

# OPERATIONAL NEWSLETTER

## OPERATION OF THE WORLD WEATHER WATCH AND MARINE METEOROLOGICAL SERVICES

Volume 1993 — No. 7

**ANEROID BAROMETER**  
*(measurement of atmospheric pressure)*

Cover picture: A typical mechanism of an aneroid barometer. The mechanism of an aneroid barometer often takes the form shown on the cover picture. When the pressure of the atmosphere on the capsule (1) decreases, the spring (2) relaxes and the capsule expands and moves the arm (3) upwards. This arm, through the connecting link (4) rotates the rocking bar (5). A projecting arm (6) on the rocking bar moves towards the centre allowing the hairspring (7) to contract and wind the arbor chain (8) upon the pulley (9), and thus to move the pointer. A screw in the base plate enables the position of the carriage to be adjusted slightly and thus the zero to be altered.

HMSO — "Handbook of Meteorological Instruments"

The WMO Secretariat would like to express its appreciation to all those who have contributed material to the OPERATIONAL NEWSLETTER.

FOREWORD .....	iii
----------------	-----

◆ ANNEX I — GLOBAL OBSERVING SYSTEM

C. Information on operational status of elements .....	1-20
of the surface-based sub-system	
1. Publication No. 9, Volume A - Stations .....	1
1.1 New stations.....	1
1.3 Changes to existing stations.....	1
1.5 Temporary changes.....	1
4. Automatic marine stations .....	2-5

C. Information on the operation of the GTS .....	1
2. Transmission schedules (Publication No. 9, Volume C, Chapter II) .....	1
2.3 Changes in schedules/technical specifications.....	1

◆ ANNEX V — MARINE METEOROLOGICAL SERVICES (MMS) AND RELATED OCEANOGRAPHIC ACTIVITIES

C. Information on the operation of Marine Meteorological Services .....	1
1. Broadcasts for shipping and other marine activities .....	1
(Publication No. 9, Volume D, Part A)	

## FOREWORD

As you are aware, all the information on changes to the operation of the World Weather Watch (WWW) and Marine Meteorological Services (MMS) is being assembled and distributed by the Secretariat on a monthly basis to facilitate updating and follow-up action. In this connection we have created the "OPERATIONAL NEWSLETTER" to provide you with the latest operational information on WWW and MMS.

The CBS Advisory Working Group recommended that a special table should be added to the "OPERATIONAL NEWSLETTER" to report changes of the present status of implementation of observing programmes of SYNOP, TEMP and PILOT reporting stations. You will note, therefore, that an item, 'Feed-back from Members to the Secretariat on any changes in the observing network' has been added to Annex I - Global Observing System.

Your co-operation in ensuring that the above information reaches the appropriate operational units of your service is greatly appreciated.

(G.O.P. Obasi)  
Secretary-General

## C. INFORMATION ON OPERATIONAL STATUS OF ELEMENTS OF THE SURFACE-BASED SUB-SYSTEM

### 1. Publication No. 9, Volume A - Stations

#### 1.1 New stations

#### 1.5 Temporary changes

- Notification from Zambia

That pilot observations at stations: 67441 Mwinilunga, 67561 Ndola and 67743 Livingstone have been suspended for an indefinite period.

- Notification from Uzbekistan

That due to lack of expendables, as from 2 July 1993, radiosonde/radiowind observations are being discontinued at stations: 38606 Kokand and 38927 Termez and are being carried out only once a day at station: 38457 Tashkent.

#### 4. Automatic marine stations

##### 4.2 United States of America

List of U.S.A. Ocean Data Acquisition System (ODAS) included in the July 1993 Data Platform Status Report of the Data Buoy Centre of the National Oceanic and Atmospheric Administration (NOAA). Data from moored buoys and platforms are collected by geostationary meteorological satellites and reports are distributed on the GTS in SHIP code. Data from drifting buoys are collected by the ARGOS system and distributed on the GTS in DRIFTER code.

###### Legend - Observed or technical parameters

Column	Parameters	Column	Parameters
1	Wind direction and speed	5	Sea-surface temperature
2	Air temperature	6	Wave period and height
3	Air pressure	7	Wave spectra
4	Pressure tendency	8	Peak wind gust

##### 4.2.1 Moored Buoys

## 8. Feed-back from Members to the Secretariat on any changes in the observing network

In view of the difficulties experienced at present in identifying non-implemented observing stations or implemented stations which are closed or suspended for a certain period, or stations making observations but not reaching their NMCs, the ninth session of the CBS Advisory Working Group recommended that a special table be added to the WWW monthly "OPERATIONAL NEWSLETTER" to serve as feed-back from Members to the Secretariat on any changes of the present state of implementation of observing programmes of SYNOP, TEMP and PILOT reporting stations.

The special table, accompanied by explanatory notes (see Appendix, pages 1 and 2) is attached as an appendix to this annex. Members are urged to fill in this appendix, as and when appropriate, and to return it to the Secretariat before the 1st of each month to enable changes to be included in the next "OPERATIONAL NEWSLETTER".

## **Feed-back from members to the Secretariat on any changes in the observing network**

**(Explanatory Notes overleaf)**

### **Global Exchange/Regional Exchange (delete as appropriate)**

**Country:** \_\_\_\_\_

---

## EXPLANATORY NOTES

### Feed-back from Members to the Secretariat on any changes in the observing network

1. Separate tables should be prepared for global exchange and regional exchange respectively. These tables should contain information concerning any changes of the present state of implementation of observing programmes of SYNOP, TEMP and PILOT reporting stations given in Attachment I-4 of the Manual on the GTS, Volume I for global exchange and, as applicable, Attachments AF-I, AI-1, SA-1, NA-1, PS-1 and EU-1 of the Manual on the GTS, Volume II for regional exchange.
  
2. For entries in these tables, the following should be taken into account:
  - (a) In the column "Station index number", the index number (IIii) of each station should be entered in case of any changes in the observing programmes of the stations;
  - (b) In the column "Bulletin identification", the TTAaaii CCCC of the abbreviated heading of the meteorological bulletins which contains reports from the station should be inserted;
  - (c) In the column "Implementation of observing programme", "X" for implementation and "-" for non-implementation should be inserted as appropriate. In order to easily identify changes in the programme, this should be marked in red;
  - (d) In the column "Alternate observing station", the index number (IIii) of an alternate observing station should be inserted in case another station is available with a view to filling gaps which are caused by suspension of observing programmes of the original station;
  - (e) The required information concerning the observing programme of the alternate station should be inserted in the next horizontal line of the original station;
  - (f) In the column "Remarks", reasons of temporary suspension of observing programmes and an expected date of resumption of the programmes should be given as far as possible. Non-standard collection and/or distribution times should also be included.
  
3. These tables should be sent to the Secretariat before the 1st of the month for inclusion of the changes in the monthly "OPERATIONAL NEWSLETTER", as appropriate.

## ANNEX III - GLOBAL TELECOMMUNICATION SYSTEM

---

### C. INFORMATION ON THE OPERATION OF THE GTS

#### 2. Transmission schedules (Publication No. 9, Volume C, Chapter II)

##### **2.3 Changes in schedules/technical specifications**

- **Notification from Germany**

C-VI-iii-12-1/14 — Offenbach/Main-Mainflingen, Programme 1 (DCF 54), radio-facsimile broadcast effective 1 July 1993 changes.

## ANNEX V - MARINE METEOROLOGICAL SERVICES (MMS) AND RELATED OCEANOGRAPHIC ACTIVITIES

---

### C. INFORMATION ON THE OPERATION OF MARINE METEOROLOGICAL SERVICES

#### 1. Broadcasts for shipping and other marine activities (Publication No. 9, Volume D, Part A)

##### **1.3 Changes to existing stations**

- **Notification from Germany**

D-Ajj-VI-12-1/14 — Offenbach/Main-Mainflingen, Programme 1 (DCF 54), radio-facsimile broadcast effective 1 July 1993 changes.

D-Ajj-VI-12-23/27 — Offenbach(Main)-Hamburg/Pinneberg (DDH3, DDK3, DDK6), radio-facsimile broadcast for shipping, effective 1 July 1993 changes.
