141	SOURE
82317	TEFE
82392	SOBRAL
82418	CARAUARI
82425	COARI
82493	JAGUARUANA
82583	CRATEUS
82590	APODI
82723	LABREA
82771	URUCUI
82789	TRIUNFO
82792	MONTEIRO
82807	TARAUACA
83242	LENCOIS
83467	LIMEIROS
83470	RIO VERDE
83550	SAO MATEUS
83574	FRUTAL
83618	TRES LAGOAS
83654	PORTO MURTINHO
83669	SAO SIMAO
83719	CABO FRIO
83742	VASSOURAS
83828	TOLEDO
83874	SAO FRANCISCO DO SUL
83924	LANGUNA
83931	ALEGRETE

(b) Upper-air observations

82022	BOA VISTA (AEROPORTO)
82280	SAO LUIZ
82765	CAROLINA
82965	ALTA FLORESTA
82983	PETROLINA
83229	SALVADOR
83650	TRINDADE (ILHA)

4. **Automatic marine stations**

Canada

Data from moored and drifting buoys are collected via geostationary and polar orbiting satellites respectively. Meteorological reports from moored buoys using FM 13-IX SHIP code are distributed on the GTS from the Direct Readout Station located in Vancouver, B.C. Reports from drifting buoys are received at the Argos Local User Terminal in Edmonton and distributed on the GTS using the FM 14-VIII DRIBU code.

5. ARGOS service5.1 ARGOS monthly status report

As at 2 October 1991 the Argos service was handling reports from 745 drifting buoys, 189 moored buoys, 11 balloons, 32 ships, 148 animal trackings, 394 fixed stations, 434 boats and 45 miscellaneous platforms. DRIBU reports from 58 drifting buoys and BATHY reports from 21 selected ships were transmitted to the RTH Paris and DRIBU reports from 284 drifting buoys were transmitted to the WMC Washington for insertion into the GTS. The list of platforms reporting through Argos and distributed over the GTS follows:

7. Feed-back from Members to the Secretariat on any changes in the observing network

In view of the difficulties experienced at present in identifying non-implemented observing stations or implemented stations which are closed or suspended for a certain period, or stations making observations but not reaching their NMCs, the ninth session of the CBS Advisory Working Group recommended that a special table be added to the WWW monthly operational letter to serve as feed-back from Members to the Secretariat on any changes of the present state of implementation of observing programmes of SYNOP, TEMP and PILOT reporting stations.

The special table, accompanied by explanatory notes overleaf, is attached as an appendix to this annex. Members are urged to fill in this appendix, as and when appropriate, and to return it to the Secretariat before the 1st of each month to enable changes to be included in the next monthly letter.

Feed-back from Members to the Secretariat on any changes in the observing network
 (explanatory notes overleaf)

Global Exchange/Regional Exchange (delete as appropriate)

Country: _____

Station index number	Bulletin identification TTAAii CCCC	Implementation of observing programme								Alternate observing station	Remarks
		00	03	06	09	12	15	18	21		

1. SYNOP

2. TEMP

3. PILOT

Explanatory notes for Feed-back from Members to the Secretariat on any changes in the observing network

1. Separate tables should be prepared for global exchange and regional exchange respectively. These tables should contain information concerning any changes of the present state of implementation of observing programmes of SYNOP, TEMP and PILOT reporting stations given in Attachment I-4 of the Manual on the GTS, Volume I for global exchange and, as applicable, Attachments AF-I, AI-1, SA-1, NA-1, PS-1 and EU-1 of the Manual on the GTS, Volume II for regional exchange.
2. For entries in these tables, the following should be taken into account:
 - (a) In the column "Station index number", the index number (Iiiii) of each station should be entered in case of any changes in the observing programmes of the stations;
 - (b) In the column "Bulletin identification", the TTAAii CCCC of the abbreviated heading of the meteorological bulletins which contains reports from the station should be inserted;
 - (c) In the column "Implementation of observing programme", "X" for implementation and "-" for non-implementation should be inserted as appropriate. In order to easily identify changes in the programme, this should be marked in red;
 - (d) In the column "Alternate observing station", the index number (Iiiii) of an alternate observing station should be inserted in case another station is available with a view to filling gaps which are caused by suspension of observing programmes of the original station;
 - (e) The required information concerning the observing programme of the alternate station should be inserted in the next horizontal line of the original station;
 - (f) In the column "Remarks", reasons of temporary suspension of observing programmes and an expected date of resumption of the programmes should be given as far as possible. Non-standard collection and/or distribution times should also be included.
3. These tables should be sent to the Secretariat before the 1st of the month for inclusion of the changes in the monthly operational letter, as appropriate.

Annex III - Global Telecommunication System

Date: September 1991

A. GTS regulatory or guidance material

3. Amendments to the Manual on the Global Telecommunication System

Member countries expressed difficulties in implementing as from 1 November 1991 the parts of Resolution 4/2 (EC-XLIII) given in EC-XLIII/PINK 2, REV. 1, APPENDIX B relating to a new Table D (level designator ii) of Attachment II.5 (previously II.6) (data designators in abbreviated headings) of the Manual on the GTS. Considering these difficulties and after consultation with the President of CBS, the President of WMO approved to defer the implementation of those parts of the Resolution 4/2 (EC-XLIII) relating to a new Table D. Therefore, Table D at present in operation as given in the 1986 edition of the Manual on the GTS shall continue to be used pending the review of this question by CBS (and in particular its Working Group on the GTS) and any further decision on this matter.

C. Information on the operation of the GTS

1. Catalogue of Meteorological Bulletins (Publication No. 9, Volume C, Chapter I)

1.1 New bulletins

Notification from the Deutscher Wetterdienst that as a temporary measure, RTH Offenbach will insert into the GTS the following bulletins including SYNOP, TEMP and PILOT reports transmitted through a METEOSAT DCP from Kuwait:

SMKW01	EESA	USKW01	EESA	UPKW01	EESA
SIKW21	EESA	UKKW01	EESA	UGKW21	EESA
		ULKW01	EESA	UHKW01	EESA
		UEKW01	EESA	UQKW21	EESA

2. Transmission schedules (Publication No. 9, Volume C, Chapter II)

2.3 Changes in schedules/technical specifications

VI-iii Moskva radio-facsimile broadcasts delete the following charts:
Programme 1: at 0835 UTC, ASXX RUMS 97615
Programme 2: at 2035 UTC, AUXX RUMS 97756

Annex IV - Codes

Date: September 1991

B. Manual on Codes

1. Global practices

Notification from the WMO Secretariat that:

The new aeronautical codes and changes hereto contained in supplement No. 2 to The Manual on Codes - Volume I - are for use as from 1 July 1993. They will be subject to any agreed to improvements based on on-going ICAO consultations.

The following pages of the 1988 edition of Volume I of The Manual should therefore be retained for use until the implementation date of the new codes:

<u>Pages:</u>	I-A-49	to	I-A-60
	I-A-139	to	I-A-158
	I-D-79	to	I-D-83
	I-D-165	to	I-D-168

In the new supplement No. 2 (VII.1991) on pages I-A-164, I-A-175, I-A-183, I-D-80 and I-D-166 insert asterisks with a footnote similar to that for METAR and SPECI (*for use as from 1 July 1993) against each title of code forms: FM 51-IX EXT., FM 53-IX EXT., FM 54-IX EXT. and code tables 1864 and 4678. Note also that current specifications of CC will remain in force in Code Tables 0500, 1690 and 2700 until implementation of new METAR/SPECI.

In supplement No. 3 (VIII.1991) on page I-Bi-8, update content of octet No. 25 to read as follows:

Octet No.	Content
25	First two digits of the year eg. '19' (until 1 January 2000)

2. Regional practices

2.3 Changes to codes

This notification refers to amendments to regional coding procedures adopted by:

- (i) X-RA VI in Resolution 6 for FM 12-IX SYNOP, FM32-IX PILOT, FM 33-IX PILOT SHIP, FM 35-IX TEMP and FM 36-IX TEMP SHIP (to be implemented by Members effective 1 November 1991) see Abridged Final Report of the Tenth Session of RA-VI - WMO No. 736.
- (ii) X-RA I in Resolution 9 for Revised Code RF 1/02 AGRO are (to be implemented by Members effective 1 November 1991) see Abridged Final Report of the Tenth Session of RA-I - WMO.
- (iii) EC-XLIII, as annex to Resolution 15, modifications to FM 12-IX EXT SYNOP in Regulations 7/12.8 and 7/12.12.2 (to be implemented by Members effective 1 November 1991) in Antarctic, as indicated below : Standardization of regional cloud matters and prevailing wind reporting practice with global procedures:

Volume II - Manual on Codes

Chapter VII - The Antarctic

A-1 - INTERNATIONAL CODE FORMS, NOTES AND REGULATIONS

FM 12-IX SYNOP

(c) Section 3

Changes as follows (page II - 7 - A - 3):

7/12.8 Groups (5j₁j₂j₃j₄ (j₅j₆j₇j₈j₉))

7/12.8.1 In the form 5EEEi_E, 55SSSS (j₅F₂₄F₂₄F₂₄F₂₄), these groups shall be included at 0600 UTC by all stations capable of doing so.

7/12.8.2 In the form 56D_LD_MD_H, this group shall be included whenever the direction of movement of clouds reported for C_L C_M and/or C_H can be determined.

Add a new Regulation 7/12.12.2 and renumber Regulations 7/12.12.2 and 7/12.12.3 as follows (page II - 7 - A - 4):

7/12.12.2 A group 915dd shall be included in the report when the prevailing wind direction during the preceding 6 hours is significantly different from the current wind direction (e.g. a difference of 45° is considered significant).

7/12.12.3 A group 931ss shall be used, when appropriate, to report the depth of the snow freshly fallen since the last 0000 UTC observation and shall be included at 0000, 0600, 1200 and 1800 UTC when precipitation has occurred since the last 0000 UTC report.

7/12.12.4 Each time the phenomenon whiteout is observed, the appropriate group 9S_pS_pw₁w₁ shall be included.

Note: In the absence of hydrometeors and blowing snow, and with a completely overcast sky over an unbroken snow cover, contours of landscape may vanish because all shadows disappear and the horizon cannot be distinguished. This phenomenon is called whiteout.

It is also notified that as a result of changes to global regulations all regional coding practices for group SnFnFnFnFn and 55SSSS will change to 55SSSS (j₅F₂₄F₂₄F₂₄F₂₄) effective 1 November 1991, following Recommendation 13 of CBS EXT 90, amending Regulations: 12.4.7.1.1 to 12.4.7.4.5 of FM 12 - IX EXT SYNOP, the corresponding texts in the Manual on Codes, Volume II are given below :

REGION I - AFRICA

A-1 - INTERNATIONAL CODE FORMS, NOTES AND REGULATIONS

FM 12-IX SYNOP and FM 13-IX SHIP

(c) Section 3

Changes as follows (page II - 1 - A - 3):

1/12.10.1 In the form 5EEEi_E and 55SSSS (j₅F₂₄F₂₄F₂₄F₂₄), these groups shall be included at 0600 UTC by all stations capable of doing so.

Region II - ASIA

A-1 - INTERNATIONAL CODE FORMS, NOTES AND REGULATIONS

FM 12-IX SYNOP and FM 13-IX SHIP

(c) Section 3

Changes as follows (page II - 2 - A - 4):

- 2/12.12.2 (a) In the form 5EEE_E and 55SSS ($i_5F_{24}F_{24}F_{24}F_{24}$) these groups shall be included in synoptic reports by all stations where the corresponding measurements are carried out.
- (b) If these groups are included in the synoptic report, the values of EEE (evaporation or evapotranspiration), $i_5F_{24}F_{24}F_{24}F_{24}$ (amount of convection) and SSS (duration of sunshine) shall refer to the 24 hours preceding the observation time of that report.
- (c) Groups 5EEE_E and 55SSS ($i_5F_{24}F_{24}F_{24}F_{24}$) shall be transmitted at least once daily at one of the main observation times, preferable at 0000 UTC (the morning observation time over most of Region II).

Region III - SOUTH AMERICA

A-1 - INTERNATIONAL CODE FORMS, NOTES AND REGULATIONS

FM 12-IX SYNOP and FM 13-IX SHIP

(b) Section 3

Changes as follows (page II - 3 - A - 3 / 4):

- 3/12.9 Groups ($i_5i_1i_2i_3i_4$ ($i_5i_6i_7i_8i_9$))
- 3/12.9.1 These groups may be used in the Region in the form 5EEE_E, 55SSS ($i_5F_{24}F_{24}F_{24}F_{24}$), 56D_LD_MD_H, 57CD_ae_c and 58p₂₄p₂₄p₂₄ or 59p₂₄p₂₄p₂₄ as provided for under Regulation 12.4.7.
- 3/12.9.2 When data are available and it is appropriate to do so, these groups shall be included in the form 5EEE_E and 55SSS ($i_5F_{24}F_{24}F_{24}F_{24}$) at least once daily at one of the main observation times, preferable at 1200 UTC. SSS (duration of sunshine) shall be for the 24 hours of the calendar day immediately preceding the reporting time.

Region IV - NORTH AND CENTRAL AMERICA

A-1 - INTERNATIONAL CODE FORMS, NOTES AND REGULATIONS

FM 12-IX SYNOP and FM 13-IX SHIP

(b) Section 3

Changes as follows (page II - 4 - A - 3):

- 4/12.9.1 In the form 5EEE_E, 55SSS ($i_5F_{24}F_{24}F_{24}F_{24}$), these groups shall be included by all stations capable of doing so, when appropriate.

Region V - SOUTH-WEST PACIFIC

A-1 - INTERNATIONAL CODE FORMS, NOTES AND REGULATIONS

FM 12-IX SYNOP and FM 13-IX SHIP

(c) Section 3

Changes as follows (page 11 - 5 - A - 3):

- 5/12.10.1 In the form 5EEE_E, 55SSS ($j_5F_{24}F_{24}F_{24}F_{24}$), these groups shall be included by all stations capable of doing so at least once daily at either 0000, 0600 or 1200 UTC, whenever data are available

Region VI - EUROPE

A-1 - INTERNATIONAL CODE FORMS, NOTES AND REGULATIONS

FM 12-IX SYNOP and FM 13-IX SHIP

(b) Section 3

Changes as follows (page 11 - 6 - A - 4):

- 6/12.9.2 (a) In the form 5EEE_E, 55SSS ($j_5F_{24}F_{24}F_{24}F_{24}$), these groups shall be included by all stations carrying out the corresponding measurements.
- (b) If these groups are included, the values of EEE (evaporation or evapotranspiration) and $j_5F_{24}F_{24}F_{24}F_{24}$ (amount of radiation), shall be for the 24 hours preceding the observation time of the synoptic report, and SSS (duration of sunshine) shall be for the 24 hours of the calendar day immediately preceding the reporting time.
- (c) Groups 5EEE_E, 55SSS ($j_5F_{24}F_{24}F_{24}F_{24}$) shall be transmitted at least once daily at one of the main observation times, preferably at 0600 UTC (the morning observation time over most of Region VI).
