

OPERATIONAL *newsletter*

Volume 1995 — No. 8

World Meteorological Organization
GENEVA

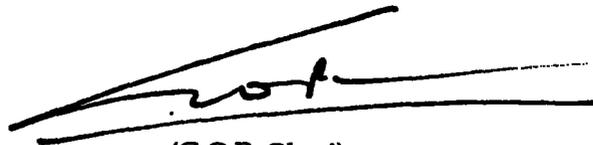

The WMO Secretariat would like to express its appreciation to all those who have contributed material to the "Operational Newsletter". ■

Foreword

As you are aware, all the information on changes to the operation of the World Weather Watch (WWW) and Marine Meteorological Services (MMS) is being assembled and distributed by the Secretariat on a monthly basis to facilitate updating and follow-up action. In this connection we have created the "OPERATIONAL NEWSLETTER" to provide you with the latest operational information on WWW and MMS.

A special table is included in the "OPERATIONAL NEWSLETTER" in Annex I - *Global Observing System* to assist Members in reporting changes in the present status of implementation of observing programmes of SYNOP, TEMP and PILOT reporting stations.

Your co-operation in ensuring that the above information reaches the appropriate operational units of your service is greatly appreciated.

(G.O.P. Obasi)
Secretary-General

Contents

FOREWORD	iii
----------------	-----

Annex I

GLOBAL OBSERVING SYSTEM

C. Information on operational status of elements of the surface-based sub-system.....	1
1. Publication No. 9, Volume A - Stations	1
1.1 New stations	1
1.2 Deleted stations.....	2
1.3 Changes to existing stations.....	2
1.5 Temporary Changes.....	3
4. Automatic Marine Stations	4
4.1 South Africa (SAWB).....	4
4.1.2 Drifting Buoys.....	4

1.5 TEMPORARY CHANGES

NOTIFICATION FROM
CAPE VERDE

NOTIFICATION FROM
NEW ZEALAND

Due to lack of balloons and radiosondes, the station 08594 SAL is carrying out RW upper-air observation at 12 UTC until end of September 1995 only.

A period of Daylight Saving will be introduced from 1400 UTC 1 October 1995 to 1400 UTC 17 March 1996. During this period all SYNOP reports and upper air soundings will be carried out one hour earlier.

4.3 UNITED STATES OF AMERICA

List of U.S.A. Ocean Data Acquisition System (ODAS) included in the August 1995 Data Platform Status Report of the Data Buoy Centre of the National Oceanic and Atmospheric Administration (NOAA). Data from moored buoys and platforms are collected by

geostationary meteorological satellites and reports are distributed on the GTS in SHIP code. Data from drifting buoys are collected by the ARGOS system and distributed on the GTS in DRIFTER code.

C. Information on the operational status of elements of the surface-based sub-system *(continued)*

8. FEED-BACK FROM MEMBERS TO THE SECRETARIAT ON ANY CHANGES IN THE OBSERVING NETWORK

In view of the difficulties experienced in identifying non-implemented observing stations or implemented stations which are closed or suspended for a certain period, or stations making observations but not reaching their NMCs, a special table accompanied by explanatory notes (see Appendix I) is attached, to serve as feed-back from Members to the Secretariat on any changes of the present state of implementation of

observing programmes of SYNOP, TEMP and PILOT reporting stations.

Members are urged to fill in the special table as and when appropriate, and to return it to the Secretariat **before the 20th of each month** to enable changes to be included in the next "OPERATIONAL NEWSLETTER".

Explanatory Notes

1. Separate tables should be prepared for global exchange and regional exchange respectively. These tables should contain information concerning any changes of the present state of implementation of observing programmes of SYNOP, TEMP and PILOT reporting stations for Volume A, the Catalogue of Meteorological Bulletins and particularly for stations included in the Regional Basic Synoptic Networks (RBSN).

2. For entries in these tables, the following should be taken into account:

• **Column A:**

The index number (Iiii) and name of each station should be entered in case of any changes in the observing programmes of the stations;

• **Column B:**

The Latitude and the Longitude in degrees and minutes with the appropriate letters (N, S, E and W) should be indicated;

• **Column C:**

The TTAaii CCCC of the abbreviated heading of the meteorological bulletins which contains reports from the station should be inserted;

• **Column D:**

"X" for implementation and "." for non-implementation should be inserted as appropriate. In order to easily identify changes in the programme, these should be marked in red;

• **Column E:**

HP= the elevation of the station in metres (the datum level to which barometric pressure reports at the station refer);

H = the elevation of the ground, in metres, (average level of terrain in immediate vicinity of station), is given for stations not located on aerodromes;

HA = the official altitude of the aerodrome is given for stations located on aerodromes and is indicated by the letter "A" in the column "Other observations and Remarks" of Volume A;

• **Column F:**

For those stations not indicating pressure reduced to mean sea level (group 4PPPP) in their synoptic reports, the entry in this column shows which information is reported in lieu of group 4PPPP:

STATION	Pressure at station level reported using group 3P ₀ P ₀ P ₀ P ₀
1000 hPa	geopotential of the given standard isobaric surface reported using group 4a3ghhh
850 hPa	
700 hPa	
500 hPa	

• **Column G:**

Reasons for temporary suspension of observing programmes and an expected date of resumption of the programmes should be given as far as possible. Non-standard collection and/or distribution times should also be included, and also possible alternate observing stations, as appropriate.

3. These tables should be sent to the Secretariat **BEFORE the 20th of the month** for inclusion in the "OPERATIONAL NEWSLETTER", as appropriate.

Annex III

GLOBAL TELECOMMUNICATION SYSTEM

C. INFORMATION ON THE OPERATION OF THE GTS

1. CATALOGUE OF METEOROLOGICAL BULLETINS (PUBLICATION NO. 9, VOLUME C, CHAPTER I)

1.2 DELETED BULLETINS

NOTIFICATION FROM
ISRAEL

As from 1 September 1995, the following meteorological bulletins should be deleted:
SMIS22 LLBD and SIIS22 LLBD

1.3 CHANGES TO BULLETINS

NOTIFICATION FROM
ISRAEL

As from 1 September 1995, the following meteorological bulletins should be changed as follows:

Abbreviated Heading TTAA(ii) CCCC	Time Group (GG)	Content of Bulletin and Remarks
SMIS01 LLBD	00, 06, 12, 18	40155, 40180, 40199
SIIS21 LLBD	03, 09, 15, 21	40155, 40180, 40199

2. TRANSMISSION SCHEDULES (PUBLICATION NO. 9, VOLUME C, CHAPTER II)

2.3 CHANGES IN SCHEDULES/TECHNICAL SPECIFICATIONS

NOTIFICATION FROM
ARGENTINA

III-iii Buenos Aires radio-facsimile broadcast:
Replace 18 053 kHz by 18 621.51 kHz
The change was effective 10 July 1995.

Annex V

MARINE METEOROLOGICAL SERVICES (MMS) AND RELATED OCEANOGRAPHIC ACTIVITIES

C. INFORMATION ON THE OPERATION OF MARINE METEOROLOGICAL SERVICES

1. BROADCASTS FOR SHIPPING AND OTHER MARINE ACTIVITIES (PUBLICATION NO. 9, VOLUME D, PART A)

1.3 CHANGES IN SCHEDULES/TECHNICAL SPECIFICATIONS

PART Aii - METEOROLOGICAL FACSIMILE BROADCASTS

NOTIFICATION FROM ARGENTINA

Region III

- Buenos Aires radio-facsimile broadcast:
Replace 18 053 kHz by 18 621.51 kHz
The change was effective 10 July 1995.
