Annexes: 4

Subject: Monthly letter on the operation of the World Weather Watch (WWW) and Marine Meteorological Services (MMS) – August 1992

Action required: To be noted and brought to the attention of appropriate operational units

Dear Sir/Madam,

As you are aware, all the information on changes to the operation of the World Weather Watch (WWW) and Marine Meteorological Services (MMS) is being assembled and distributed by the Secretariat on a monthly basis to facilitate updating and follow-up action.

In this connection, please find attached the annexes providing the latest operational information on WWW and MMS. Those items and sub-items for which information is provided are listed below:

ANNEX I – Global Observing System

C. Information on operational status of elements of the surface-based sub-system

1. Publication No. 9, Volume A - Stations
 - 1.1 New stations
 - 1.2 Deleted stations
 - 1.3 Changes to existing stations
 - 1.4 Changes in index numbers

To: Permanent Representatives (or Directors of Meteorological or Hydro-meteorological Services) of Members of WMO (PR-4783)
 Directors of Meteorological Services of non-Member countries (MC-2470)
 Presidents and Vice-Presidents of Regional Associations (P.RA-1300)
 Presidents and Vice-Presidents of Technical Commissions (P.TC-1418)
 Chairmen of CBS Working Groups
 Secretary-General of ICAO
 Director-General of IATA
 Secretary of IOC
 Director-General of ASECNA
 Director of ECMWF

ANNEX I – Global Observing System (cont.)

- C. Information on operational status of elements of the surface-based sub-system**
4. Automatic marine stations
 - 4.1 Canada
 - 4.1.1 Moored Buoys
 - 4.1.2 Drifting Buoys
 - 4.2 United States of America
 - 4.2.1 Moored Buoys
 - 4.2.2 Drifting Buoys
 - 4.3 France
 - 4.3.2 Drifting Buoys
 5. ARGOS service
 - 5.1 ARGOS monthly status report
 7. Feed-back from Members to the Secretariat on any changes in the observing network

ANNEX II – Global Data-processing System

- B. Information on the operational status of GDPS including changes to WMO Publication No. 9, Volume B**
2. RSMC output products
 - 2.1 New products

ANNEX III – Global Telecommunication System

- C. Information on the operation of the GTS**
1. Catalogue of Meteorological Bulletins (Publication No. 9, Volume C, Chapter I)
 - 1.3 Changes to bulletins
 - 1.5 Bulletins for oceanographic data
 6. Coastal Radio Stations (Publication No. 9, Volume D, Part B)
 - 6.3 Changes to existing stations

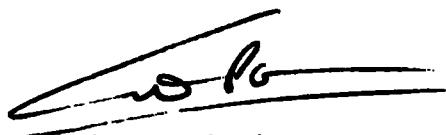

ANNEX V – Marine Meteorological Services (MMS) and related oceanographic activities

- C. Information on the operation of Marine Meteorological Services**
1. Broadcasts for shipping and other marine activities (Publication No. 9, Volume D, Part A)
 - 1.3 Changes in schedules/technical specifications

The CBS Advisory Working Group recommended that a special table should be added to the monthly letter to report changes of the present status of implementation of observing programmes of SYNOP, TEMP and PILOT reporting stations. You will note, therefore, that a new item, number 7, "Feed-back from Members to the Secretariat on any changes in the observing network" has been added to Annex I - Global Observing System.

Your co-operation in ensuring that the above information reaches the appropriate operational units of your service is greatly appreciated. If you wish to receive additional copies of the monthly circular letter, please inform the Secretariat accordingly.

Yours faithfully,

(G.O.P. Obasi)
Secretary-General

ANNEX I - Global Observing System

1.4 Changes in index numbers

- Notification from Finland

That the Finnish Meteorological Institute wishes to inform us that the additional station index numbers 700 to 799 allocated to Finland will become effective on 1 July 1993, however, they will not be renumbering all their station index numbers as previously advised.

For further information refer to the April 1992 Monthly Letter.

4. Automatic marine stations

4.1 Canada

Data from moored and drifting buoys are collected via geostationary and polar orbiting satellites respectively. Meteorological reports from moored buoys using FM 13-IX SHIP code are distributed on the GTS from the Direct Readout Station located in Vancouver, B.C. Reports from drifting buoys are received at the ARGOS Local User Terminals in Edmonton and Toronto and distributed on the GTS using the FM 18-IX DRIFTER code.

Legend - Observed or technical parameters

4.2 United States of America

List of U.S.A. Ocean Data Acquisition System (ODAS) included in the August 1992 Data Platform Status Report of the Data Buoy Centre of the National Oceanic and Atmospheric Administration (NOAA). Data from moored buoys and platforms are collected by geostationary meteorological satellites and reports are distributed on the GTS in SHIP code. Data from drifting buoys are collected by the ARGOS system and distributed on the GTS in DRIFTER code.

4.3 France

Data from drifting buoys are collected by the ARGOS system. They are distributed on the GTS in DRIFTER code, either from CLS/ARGOS in Toulouse (heading SSVX01 LFPW), or from the Centre de Météorologie Marine in Brest (headings SSVX51 and SSVX55 LFPW).

Legend - Observed or technical parameters

Column	Parameters	Column	Parameters
1	Wind direction and speed	6	Wave period and height
2	Air temperature	7	Wave spectra
3	Air pressure	8	Peak wind gust
4	Pressure tendency	9	Subsurface temperatures
5	Sea-surface temperature

5. ARGOS service

5.1 ARGOS monthly status report

As at 3 August 1992 the ARGOS service was handling reports from 925 drifting buoys, 270 moored buoys, 4 balloons, 30 ships, 248 animal trackings, 381 fixed stations, 394 boats and 69 miscellaneous platforms. DRIFTER reports from 72 drifting buoys and BATHY reports from 26 selected ships were transmitted to the RTH Paris and DRIFTER reports from 412 drifting buoys were transmitted to the WMC Washington for insertion into the GTS. The list of platforms reporting through ARGOS and distributed over the GTS follows:

XBT SOFTWARE

To improve the operability and the reliability of the XBT PTT's software processing, we have been conducting a series of modifications. At present we are in a validation phase and the results are very promising. However, due to an error in the declaration of the bulletins' header leading to their non-distribution onto the GTS, we regret the loss of the XBT bulletins for the period July 17 to July 21. In the meantime, users accessing the Argos on-line distributions have been able to read these bulletins. Eager to do our best to serve you, CLS has immediately strengthened the validation procedures for the XBT software so that such incidents don't happen again.

7. Feed-back from Members to the Secretariat on any changes in the observing network

In view of the difficulties experienced at present in identifying non-implemented observing stations or implemented stations which are closed or suspended for a certain period, or stations making observations but not reaching their NMCs, the ninth session of the CBS Advisory Working Group recommended that a special table be added to the WWW monthly operational letter to serve as feed-back from Members to the Secretariat on any changes of the present state of implementation of observing programmes of SYNOP, TEMP and PILOT reporting stations.

The special table, accompanied by explanatory notes (see Appendix, pages 1 and 2) is attached as an appendix to this annex. Members are urged to fill in this appendix, as and when appropriate, and to return it to the Secretariat before the 1st of each month to enable changes to be included in the next monthly letter.

Feed-back from Members to the Secretariat on any changes in the observing network

(Explanatory Notes overleaf)

Global Exchange / Regional Exchange (delete as appropriate)

Country: _____

Station index number	Bulletin identification TTAAii CCCC	Implementation of observing programme								Alternate observing station	Remarks
		00	03	06	09	12	15	18	21		

1. SYNOP

2. TEMP

3. PILOT

**Explanatory notes for
Feed-back
from Members to the Secretariat
on any changes in the observing network**

1. Separate tables should be prepared for global exchange and regional exchange respectively. These tables should contain information concerning any changes of the present state of implementation of observing programmes of SYNOP, TEMP and PILOT reporting stations given in Attachment I-4 of the Manual on the GTS, Volume I for global exchange and, as applicable, Attachments AF-I, AI-1, SA-1, NA-1, PS-1 and EU-1 of the Manual on the GTS, Volume II for regional exchange.
2. For entries in these tables, the following should be taken into account:
 - (a) In the column "Station index number", the index number (Iiiii) of each station should be entered in case of any changes in the observing programmes of the stations;
 - (b) In the column "Bulletin identification", the TTAAii CCCC of the abbreviated heading of the meteorological bulletins which contains reports from the station should be inserted;
 - (c) In the column "Implementation of observing programme", "X" for implementation and "-" for non-implementation should be inserted as appropriate. In order to easily identify changes in the programme, this should be marked in red;
 - (d) In the column "Alternate observing station", the index number (Iii) of an alternate observing station should be inserted in case another station is available with a view to filling gaps which are caused by suspension of observing programmes of the original station;
 - (e) The required information concerning the observing programme of the alternate station should be inserted in the next horizontal line of the original station;
 - (f) In the column "Remarks", reasons of temporary suspension of observing programmes and an expected date of resumption of the programmes should be given as far as possible. Non-standard collection and/or distribution times should also be included.
3. These tables should be sent to the Secretariat before the 1st of the month for inclusion of the changes in the monthly operational letter, as appropriate.

ANNEX II - Global Data-processing System

Date: August 1992

B. Information on the operational status of GDPS including changes to WMO Publication No. 9, Volume B

2. RSMC output products

2.1 New products

• Notification from Japan

That RSMC Tokyo - Typhoon Center is currently issuing five products (advisory for analysis, advisory for forecast, prognostic reasoning, guidance for forecast by numerical typhoon model and SAREP) for a tropical cyclone of TS intensity or higher in the area of responsibility of the center (north of the equator and west of the international date line). Furthermore, effective 00 UTC on 1 July 1992, the products will cover a tropical cyclone that is expected to reach TS intensity within 24 hours in the area and a tropical cyclone of TS intensity or higher that is expected to move into the area within 24 hours.

At the same time, the products of advisory for analysis and advisory for forecast will be integrated to a product entitled tropical cyclone advisory. In this regard, abbreviated headings and formats of products on the GTS will be amended. Detailed description of those changes is given below.

Effective 10 March 1992, the products of advisory for analysis, advisory for forecast (as from 1 July 1992, tropical cyclone advisory) and prognostic reasoning are put onto the GTS 70 to 90 minutes after individual main synoptic hours (00, 06, 12 and 18 UTC), about 90 minutes earlier than previous issuing (2 hours 45 minutes).

At 0000 UTC 1 July 1992, the RSMC Tokyo - Typhoon Center revises its products as follows:

◆ Rearrangement of Products and Abbreviated Headings

PRESENT		RENEWED		
Product	Abbreviated Heading		Product	Abbreviated Heading
Advisory for Analysis	(WTPQ20 RJTD)	(Advisory for Analysis) (and Advisory for Forecast are abolished) (and Tropical Cyclone) → (Advisory is newly provided, which includes information on preceding two products)	Tropical Cyclone Advisory*	(WTPQ20 RJTD) (WTPQ21 RJTD) (WTPQ22 RJTD) (WTPQ23 RJTD) (WTPQ24 RJTD) (WTPQ25 RJTD)
Advisory for Forecast	(WTPQ21 RJTD)			
Prognostic Reasoning	(WTPQ22 RJTD)		Prognostic Reasoning*	(WTPQ30 RJTD) (WTPQ31 RJTD) (WTPQ32 RJTD) (WTPQ33 RJTD) (WTPQ34 RJTD) (WTPQ35 RJTD)
Guidance for Forecast by Numerical Typhoon Model	(WTPQ23 RJTD)		Guidance for Forecast by Numerical Typhoon Model*	(FXPQ20 RJTD) (FXPQ21 RJTD)

* Each of these products deals with one tropical cyclone in one bulletin. The same heading is consistently used for the same tropical cyclone

◆ Revision of Code Forms

Code Form of Tropical Cyclone Advisory:

WTPQ ii RJTD YYGGgg
RSMC TROPICAL CYCLONE ADVISORY
NAME class ty-No. name (common-No.)
ANALYSIS

48HF Y₂Y₂G₂g₂g₂ UTC L_aL_a.L_aN L_oL_oL_o.L_oE (or W) F_rF_rF_rNM=

Notes:

- a. Underlined parts are fixed.
- b. Symbolic letters and their meaning:
 - ii : 20, 21, 22, 23, 24 or 25
 - YY : Day of the month (UTC) of observation of data used for the analysis.
 - GGgg : Time of observation of data used for the analysis, in hours and minutes in UTC
 - class : Classification of the tropical cyclone; TY, STS, TS, TD or LOW
 - ty-No. : Domestic Identification Number of the tropical cyclone used in Japan, in four digits (equal to International Identification Number)
 - name : Name assigned to the tropical cyclone by JTWC (Joint Typhoon Warning Center, Guam)
 - common-No. : International Identification Number of the tropical cyclone, in four digits
 - L_aL_aL_a : Latitude of center position (analysis or forecast)
 - L_oL_oL_oL_o : Longitude of center position (analysis or forecast)
 - accuracy : Accuracy of center position; GOOD, FAIR OR POOR
 - direction : Direction of movement; N, NNE, NE, ENE or (16 directions)
 - S_pS_pS_p : Speed of movement (analysis or forecast)
 - P_rP_rP_rP_r : Central pressure (analysis or forecast)
 - V_mV_mV_m : Maximum sustained wind (analysis or forecast)
 - R_dR_dR_d : Radii of 30 knot and 50 knot winds.
 - octant : NORTH, NORTHEAST, EAST OR (8 directions)
 - Y₁Y₁ : Day of the month (UTC) on which the 24-hour forecast is valid
 - G₁g₁g₁g₁ : Time at which the 24-hour forecast is valid, in hours and minutes UTC
 - F_rF_rF_r : Radii of 60% Probability Circle
 - Y₂Y₂ : Day of the month (UTC) on which the 48-hour forecast is valid
 - G₂g₂g₂g₂ : Time at which the 48-hour forecast is valid, in hours and minutes UTC
- c. MOVE is optionally described by "ALMOST STATIONARY" or "(direction) SLOWLY" depending on the cyclone's movement.

◆ Revision of Code Forms (continued)

New Code Form of Guidance for Forecast by Numerical Typhoon Model

EXPO ii RJTD YYGGgg

RSMC GUIDANCE FOR FORECAST

NAME class ty-No. name (common-No.)

PSTN YYGGggUTC L_aL_a.L_aN L_oL_oL_o.L_oE (or W)

NWP TYPHOON MODEL (TYM or MNG)

T=12 L_aL_a.L_aN L_oL_oL_o.L_oE (or W)

T=24 L_aL_a.L_aN L_oL_oL_o.L_oE (or W)

T=36 L_aL_a.L_aN L_oL_oL_o.L_oE (or W)

T=48 L_aL_a.L_aN L_oL_oL_o.L_oE (or W)

T=60 L_aL_a.L_aN L_oL_oL_o.L_oE (or W)

Note:

- a. Symbolic letters and their meaning:

ii	: 20 or 21
YY	: Day of the month (UTC) of initial time
GGgg	: Initial time, in hours and minutes UTC
TYM	: Typhoon Model
MNG	: Movable Nesting Grid Model

See "Code Form of Tropical Cyclone Advisory" for the remaining symbolic letters

New Code Form of SAREP

TPPW ii RJTD YYGGgg

CCAA YYGGg 47644 name of cyclone n_nL_aL_a Q_cL_oL_oL_o 1AtWfattm

2S_tS_t/L (9d_sd_sf_sf_s)=

Notes:

- a. Symbolic letters and their meaning:

ii	: 20 or 21
name of cyclone	: Name assigned to the tropical cyclone by JTWC with an International Identification Number followed in brackets. But for assignment, it is indicated by "NAMELESS"
n _n	: Serial number of the tropical cyclone in temporal order of formation in the year regardless of attaining TS intensity, from 01 to 99

- b. See FM 85-IX SAREP, Volume 1 of the Manual on Codes, WMO Technical Regulations for further explanation of the code form

◆ Earlier Start of the Products Issuance

Tropical Cyclone Advisory, Prognostic Reasoning, Guidance for Forecast by Numerical Typhoon Model and SAREP are issued when a tropical cyclone is expected to reach TS intensity within 24 hours, or a tropical cyclone of TS intensity or higher is expected to move into the area of responsibility of the RSMC Tokyo - Typhoon Center within 24 hours.

- **Notification from the United Kingdom of Great Britain and Northern Ireland**

That a list of new numerical products is available from RSMC Bracknell:

- ◆ **Global products in GRIB code (FM92-IX Ext)**

Heading format	:	HT ₂ A ₁ A ₂ ii EGRR
Data times	:	0000 and 1200 UTC
Available about	:	0500 and 1700 UTC

ELEMENTS (T ₂) and levels (ii)	:	Sea level pressure (P) and 10m wind components (U,V), ii=98 Height (H), wind components (U,V) and temperature (T) at 1000, 850, 700, 500, 400, 300, 250, 200, 150, 100, 50 hPa ii=99, 85, 70, 50, 40, 30, 25, 20, 15, 10, 05 Relative humidity (R) 850, 700, 500 hPa ii=85, 70, 50 Maximum wind components (U,V) and pressure (P) ii=96 Tropopause pressure (P) and temperature (T) ii=97
--	---	--

Resolution (deg. lat.-long.)	Areas (A1)	
2.5 x 2.5	S,T,U : 0-90°N	50°W-70°E, 70°E-170°W, 170°W-50°W
	V,W,X : 90°S-0	50°W-70°E, 70°E-170°W, 170°W-50°W
	Z : 60°S-60°N	30°W-60°E

Forecast times (A ₂)	:	All elements: T+0, 6, 12, 18, 24, 30, 36, 42, 48, 60 (A-J) Sea level pressure, 1000 hPa and 500 hPa height: T+72, 96, 120 (K, M, O)
----------------------------------	---	---

Abbreviated Headings:	HP	(S-X,Z) (A-J,K,M,O) 98
	H(U,V)	(S-X,Z) (A-J,K) 98
	H(H,U,V,T)	(S-X,Z) (A-J) (98,85,70,50,40,30,25,20,15,10,05)

	H(P,T)	(S-X,Z) (A-J) 97

Note: Wind components are eastbound (U) and northbound (V)

♦ **New set of GRIB products from Bracknell at 2.5°x2.5° resolution**

Bulletins are coded in GRIB FM92 IX Ext.

GRIB coded products, in the Code Form FM92 IX Ext. are now available from RSMC Bracknell in a 2.5°x2.5° resolution on a latitude/longitude grid. Six bulletin areas cover the whole globe, three each in the Northern and Southern Hemispheres, in steps of 120 degrees longitude, starting at 50°W. These areas have been chosen to allow many National Meteorological Services to use only a single bulletin without having to merge bulletins. For the same reason, a seventh bulletin has been chosen to cover all of Africa and Europe up to 60°N.

Bulletins should be requested through GTS links to Bracknell.

<u>New grid area locations</u>						
Grid Area code A1	Octet 7 PDB	Resolution (Long. x Lat.)	Area Coverage	Grid cols	Shape rows	Grid points
S	14	2.5 X 2.5	50°W-70°E, 0-90°N	37	49	1813
T	15	2.5 X 2.5	70°E-170°W, 0-90°N	37	49	1813
U	16	2.5 X 2.5	170°W-50°W, 0-90°N	37	49	1813
V	17	2.5 X 2.5	50°W-70°E, 90°S-0	37	49	1813
W	18	2.5 X 2.5	70°E-170°W, 90°S-0	37	49	1813
X	19	2.5 X 2.5	170°W-50°W, 90°S-0	37	49	1813

ANNEX III - Global Telecommunication System

Date: August 1992

C. Information on the operation of the GTS

1. Catalogue of Meteorological Bulletins (Publication No. 9, Volume C, Chapter I)

1.3 Changes to bulletins

- Notification from Norway**

That as from 15 August 1992 meteorological bulletins SSNT13 ENMI and SSNT14 ENMI containing buoy data processed by the Local User Terminal (LUT) in Oslo will be replaced by the meteorological bulletin: SSVX01 ENMI.

- Notification from France**

That French bulletins disseminated over the GTS as from 7 September 1992 at 1200 UTC will include in the abbreviated heading TTAAii CCCC the indicator ii with 2 digits.

- Notification from the Russian Federation**

That as from 1 October 1992 the synoptic reports from station 30054 VITIM transmitted over the GTS will be included in bulletins SMRA14 of RUHB and SIRA24 of RUHB. On the same date, the inclusion of the same reports in bulletins RMRA15 of RUNW and SIRA25 of RUNW will be discontinued.

1.5 Bulletins for oceanographic data

Corrigendum to the July 1992 Monthly Letter, read SOVE10 RUHB instead of SOVF01 RUHB

Abbreviated Headings
SOVE10 RUHB
