

# **OPERATIONAL**

*newsletter*

Volume 1994 — No. 8

(August 1994)

World Meteorological Organization  
GENEVA

The WMO Secretariat would like to express its  
appreciation to all those who have contributed material  
to the "Operational Newsletter". ■

# Foreword

As you are aware, all the information on changes to the operation of the World Weather Watch (WWW) and Marine Meteorological Services (MMS) is being assembled and distributed by the Secretariat on a monthly basis to facilitate updating and follow-up action. In this connection we have created the "OPERATIONAL NEWSLETTER" to provide you with the latest operational information on WWW and MMS.

A special table is included in the "OPERATIONAL NEWSLETTER" in Annex I - *Global Observing System* to assist Members in reporting changes in the present status of implementation of observing programmes of SYNOP, TEMP and PILOT reporting stations.

Your co-operation in ensuring that the above information reaches the appropriate operational units of your service is greatly appreciated.

(G.O.P. Obasi)  
Secretary-General

FOREWORD.....iii

## Annex I

### GLOBAL OBSERVING SYSTEM

C. Information on operational status of elements of the surface-based sub-system .....	1
1. Publication No. 9, Volume A - Stations .....	1
1.1 New stations.....	1
1.2 Deleted stations .....	2
1.3 Changes to existing stations.....	2
4. Automatic Marine Stations.....	4
4.3 United States of America.....	4
4.3.1 Moored Buoys .....	4
4.3.2 Drifting Buoys.....	7
4.4 France.....	8
4.4.2 Drifting Buoys .....	8
5. ARGOS service.....	8
5.1 ARGOS monthly status report .....	8
•Reports handled by ARGOS Service.....	8
•Reports for insertion into the GTS.....	9
•GTS coding statistics of platforms reporting through ARGOS and distributed over the GTS.....	9
8. Feed-back from Members to the Secretariat on any changes in the observing network .....	9
Appendix I	
•Feed-back from Members to the Secretariat on any changes in the observing network .....	11
•Explanatory Notes.....	12

# Contents

---

## Annex III

### GLOBAL TELECOMMUNICATION SYSTEM

<b>C. Information on the operation of the GTS.....</b>	<b>13</b>
<b>1. Catalogue of Meteorological Bulletins (Publication No. 9, Volume C, Chapter I).....</b>	<b>13</b>
1.3 Changes to bulletins .....	13
<b>2. Transmission schedules (Publication No. 9, Volume C, Chapter II).....</b>	<b>13</b>
2.3 Changes in schedules/technical specifications.....	13

## Annex V

### MARINE METEOROLOGICAL SERVICE (MMS) AND RELATED OCEANOGRAPHIC ACTIVITIES SYSTEM

<b>C. Information on the operation of marine meteorological services.....</b>	<b>15</b>
<b>1. Broadcasts for shipping and other marine activities (Publication No. 9, Volume D, Part A).....</b>	<b>15</b>
1.3 Changes in schedules/technical specifications.....	15

### ORDER FORM

## Annex I

# GLOBAL OBSERVING SYSTEM

### C. INFORMATION ON OPERATIONAL STATUS OF ELEMENTS OF THE SURFACE-BASED SUB-SYSTEM

#### 1. PUBLICATION NO. 9, VOLUME A - STATIONS

##### 1.1 New stations

#### 4. AUTOMATIC MARINE STATIONS

KEY: Observed or Technical Parameters

Column	Parameters
1	Wind direction and speed
2	Air temperature
3	Air pressure
4	Pressure tendency
5	Sea-surface temperature
6	Wave period and height
7	Wave spectra
8	Peak wind gust

Column	Parameters
9	Subsurface temperatures
10	Relative humidity
11	Visibility
-	Parameter not observed
X	Buoy observes this parameter
.	Data under evaluation, not reported

#### 4.3 United States of America

List of U.S.A. Ocean Data Acquisition System (ODAS) included in the August 1994 Data Platform Status Report of the Data Buoy Centre of the National Oceanic and Atmospheric Administration (NOAA). Data from moored buoys and platforms are collected by geostationary meteorological satellites and reports are distributed on the GTS in SHIP code. Data from drifting buoys are collected by the ARGOS system and distributed on the GTS in DRIFTER code.

##### 4.3.1 Moored Buoys

**5. ARGOS SERVICE****5.1 ARGOS monthly status report**

Date of statistics computation : 1 August 1994

•Reports handled by ARGOS Service (list of monthly collected  
ARGOS platforms sorted by type of platform)

Drifting Buoys	:	1113
Boats (<20 knots)	:	0
Marine Stations	:	9
Moored Buoys	:	315
Fixed Stations	:	382
Terrestrial Animals	:	95
Marine Animals	:	100
Birds	:	56
Balloons	:	4
TOTAL	:	2074

**C. Information on the operational status of elements of the surface-based sub-system (continued)****5. ARGOS service / 5.1 ARGOS monthly status report (continued)**

- Reports for insertion into the GTS (list of monthly collected GTS platforms on every GTS site sorted by type of platform)

**Transmission to RTH Paris:**

Boat (less than 20 knots) :	0
Drifting Buoys :	108
Fixed Stations :	11
Marine Stations :	3
Moored Buoys :	0
Synoptic PTT :	1

**Transmission to NWS Washington:**

Drifting Buoys :	522
Fixed Stations :	10
High Speed :	0
Moored Buoys :	69

- GTS coding statistics of platforms reporting through ARGOS and distributed over the GTS

BATHY =	396
DRIFTER =	148695
SYNOP =	2527
TOTAL:	151618

**8. FEED-BACK FROM MEMBERS TO THE SECRETARIAT ON ANY CHANGES IN THE OBSERVING NETWORK**

In view of the difficulties experienced in identifying non-implemented observing stations or implemented stations which are closed or suspended for a certain period, or stations making observations but not reaching their NMCs, a special table accompanied by explanatory notes (see Appendix I) is attached, to serve as feed-back from Members to the Secretariat on any changes of the present state of implementation of observing programmes of SYNOP, TEMP and PILOT reporting stations.

Members are urged to fill in the special table as and when appropriate, and to return it to the Secretariat before the 20th of each month to enable changes to be included in the next "OPERATIONAL NEWSLETTER".

## **Feed-Back from Members to the Secretariat on any changes in the Observing Network (Explanatory Notes overleaf)**

**Country:** \_\_\_\_\_ **Date effective:** \_\_\_\_\_

**Date effective:**

**Global Exchange:**       **Regional Exchange:**   
*(please tick the appropriate box)*

## Explanatory Notes

---

1. Separate tables should be prepared for global exchange and regional exchange respectively. These tables should contain information concerning any changes of the present state of implementation of observing programmes of SYNOP, TEMP and PILOT reporting stations (for Volume A and the Catalogue of meteorological Bulletins), and particularly for stations included in the Regional Basic Synoptic Networks (RBSN).
2. For entries in these tables, the following should be taken into account:

**Column A:** The index number (IIii) and name of each station should be entered in case of any changes in the observing programmes of the stations;

**Column B:** The Latitude and the Longitude in degrees and minutes with the appropriate letters (N, S, E and W) should be indicated;

**Column C:** The TTAAii CCCC of the abbreviated heading of the meteorological bulletins which contains reports from the station should be inserted;

**Column D:** "X" for implementation and "-" for non-implementation should be inserted as appropriate. In order to easily identify changes in the programme, these should be marked in red;

**Column E:** HP= the elevation of the station in metres (the datum level to which barometric pressure reports at the station refer);

H = the elevation of the ground, in metres, (average level of terrain in immediate vicinity of station), is given for stations not located on aerodromes;

HA = the official altitude of the aerodrome is given for stations located on aerodromes and is indicated by the letter "A" in the column "Other observations and Remarks" of Volume A;

**Column F:** For those stations not indicating pressure reduced to mean sea level (group 4PPPP) in their synoptic reports, the entry in this column shows which information is reported in lieu of group 4PPPP:

STATION	Pressure at station level reported using group 3P <sub>o</sub> P <sub>o</sub> P <sub>o</sub> P <sub>o</sub>
1000 hPa	
850 hPa	geopotential of the given standard isobaric surface
700 hPa	reported using group 4a3hhh
500 hPa	

**Column G:** Reasons for temporary suspension of observing programmes and an expected date of resumption of the programmes should be given as far as possible. Non-standard collection and/or distribution times should also be included, and also possible alternate observing stations, as appropriate.

3. These tables should be sent to the Secretariat before the 20th of the month for inclusion in the "OPERATIONAL NEWSLETTER", as appropriate.
-

## Annex III

# GLOBAL TELECOMMUNICATION SYSTEM

### C. INFORMATION ON THE OPERATION OF THE GTS

## 1. CATALOGUE OF METEOROLOGICAL BULLETINS (PUBLICATION NO. 9, VOLUME C, CHAPTER I)

### 1.3 Changes to bulletins

#### •Notification from New Zealand

That effective 1 August 1994 the following meteorological bulletin headers have changed as follows:

Old Header	New Header
UGKU20 NZKL	UGKU20 NCRG
UHKU01 NZKL	UHKU01 NCRG
UPKU01 NZKL	UPKU01 NCRG
UQKU20 NZKL	UQKU20 NCRG

Effective 1 August 1994 in meteorological bulletins: SMNZ01 NZKL, SNNZ01 NZKL and SINZ20 NZKL delete stations 93119, 93436, 93780 and add stations 93110, 93781.

## 2. TRANSMISSION SCHEDULES (PUBLICATION NO. 9, VOLUME C, CHAPTER II)

### 2.3 Changes in schedules/technical specifications

#### •Notification from Germany

VI-iii Offenbach/Main-Mainflingen, Programme 1 (DCF54) radio-facsimile broadcast, changes effective 15 August 1994

## Annex V

# MARINE METEOROLOGICAL SERVICES (MMS) AND RELATED OCEANOGRAPHIC ACTIVITIES

---

### **C. INFORMATION ON THE OPERATION OF MARINE METEOROLOGICAL SERVICES**

#### **1. Broadcasts for shipping and other marine activities (Publication No. 9, Volume D, Part A)**

##### **1.3 Changes in schedules/technical specifications**

###### **•Notification from Germany**

Aii-VI Offenbach/Main-Mainflingen (DCF54), programme 1, radio-facsimile broadcast, changes effective 15 August 1994

Offenbach(Main)-Hamburg/Pinneberg, radio-facsimile broadcast for shipping (DDH3/DDK3/DDK6), changes effective 15 August 1994.
