

OPERATIONAL NEWSLETTER

Volume 1996 - No. 6/7 - June/July 1996

**WORLD WEATHER WATCH
WORLD METEOROLOGICAL ORGANIZATION
GENEVA**

The WMO Secretariat would like to express its appreciation to all those who have contributed material to the "Operational Newsletter". ■

FOREWORD

The Operational Newsletter on the World Weather Watch (WWW) and Marine Meteorological Services (MMS) has been issued since 1982 at the request of the Commission for Basic Systems. It is distributed by the WMO Secretariat and is aimed at providing WWW Centres with a summary of the latest operational information on:

- The Global Observing System
- The Global Telecommunication System
- The Global Data-Processing System
- Codes
- Marine Meteorological Services

A feedback form is included in the Newsletter to assist WMO Members in reporting changes in the present status of implementation of observing programmes of SYNOP, TEMP and PILOT reporting stations.

Your co-operation in ensuring that the above information reaches the appropriate operational units of your service is greatly appreciated.

(G.O.P. Obasi)
Secretary-General

In addition to the printed version which is distributed by mail, the Operational Newsletter is now also available at the following locations:

For access via FTP:

<ftp://WWW.WMO.CH/wmo-ddbs/Newsltrxxx.pdf>

For access via html:

<http://WWW.WMO.CH/web/www/Newsltrxxx.pdf>

(xxxx indicates the year/month (eg. 9603))

PLEASE check our World Weather Watch home page for the most recent edition.

The file is created in Adobe Acrobat PDF format so that users can easily download, view or print the document from different computer platforms, keeping the page layout and typography of the original document intact.

To view the Newsletter you will require "Adobe Acrobat Reader", which can be downloaded from:

<http://www.adobe.com/Acrobat/readstep.html>

Do let us know whether you had any difficulties downloading, viewing or printing the Newsletter ... or whether you were just satisfied. Our e-mail address is as follows:

PWOI@WWW.WMO.CH

We look forward to hearing from you.

Rising costs demand that we scale down the distribution of the Newsletter by letter mail, so we strongly encourage our readers to help us become more cost-effective by using our new on-line service.

CONTENTS

FOREWORD	3
I. GLOBAL OBSERVING SYSTEM	7
INFORMATION ON THE OPERATIONAL STATUS OF ELEMENTS OF THE SURFACE-BASED SUB-SYSTEM	7

45138 status unknown
45140 and 45144 to be deployed in June.
45141 to be deployed in July
46682 deployed on 25 May 1996

United States of America

List of U.S.A. Ocean Data Acquisition Systems (ODAS) included in the July 1996 Data Platform Status Report of the Data Buoy Centre of the National Oceanic and Atmospheric Administration (NOAA). Data from moored buoys and platforms are collected by geostationary meteorological satellites and reports are distributed on the GTS in SHIP code. Data from drifting buoys are collected by the ARGOS system and distributed on the GTS in DRIFTER CODE.

**FEED-BACK FROM
MEMBERS TO THE SECRETARIAT
ON ANY CHANGES
IN THE
OBSERVING NETWORK**

In view of the difficulties experienced in identifying non-implemented observing stations or implemented stations which are closed or suspended for a certain period, or stations making observations that do not reach their NMCs, a special table accompanied by explanatory notes follows. The table will serve as feed-back from Members to the Secretariat on any changes of the present state of implementation of observing programmes of SYNOP, TEMP and PILOT reporting stations.

Members are urged to fill in the special table as and when appropriate, and to return it to the Secretariat before the 20th of each month to enable changes to be included in the next "OPERATIONAL NEWSLETTER".

EXPLANATORY NOTES

Separate tables should be prepared for global exchange and regional exchange respectively. These tables should contain information concerning any changes of the present state of implementation of observing programmes of SYNOP, TEMP and PILOT reporting stations for Volume A, the Catalogue of Meteorological Bulletins, and particularly for stations included in the Regional Basic Synoptic Networks (RBSN).

COLUMN E:

- HP = Elevation of the station in metres (the datum level to which barometric pressure reports at the station refer);
- H = Elevation of the ground, in metres, (average level of terrain in immediate vicinity of station), for stations not located on aerodromes;
- HA = Official altitude of the aerodrome given for stations located on aerodromes is indicated by the letter "A" in the column "Other observations and Remarks" of Volume A;

COLUMN F:

For those stations not indicating pressure reduced to mean sea level (group 4PPPP) in their synoptic reports, the entry in this column shows which information is reported in lieu of group 4PPPP (see table 1):

For entries in these tables, the following should be taken into account:

COLUMN A:
The station index number (liiii) and name of station;

COLUMN B:
Latitude and Longitude in degrees and minutes with the appropriate letters (N, S, E and W);

COLUMN C:
The TTAAii CCCC of the abbreviated headings of the meteorological bulletins which contain reports from the station should be inserted;

COLUMN D:
"X" for implementation and "-" for non-implementation should be inserted as appropriate. In order to easily identify changes in the programme, these should be marked in red;

STATION	Pressure at station level reported using group 3P _o P _o P _o P _o
1000 hPa	geopotential of the given standard isobaric surface reported using group 4a ₃ hhh
850 hPa	
700 hPa	
500 hPa	

Table 1

LINE G
Reasons for temporary suspension of observing programmes and an expected date of resumption of the programmes should be given as far as possible. Non-standard collection and/or distribution times should also be included, and also possible alternate observing stations, as appropriate.

**These tables should be sent to the
 Secretariat
 BEFORE the 20th of the month
 for inclusion in the
 "OPERATIONAL NEWSLETTER",
 as appropriate.**

NEW GRID AND GRIB PRODUCTS

Reference to: Resolution 40 (Cg-XII)

WMO Policy and practice for the exchange of meteorological and related data and products including guidelines on relationships in commercial meteorological activities

NOTIFICATION FROM ECMWF

Effective 25 June 1996 ECMWF implemented the extension to the range of products available for dissemination over the GTS. These new products are considered to be "additional products" in the sense of implementation of the above Resolution.

These new products will be available in both GRID and GRIB code and will be 500 hPa height, 850 hPa temperature and Mean Sea Level pressure for both the Northern and Southern hemispheres at a forecast range of 7 days. For the Tropical Belt the 200 hPa u and v components (GRIB code) and wind speed and direction (GRID code) will be made available for forecast ranges of 4 and 5 days.

AMDAR BULLETINS

NOTIFICATION FROM FRANCE

Since 1.VI.1996 METEO FRANCE inserts into the GTS, AMDAR bulletins with abbreviated headings:

UDFR01 LFPW

Wellington ZKLF, CHANGES effective 1.VII.96:

◆DELETE entry for: 0430, 1130, 1630, 2330

◆ADD the following new times of broadcast:

0330	15	Warnings SW Pacific
0500	30	Analysis Equator-35S IAC FLEET code
0530	15	Pacific forecasts and warnings
0830	30	Subtropic Forties warning forecast
0920	25	Warning situation forecast (Islands)
1530	15	Warnings SW Pacific
1800	30	Analysis Equator-35S IAC FLEET code
1930	20	Pacific forecast warnings
2120	25	Warning situation forecast (Islands)
2230	15	Subtropic Forties warning forecast

Global monitoring of the operation of the WWW

Global monitoring of the operation of the WWW to be carried out in October 1996

The annual global monitoring of the operation of the WWW will be carried out from 1-15 October 1996. All GTS centres (i.e. NMCs, RTHs and WMCs) are requested to monitor at least the part of the global data set which they are responsible to collect and forward onto the GTS, i.e.:

- (a) NMCs should at least monitor observational data from their own territory;
- (b) RTHs should at least monitor observational data from their associated NMCs, and possibly from their own Region;
- (c) WMCs and RTHs on the MTN should monitor the complete global data set.

The global reference data set to be monitored comprises the reports from stations of the Regional Basic Synoptic Networks (RBSNs) for SYNOP, TEMP (RW), PILOT (W), CLIMAT and CLIMAT TEMP reports. SHIP, TEMP and PILOT SHIP, BUOY, AIREP, AMDAR and BATHY/TESAC/TRACKOB reports included in bulletins for global exchange are also to be monitored.

The lists of surface, radiowind/radiosonde and radiowind stations comprising the RBSNs, and the lists of abbreviated headings of bulletins for global exchange for SHIP, TEMP and PILOT SHIP, BUOY, AIREP, AMDAR and BATHY/TESAC/TRACKOB are compiled by the Secretariat. The Secretariat can send upon request these lists on floppy disks (3.5 inches - preferably - or 5.25 inches) as files in dBASE IV or ASCII format. These lists will also be made available in September 1996 on the WMO FTP Internet server (www.wmo.ch); the relevant files will be under the subdirectory:

GTS_monitoring/AGM/FROM_WMO/96/.

V. MARINE METEOROLOGICAL SERVICES (MMS) AND RELATED OCEANOGRAPHIC ACTIVITIES

Information on the Operation of Marine Meteorological Services Broadcasts for Shipping and Other Marine Activities

Publication No. 9
Volume D - Information for Shipping

Part Ai - Meteorological Broadcasts by Radiotelegraphy and Radiotelephony

Region V - New Caledonia, CHANGES effective 1.3.96:

◆ **CHANGE:**

Bulletins E and F to read: (8S-167E, 20S-175E, 29S-168E, 20S-158E)

NOUMEA RADIO, Group D:

Area Covered: Caledonian Lagoon, Vanuatu, South-West Pacific

RADIO NOUMEA (RFO), Group B:

◆ **CHANGE** "Station Name" and "Call Sign" (pages 7-9) to read: RFO-NOUVELLE-CALEDONIE

◆ **CHANGE** "Area Covered": New Caledonia, Caledonian Lagoon, Vanuatu, South-West Pacific.
