Subject : Monthly letter on the operation of the World Weather Watch (WWW) and Marine Meteorological Services (MMS) October 1991

Action required : To be noted and brought to the attention of appropriate operational units

Dear Sir/Madam,

As you are aware, all the information on changes to the operation of the World Weather Watch (WWW) and Marine Meteorological Services (MMS) is being assembled and distributed by the Secretariat on a monthly basis to facilitate updating and follow-up action.

In this connection, please find attached the annexes providing the latest operational information on WWW and MMS. Those items and sub-items for which information is provided are listed below:

Annex I - Global Observing System

C. Information on operational status of elements of the surface-based sub-system

1. Publication No. 9, Volume A - Stations

- 1.1 New stations
- 1.2 Deleted stations
- 1.3 Changes to existing stations

4. Automatic marine stations

5. ARGOS service

5.1 ARGOS monthly status report

7. Feed-back from Members to the Secretariat on any changes in the observing network

To: Permanent Representatives (or Directors of Meteorological or Hydro-meteorological Services) of Members of WMO (PR-4684)
Directors of Meteorological Services of non-Member countries (MC-2455)
Presidents and Vice-Presidents of Regional Associations (P.RA-1279)
Presidents and Vice-Presidents of Technical Commissions (P.TC-1397)
Chairmen of CBS Working Groups
Secretary-General of ICAO
Director-General of IATA
Secretary of IOC
Director-General of ASECNA
Director of ECMWF

Annex II - Global Data-processing System

- B. Information on operational status of GDPS including changes to WMO Publication No. 9 - Volume B
- 2. RSMC output products

Annex III - Global Telecommunication System

- C. Information on the operation of the GTS
- 1. Catalogue of Meteorological Bulletins (Publication No. 9, Volume C, Chapter I)
 - 1.3 Changes to bulletins
 - 1.5 Bulletins for oceanographic data

Annex IV - Codes

- B. Manual on codes
- 1. Global practices
- 1.3 Changes to codes

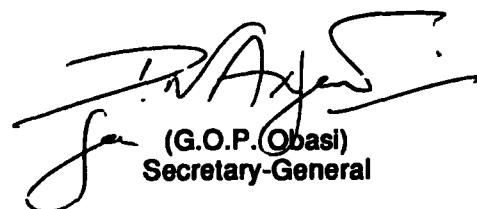

Annex V - Marine Meteorological Services (MMS) and related oceanographic activities

- C. Information on the operation of Marine Meteorological Services
- 1. Broadcasts for shipping and other marine activities (Publication No. 9, Volume D, Part A)
 - 1.3 Changes in schedules/technical specifications
- 2. Marine meteorological services available for main ports (Publication No. 9, Volume D, Part C₁)

The CBS Advisory Working Group recommended that a special table should be added to the monthly letter to report changes of the present status of implementation of observing programmes of SYNOP, TEMP and PILOT reporting stations. You will note, therefore, that a new item, number 7, "Feed-back from Members to the Secretariat on any changes in the observing network" has been added to Annex I - Global Observing System.

Your co-operation in ensuring that the above information reaches the appropriate operational units of your service is greatly appreciated. If you wish to receive additional copies of the monthly circular letter, please inform the Secretariat accordingly.

Yours faithfully,

(G.O.P. Obasi)
Secretary-General

Annex I - Global Observing System

Date: October 1991

C. Information on operational status of elements of the surface-based sub-system

1. Publication No. 9, Volume A - Stations

Notification from the Deutscher Wetterdienst that as from 1 November 1991 all synoptic stations in Germany will use block number 10. However, for those stations previously using block 09, parallel operations will be maintained under block 10 and block 09 until 31 March 1992 (see also Annex III).

4. Automatic marine stations

Canada

Data from moored and drifting buoys are collected via geostationary and polar orbiting satellites respectively. Meteorological reports from moored buoys using FM 13-IX SHIP code are distributed on the GTS from the Direct Readout Station located in Vancouver, B.C. Reports from drifting buoys are received at the Argos Local User Terminal in Edmonton and distributed on the GTS using the FM 14-VIII DRIBU code.

5. ARGOS service**5.1 ARGOS monthly status report**

As at 4 November 1991 the Argos service was handling reports from 726 drifting buoys, 190 moored buoys, 1 balloon, 28 ships, 126 animal trackings, 408 fixed stations, 354 boats and 39 miscellaneous platforms. DRIBU reports from 66 drifting buoys and BATHY reports from 25 selected ships were transmitted to the RTH Paris and DRIBU reports from 319 drifting buoys were transmitted to the WMC Washington for insertion into the GTS. The list of platforms reporting through Argos and distributed over the GTS follows:

7. Feed-back from Members to the Secretariat on any changes in the observing network

In view of the difficulties experienced at present in identifying non-implemented observing stations or implemented stations which are closed or suspended for a certain period, or stations making observations but not reaching their NMCs, the ninth session of the CBS Advisory Working Group recommended that a special table be added to the WWW monthly operational letter to serve as feed-back from Members to the Secretariat on any changes of the present state of implementation of observing programmes of SYNOP, TEMP and PILOT reporting stations.

The special table, accompanied by explanatory notes overleaf, is attached as an appendix to this annex. Members are urged to fill in this appendix, as and when appropriate, and to return it to the Secretariat before the 1st of each month to enable changes to be included in the next monthly letter.

Feed-back from Members to the Secretariat on any changes in the observing network
(explanatory notes overleaf)

Global Exchange/Regional Exchange (delete as appropriate)

Country: _____

Station index number	Bulletin identification TTAAii CCCC	Implementation of observing programme								Alternate observing station	Remarks
		00	03	06	09	12	15	18	21		

1. SYNOP

2. TEMP

3. PILOT

**Explanatory notes for
Feed-back
from Members to the Secretariat
on any changes in the observing network**

1. Separate tables should be prepared for global exchange and regional exchange respectively. These tables should contain information concerning any changes of the present state of implementation of observing programmes of SYNOP, TEMP and PILOT reporting stations given in Attachment I-4 of the Manual on the GTS, Volume I for global exchange and, as applicable, Attachments AF-I, AI-1, SA-1, NA-1, PS-1 and EU-1 of the Manual on the GTS, Volume II for regional exchange.
2. For entries in these tables, the following should be taken into account:
 - (a) In the column "Station index number", the index number (Iiiii) of each station should be entered in case of any changes in the observing programmes of the stations;
 - (b) In the column "Bulletin identification", the TTAII CCCC of the abbreviated heading of the meteorological bulletins which contains reports from the station should be inserted;
 - (c) In the column "Implementation of observing programme", "X" for implementation and "-" for non-implementation should be inserted as appropriate. In order to easily identify changes in the programme, this should be marked in red;
 - (d) In the column "Alternate observing station", the index number (Iii) of an alternate observing station should be inserted in case another station is available with a view to filling gaps which are caused by suspension of observing programmes of the original station;
 - (e) The required information concerning the observing programme of the alternate station should be inserted in the next horizontal line of the original station;
 - (f) In the column "Remarks", reasons of temporary suspension of observing programmes and an expected date of resumption of the programmes should be given as far as possible. Non-standard collection and/or distribution times should also be included.
3. These tables should be sent to the Secretariat before the 1st of the month for inclusion of the changes in the monthly operational letter, as appropriate.

Annex II - Global Data-processing System

Date: October 1991

B. Information on operational status of GDPS including changes to WMO Publication No. 9 - Volume B

2. RSMC output products

RSMC ECMWF

A higher resolution analysis and forecasting system at T213 31 levels was put into operation on 12 UTC 17 September 1991. The effective resolution in the free atmosphere is now around 100 km at half wavelength; in the vertical, the additional levels compared to the previous 19 level version are mainly in the mid and upper troposphere.

In addition to the change of resolution, the new model includes the following aspects:

- the gaussian grid used for the computation of the physics is now a quasi-regular gaussian grid, i.e. the number of grid points along a latitude circle decreases towards the poles in order that the spacing of the points be approximately the same on the whole globe. The grid spacing in the gaussian grid is approximately 60 km;
- several changes are made to the dynamics of the model, including use of a semi-Lagrangian advection scheme and modified horizontal diffusion;
- a new version of the cloud scheme is used, mainly to allow the stratiform clouds to form in any number of layers instead of the three layers in the previous version.

The generating process identification number of the GRIB coded products has been changed to 40.

Annex III - Global Telecommunication System

Date: October 1991

C. Information on the operation of the GTS

1. Catalogue of Meteorological Bulletins (Publication No. 9, Volume C, Chapter I)

1.3 Changes to bulletins

- (i) Notification from the National Weather Service of Papua New Guinea and the Australian Bureau of Meteorology that the upper-air observations carried out at 94014 Madang are now being disseminated globally on the GTS as follows:

Part A - Under the heading of USNG01 AMMC
Part B - Under the heading of UKNG01 AMMC
Part C - Under the heading of ULNG01 AMMC
Part D - Under the heading of UENG01 AMMC

- (ii) Notification from the Deutscher Wetterdienst that as from 1 November 1991 all synoptic stations in Germany will use block number 10. Reports from all stations will be disseminated under block number 10 with the geographical designator A₁A₂=DL in the abbreviated headings of bulletins and wind speed for all stations will be indicated in knots. In addition, as an interim measure until 31 March 1992, reports from synoptic stations previously using block number 09 will also be disseminated under block number 09 with the geographical designator A₁A₂=DD in the abbreviated headings of bulletins, but the wind speed will be indicated in knots.

1.5 Bulletins for oceanographic data

Following is the list of bulletins containing oceanographic data (T₁T₂=SO) and included in the Catalogue of meteorological bulletins:

SOAG01 SABM	SOVD01 CWIF	SOVD05 KWBC	SOVF01 BIRK
SOBZ01 SBBR	SOVD01 CWPF	SOVD06 KWBC	SOVF01 EGRR

			SOVX10 RUMS

Members are invited to check the list and to inform the Secretariat of any changes to be incorporated in the catalogue.

Annex IV - Codes

Date: October 1991

B. Manual on Codes

1. Global practices

1.3 Changes to codes

Notification from the ECMWF that with effect from 12 UTC on 6 November 1991, dissemination from ECMWF of GTS products in FM 92 GRIB will use the edition 1 of GRIB (i.e. FM 92-IX EXT) instead of edition 0 (i.e. FM 92-VIII EXT). This change is in conformity with the approval by the President of WMO of recommendation 22 of CBS-EXT (90).

Notification from the WMO Secretariat of the following updating of the information contained in:

a) the WWW Monthly Letter of 30 August 1991, Annex IV:

(i) Changes to codes

Reference is made to IWTC-II document for character letter indicators for ocean basins. That information, which was not available at the time, is as follows:

W	North-west Pacific Ocean
E	North-east Pacific Ocean to 140°E
C	North-east Pacific Ocean 140°E to 180°E
L	North Atlantic Ocean
A	North Arabian Sea
B	Bay of Bengal
S	South Indian Ocean
P	South Pacific Ocean
U	Australia
O	South China Sea
T	East China Sea

(ii) New Code Tables

Change first table to read: 0 08 005

b) the WWW Monthly Letter of 30 September 1991, Annex IV (English version only):

Global practices

Delete the proposal to update supplement No. 3 (VIII.1991) on Octet No. 25, as this proposal has been withdrawn.

Notification from the WMO Secretariat that as a delay in implementation of standard global code practice, until further notice, changes to the following codes to be introduced on 1 November 1991 will not be implemented by listed countries:

FM 35-IX EXT TEMP : Australia, Sweden and United Kingdom

FM 12-IX EXT SYNOP } France (all SYNOP code changes), Sweden and
FM 13-IX EXT SHIP } United Kingdom (Group 3P₀P₀P₀P₀ for low level stations)

Annex V - Marine Meteorological Services (MMS) and related oceanographic activities

Date: October 1991

C. Information on the operation of Marine Meteorological Services

1. Broadcasts for shipping and other marine activities (Publication No. 9, Volume D, Part A)

1.3 Changes in schedules/technical specifications

- Ai-I - Group A Martin de Vivies: effective 27.09.1991:
Replace 510 kHz by 472 kHz.
Add 400 W and 1 kW.
Area covered comprised between 60°E and 90°E and between 30°S and 50°S.
