Subject : Monthly letter on the operation of the World Weather Watch (WWW) and Marine Meteorological Services (MMS) November 1991

Action required : To be noted and brought to the attention of appropriate operational units

Dear Sir/Madam,

As you are aware, all the information on changes to the operation of the World Weather Watch (WWW) and Marine Meteorological Services (MMS) is being assembled and distributed by the Secretariat on a monthly basis to facilitate updating and follow-up action.

In this connection, please find attached the annexes providing the latest operational information on WWW and MMS. Those items and sub-items for which information is provided are listed below:

Annex I - Global Observing System

C. Information on operational status of elements of the surface-based sub-system

1. Publication No. 9, Volume A - Stations

- 1.1 New stations
- 1.2 Deleted stations
- 1.3 Changes to existing stations
- 1.5 Temporary changes

4. Automatic marine stations

7. Feed-back from Members to the Secretariat on any changes in the observing network

To: Permanent Representatives (or Directors of Meteorological or Hydro-meteorological Services) of Members of WMO (PR-4689)
Directors of Meteorological Services of non-Member countries (MC-2456)
Presidents and Vice-Presidents of Regional Associations (P.RA-1282)
Presidents and Vice-Presidents of Technical Commissions (P.TC-1399)
Chairmen of CBS Working Groups
Secretary-General of ICAO
Director-General of IATA
Secretary of IOC
Director-General of ASECNA
Director of ECMWF

Annex III - Global Telecommunication System**C. Information on the operation of the GTS**

1. Catalogue of Meteorological Bulletins (Publication No. 9, Volume C, Chapter I)
 - 1.3 Changes to bulletins

Annex IV - Codes**B. Manual on codes**

1. Global practices
 - 1.3 Changes to codes

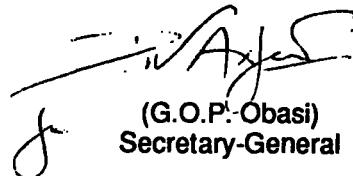

Annex V - Marine Meteorological Services (MMS) and related oceanographic activities**C. Information on the operation of Marine Meteorological Services**

1. Broadcasts for shipping and other marine activities (Publication No. 9, Volume D, Part A)
 - 1.3 Changes in schedules/technical specifications

The CBS Advisory Working Group recommended that a special table should be added to the monthly letter to report changes of the present status of implementation of observing programmes of SYNOP, TEMP and PILOT reporting stations. You will note, therefore, that a new item, number 7, "Feed-back from Members to the Secretariat on any changes in the observing network" has been added to Annex I - Global Observing System.

Your co-operation in ensuring that the above information reaches the appropriate operational units of your service is greatly appreciated. If you wish to receive additional copies of the monthly circular letter, please inform the Secretariat accordingly.

Yours faithfully,

J
 (G.O.P. Obasi)
 Secretary-General

Annex I - Global Observing System

1.5 Temporary changes

Notification from Australia that Western Australia will now implement daylight saving of one hour at 1800 UTC on 16 November 1991. Summer time will continue until 1700 UTC on 29 February 1992. Observation's procedures adopted during daylight saving and the period of daylight saving in all other Australian states, adjacent islands and Antarctic, remain unchanged.

4. Automatic marine stations

Canada

Data from moored and drifting buoys are collected via geostationary and polar orbiting satellites respectively. Meteorological reports from moored buoys using FM 13-IX SHIP code are distributed on the GTS from the Direct Readout Station located in Vancouver, B.C. Reports from drifting buoys are received at the Argos Local User Terminals in Edmonton and Toronto and distributed on the GTS using the FM 14-VIII DRIBU code.

7. Feed-back from Members to the Secretariat on any changes in the observing network

In view of the difficulties experienced at present in identifying non-implemented observing stations or implemented stations which are closed or suspended for a certain period, or stations making observations but not reaching their NMCs, the ninth session of the CBS Advisory Working Group recommended that a special table be added to the WWW monthly operational letter to serve as feed-back from Members to the Secretariat on any changes of the present state of implementation of observing programmes of SYNOP, TEMP and PILOT reporting stations.

The special table, accompanied by explanatory notes overleaf, is attached as an appendix to this annex. Members are urged to fill in this appendix, as and when appropriate, and to return it to the Secretariat before the 1st of each month to enable changes to be included in the next monthly letter.

Feed-back from Members to the Secretariat on any changes in the observing network
 (explanatory notes overleaf)

Global Exchange/Regional Exchange (delete as appropriate)

Country: _____

Station index number	Bulletin identification TTAAii CCCC	Implementation of observing programme								Alternate observing station	Remarks
		00	03	06	09	12	15	18	21		

1. SYNOP

2. TEMP

3. PILOT

**Explanatory notes for
Feed-back
from Members to the Secretariat
on any changes in the observing network**

1. Separate tables should be prepared for global exchange and regional exchange respectively. These tables should contain information concerning any changes of the present state of implementation of observing programmes of SYNOP, TEMP and PILOT reporting stations given in Attachment I-4 of the Manual on the GTS, Volume I for global exchange and, as applicable, Attachments AF-I, AI-1, SA-1, NA-1, PS-1 and EU-1 of the Manual on the GTS, Volume II for regional exchange.
2. For entries in these tables, the following should be taken into account:
 - (a) In the column "Station index number", the index number (IIii) of each station should be entered in case of any changes in the observing programmes of the stations;
 - (b) In the column "Bulletin identification", the TTAAii CCCC of the abbreviated heading of the meteorological bulletins which contains reports from the station should be inserted;
 - (c) In the column "Implementation of observing programme", "X" for implementation and "-" for non-implementation should be inserted as appropriate. In order to easily identify changes in the programme, this should be marked in red;
 - (d) In the column "Alternate observing station", the index number (IIii) of an alternate observing station should be inserted in case another station is available with a view to filling gaps which are caused by suspension of observing programmes of the original station;
 - (e) The required information concerning the observing programme of the alternate station should be inserted in the next horizontal line of the original station;
 - (f) In the column "Remarks", reasons of temporary suspension of observing programmes and an expected date of resumption of the programmes should be given as far as possible. Non-standard collection and/or distribution times should also be included.
3. These tables should be sent to the Secretariat before the 1st of the month for inclusion of the changes in the monthly operational letter, as appropriate.

Annex III - Global Telecommunication System

Date: November 1991

C. Information on the operation of the GTS

1. Catalogue of Meteorological Bulletins (Publication No. 9, Volume C, Chapter I)

1.3 Changes to bulletins

Notification from the Netherlands that the following changes will be introduced in the Catalogue of meteorological bulletins:

- a. As from 1200 UTC on 18 November 1991, SHIP reports will be added to the following meteorological bulletins:

**SMVF10 EHDB
SIVF20 EHDB
SNVF20 EHDB**

- b. As from 1200 UTC on 2 December 1991, the following new bulletins will be transmitted, as available, on the GTS:

**SMVA10 EHDB
SMVB10 EHDB
SMVC10 EHDB
SMVD10 EHDB
SMVE10 EHDB
SIVA20 EHDB
SIVB20 EHDB
SIVC20 EHDB
SIVD20 EHDB
SIVE20 EHDB**

Notification from New Zealand that as from 3 December 1991 at 0000 UTC and during the daylight saving time, the abbreviated headings of SYNOP meteorological bulletins will be changed as follows:

**SMNZ01 NZKL changed to: SNNZ01 NZKL
SINZ20 NZKL " "**

Annex IV - Codes

Date: November 1991

B. Manual on Codes

1. Global practices

1.3 Changes to codes

The President of CBS has approved the allocation of "reserved for allocation of radiosonde" entries in code tables 0 02 011 and 3685, for use with immediate effect for the following radiosonde types:

- In Volume I – Part B – Binary Codes

Code Table 0 02 011

Code figure	
46	AIR IS – 4A – 403

- In Volume I – Part A – Alphanumeric Codes

Code Table 3685

Code figure	
45	RS MSS
46	AIR IS – 4A – 403

Notification from the United States of America that implementation of changes to **Code FM 35-IX TEMP**, which came into force on 1 November 1991, will be delayed until 1 February 1992. Countries participating in the co-operative hurricane upper-air programme and receiving software support from the United States will experience a similar delay.

Notification from Spain that the implementation of changes to **Code FM 35-IX TEMP**, which came into force on 1 November 1991, will be delayed until February 1992.

Notification from Canada concerning amendments to **WMO Codes FM 35-IX TEMP** and **FM 36-IX TEMP SHIP** which came into force on 1 November 1991, to the effect that in general Canada does not report the following groups:

Part A	Section 2	925 hPa Standard Isobaric Surface
Part B	Section 1	Code a ₄ of YYGGa ₄ This is always encoded as '/'
Part B	Section 7	31313 s _r a _r a _s a _s a 8GGgg 9s _n T _w T _w T _w

As equipment changes are phased in, Canadian stations will begin to report these groups.

Annex V - Marine Meteorological Services (MMS) and related oceanographic activities

Date: November 1991

C. Information on the operation of Marine Meteorological Services

1. Broadcasts for shipping and other marine activities (Publication No. 9, Volume D, Part A)

1.3 Changes in schedules/technical specifications

Notification from Germany that effective 4 December 1991 at approximately 0630 UTC, the Offenbach (Main)/Pinneberg (DDH47/DDH9) Morse radio broadcast (A1A) for shipping will cease. At the same time a programme specially designed for shipping will be broadcast on mode RTTY (F1B, 50 bauds) on the same frequencies.
