

OPERATIONAL NEWSLETTER

VOLUME 1998

No. 7/8 - JULY/AUGUST 1998

WORLD WEATHER WATCH

MARINE METEOROLOGICAL SERVICES

WORLD METEOROLOGICAL ORGANIZATION
GENEVA
SWITZERLAND

The WMO Secretariat would like to express its appreciation to all those who have contributed material to the “*Operational Newsletter*”. ■

EDITORIAL

The *Operational Newsletter* on the World Weather Watch (WWW) and Marine Meteorological Services (MMS) has been issued since 1982 at the request of the Commission for Basic Systems. It is distributed by the WMO Secretariat and is aimed at providing WWW Centres with a summary of the latest operational information on:

- I. The Global Observing System
- II. The Global Telecommunication System
- III. The Global Data-Processing System
- IV. Data Management and Codes
- V. Marine Meteorological Services

A feedback form is included in the *Newsletter* to assist WMO Members in reporting changes in the present status of implementation of observing programmes of SYNOP, TEMP and PILOT reporting stations.

Your co-operation in ensuring that the above information reaches the appropriate operational units of your service is greatly appreciated.

In addition to the printed version which is distributed by mail, the *Newsletter* is also available at the following locations:

For access via FTP:

<ftp://www.wmo.ch/wmo-ddbs/OperationalInfo/Newsletters/>

For access via http:

<http://www.wmo.ch/web/ddbs/jen/Newsletters/index.html>

The file is created in Adobe Acrobat PDF format so that users can easily download, view or print the document from different computer platforms, keeping the page layout and typography of the original document intact.

To view the *Newsletter* you will require "Adobe Acrobat Reader", which can be downloaded from:

[http://www.adobe.com/prodindex/Acrobat/
readstep.html](http://www.adobe.com/prodindex/Acrobat/readstep.html)

Comments are more than welcome. Should you have any difficulties downloading, viewing or printing the *Newsletter* ... Our e-mail address is as follows:

PWOI@WWW.WMO.CH

We look forward to hearing from you.

Rising costs demand that we scale down the distribution of the *Newsletter* by letter mail, so we strongly encourage our readers to help us become more cost-effective by using our new on-line service.

IV. Data Management and Codes	46-54
1. WMO Publication No. 306 - <i>Manual on Codes</i>	46-54

I. GLOBAL OBSERVING SYSTEM

1. Information on the Operational Status of Elements of the Surface-Based Sub-System

1.1 Feed-back from Members to the Secretariat on any changes in the observing network

In view of the difficulties experienced in identifying non-implemented observing stations, implemented stations which are closed or suspended for a certain period, or stations making observations that do not reach their NMCs, a special table accompanied by explanatory notes is included in this Newsletter. The table will serve as feed-back from Members to the Secretariat on any changes of the present state of implementation of observing programmes of SYNOP, TEMP and PILOT reporting stations.

Members are urged to fill in the table attached as and when appropriate, and to return it to the Secretariat before the 20th of every other month, i.e. February, April, June, August, October, December, to enable changes to be included in the next "Newsletter".

1.2 WMO Catalogue of Radiosondes and Upper-air Wind Systems in Use by Members

Pages 6-9 are the updates to the above Catalogue. Should you wish to view/print the complete edition please access the WMO server at the following location and select the format preferred, either Excel or text (tab delimited):

Remarks:

44140 - Buoy ashore
45132 - Ashore for servicing.
45144 - No deployment in 1998.

Reactivated:

44139 - July 27

Failed:

44153 - Experimental SWS-2 ODAS buoy deployed Feb 19. Failed Mar 11.
46204 - Serviced May 26.

UNITED STATES OF AMERICA

List of U.S.A. Ocean Data Acquisition Systems (ODAS) included in the Data Platform Status Report of the Data Buoy Centre of the National Oceanic and Atmospheric Administration (NOAA) on 21 August 1998.

Data from moored buoys and platforms are collected by geostationary meteorological satellites and reports are distributed on the GTS in SHIP code. Data from drifting buoys are collected by the ARGOS system and distributed on the GTS in DRIFTER CODE.

Total Base Funded Buoys: 30

Total Other Buoys : 37

Total Moored Buoys : 67

REMARKS (dates are represented as follows (mm/dd/yy):

- 41001 - Parity errors in data.
- 41004 - Water temp data failed 2/2/97.
- 41008 - Water temp data failed 8/11/98.
- 42001 - Water temp data failed 4/6/98, service scheduled week of 9/28/98.
- 44007 - Water temp data failed 8/14/98.
- 46006 - Parity errors in data.
- 46022 - Wave data failed 8/7/98.
- 46026 - Water temp data failed 11/24/97, station failed 3/2/98, service scheduled week of 8/17/98.
- 46027 - Station failed 8/11/98, service scheduled week of 8/24/98.
- 46028 - Buoy redeployed 8/15/98.
- 46050 - Wind data failed 7/24/98, service scheduled week of 8/17/98.
- 46054 - Buoy placed in test for service and swap-out 8/13/98, restored 8/14/98.
- 46059 - Air temp and pressure data failed 12/10/97, service scheduled week of 8/24/98.

ARGOS SERVICE
ARGOS Monthly Status Report

Date of statistics computation:
1 July 1998

Date of statistics computation:
3 August 1998

• REPORTS HANDLED BY ARGOS SERVICE

(list of monthly collected ARGOS platforms sorted by type of platform)

Drifting Buoys	1173
Boats (<20 knots)	-
Marine Stations	-
Moored Buoys	276
Fixed Stations	564
Marine Animals	134
Terrestrial Animals	137
Birds	123
Balloons	8
Rafos Floats	-
TOTAL:	2415

Drifting Buoys	1179
Boats (<20 knots)	-
Marine Stations	-
Moored Buoys	302
Fixed Stations	583
Marine Animals	143
Terrestrial Animals	131
Birds	137
Balloons	4
Rafos Floats	-
TOTAL:	2479

•REPORTS INSERTED INTO THE GTS

(list of monthly collected ARGOS platforms on indicated GTS sites sorted by type of platform)

INSERTED BY RTH TOULOUSE:

Drifting Buoys	161
Fixed Stations	22
Moored Buoys	10
XBT Ships	18

INSERTED BY RTH TOULOUSE:

Drifting Buoys	152
Fixed Stations	22
Moored Buoys	7
XBT Ships	15

INSERTED BY RTH/WMC WASHINGTON:

Drifting Buoys	469
Fixed Stations	37
Moored Buoys	68
XBT Ships	-

INSERTED BY RTH/WMC WASHINGTON:

Drifting Buoys	443
Fixed Stations	33
Moored Buoys	72
XBT Ships	-

•CODING STATISTICS OF PLATFORMS

reporting through ARGOS and distributed over the GTS:

BATHY	508
BUOY	260334

1.5 EXPLANATORY NOTES

Separate tables should be prepared for global exchange and regional exchange respectively. These tables should contain information concerning any changes of the present state of implementation of observing programmes of SYNOP, TEMP and PILOT reporting stations for Volume A and the Catalogue of Meteorological Bulletins.

For entries in these tables, the following should be taken into account:

COLUMN A: The station index number (IIii) and station name;

COLUMN B: Latitude and Longitude in degrees and minutes with the appropriate letters (N, S, E and W);

COLUMN C: The TTAAii CCCC of the abbreviated headings of the meteorological bulletins which contain reports from the station should be inserted;

COLUMN D: “X” for implementation and “-” for non-implementation should be inserted as appropriate. In order to easily identify changes in the programme, these should be marked in red;

COLUMN E: HP = Elevation of the station in metres (the datum level to which barometric pressure reports at the station refer);

H = Elevation of the ground, in metres, (average level of terrain in immediate vicinity of station), for stations not located on aerodromes;

HA = Official altitude of the aerodrome given for stations located on aerodromes is indicated by the letter “A” in the column “Other observations and Remarks” of Volume A;

COLUMN F: For those stations not indicating pressure reduced to mean sea level (group 4PPPP) in their synoptic reports, the entry in this column shows which information is reported in lieu of group 4PPPP (see table 1):

STATION	Pressure at station level reported using group 3P _o P _o P _o P _o
1000 hPa	
850 hPa	
700 hPa	
500 hPa	Geopotential of the given standard isobaric surface reported using group 4a ₃ hhh

Table 1

COLUMN G: Reasons for temporary suspension of observing programmes and an expected date of resumption of the programmes should be given as far as possible. Non-standard collection and/or distribution times should also be included, and also possible alternate observing stations, as appropriate.

These tables should be sent to the WMO Secretariat

BEFORE the 20th of the month

for inclusion in the

2. Information on the Operational Status of the Space Sub-System

2.1 METEOSAT Products Update

Effective 8 September 1998, 12OO UTC the METEOSAT Operational Products configuration will be changed. The following describes the changes:

Update of bulletin headers for 0 degree mission ELW and WVW products:

The EUMETSAT council declared in July 1998, that the global distribution of the new ELW and WVW products was in accordance with the EUMETSAT data policy. The abbreviated headings will be changed to their planned operational settings in accordance with this decision.

Table 1 indicates the previously used test headers in the left hand column:

BUFR bulletins	Before update (Test Headers)		After update (Operational Headers)	
Northern Hemisphere	ELW WVW	IUXN40 - IUXN44 IUXN45 - IUXN49	ELW WVW	IUCN05 - IUCN08 IUCN10 - IUCN11
Southern Hemisphere	ELW WVW	IUXS40 - IUXS44 IUXS45 - IUXS49	ELW WVW	IUCS05 - IUCS08 IUCS10 - IUCS11

Table 1

Template definition for HRV BUFR bulletins:

As recommended by the STG Operations Working Group, the HRV product will now be encoded into BUFR using exactly the same "unified" template as is used presently for the ELW and WVW products. This template has been agreed by the WMO for fast track introduction as a standard BUFR Table D entry in November 1998. The use of the unified template will allow all the HRV winds with a confidence above a nominal threshold value (30%) to be disseminated, along with their associated quality control information. The winds currently distributed in the HRV product will correspond exactly to the subset of winds with a quality flag of accepted in the new HRV product.

More details about the new products with complete descriptions of the BUFR formats, including downloadable templates and BUFR tables, can be found on the MPEF pages of the

EUMETSAT WWW site at:

www.eumetsat.de/en/area3/topic3.html

Additional information can also be obtained from:

2.2 METEOROLOGICAL SATELLITES

The following tables indicate the transition schedules for satellites in geostationary and polar orbit, the status of current geostationary and polar-orbiting satellites and the future plans for geostationary and polar-orbiting satellites. All the information contained in the tables were presented by the satellite operators (CHINA, EUMETSAT, INDIA, JAPAN, RUSSIAN FEDERATION AND USA) at the Twenty-sixth session of the Coordination Group for Meteorological Satellites (CGMS) held in Nikko, Japan, 6-10 July 1998. More detailed information including updated data for the tables below can be found at the WMO Satellite Activities home page: <http://www.wmo.ch> and then select "Satellite".

IV. DATA MANAGEMENT AND CODES

1. WMO Publication No. 306 “Manual on Codes” Global practices

Changes to codes

The fiftieth session of the Executive Council approved the alignment of WMO Technical Regulations (C.3.1) with Amendment 71 to ICAO Annex 3 effective on 5 November 1998 as Res. 6.3/1 (EC-L). Consequently, effective on 5 November 1998, in Table 4678 of the Manual on Codes, Volume I.1, Part A, in the column “PRECIPITATION”, the code for Ice pellets is changed from “PE” to “PL”.

The President of the Commission for Basic Systems and then the President of WMO have approved the following Recommendation 10 (CBS-98). It is important to note that the amendments to Tables of Binary Representations FM 94-XI BUFR and to Common Code Tables given in Annex to the recommendation are for use as from 4 November 1998.

RECOMMENDATION 10 (CBS-98)

AMENDMENTS TO TABLES OF BINARY DATA REPRESENTATIONS FM 94-XI BUFR and COMMON CODE TABLES

THE COMMISSION FOR BASIC SYSTEMS,

NOTING:

- (1) Resolution 5 (CBS-XI) - Working Group on Data Management,
- (2) The abridged final report of CBS-X, general summary, paragraph 6.4.52,
- (3) The abridged final report of CBS-XI, general summary, paragraph 6.4.34,

CONSIDERING that there is an urgent need to introduce modifications to the BUFR tables and to Common Code Tables to meet new requirements to:

- Enable a clearer representation of cloud distribution for significant weather features;
- Facilitate the encoding of satellite radiance reports, which will be known as ATOVS, initially from the NOAA-K spacecraft (due to be launched in May 1998);
- Represent CLIMAT TEMP data in BUFR;
- Transmit new EUMETSAT wind products and potential GOES products;
- Enable width change for Wave Number in Wave scatterometer product;
- Include a Code Common Table C-7 - Tracking technique/status of system used;
- Add 2 entries into Table C-1 for originating/generating Centres;
- Add 1 entry into Table C-3 (instrument type for water profile);
- Add 15 entries into Table C-5 for new satellites identification;

RECOMMENDS that amendments to Tables of Binary Representations FM 94-XI BUFR and to Common Code Tables C-1, C-3 and C-5 given in annex to this recommendation be adopted for use as from 4 November 1998;

INVITES the President of WMO to approve this recommendation as a matter of urgency, on behalf of the Executive Council;

REQUESTS the Secretary-General to arrange for the inclusion of these amendments in Volume I.2 of the Manual on Codes.

ANNEX TO RECOMMENDATION 10 (CBS-98)**I - AMENDMENTS TO THE WMO MANUAL ON CODES, VOLUME I.2, PART B, BINARY CODES
IN FM 94-X Ext. BUFR:**

ADDITIONS TO ENABLE A CLEARER REPRESENTATION OF CLOUD DISTRIBUTION FOR SIGNIFICANT WEATHER FEATURES:

Add the following Table B entry, with the associated Code Table:

0 20 008 CLOUD DISTRIBUTION FOR AVIATION, Code table, Scale=0, Reference value=0, Data bit width = 5.
0 20 008 Cloud Distribution for Aviation

Code figure

time field is bad but can probably be inferred from the previous good time
time field is bad and can't be inferred from the previous good time
this record starts a sequence that is inconsistent with previous times (i.e. there is a time discontinuity). This may or may not be associated with a spacecraft clock update (see scan line status flags for ATOVS)
start of a sequence that apparently repeats scan times that have been previously accepted
scan line was not calibrated because of bad time
scan line was calibrated using fewer than the preferred number of scan lines because of proximity to start or end of data or to a data gap
scan line was not calibrated because of bad or insuffi- cient PRT data
scan line was calibrated but with marginal PRT data
some uncalibrated channels on this scan
uncalibrated due to instrument mode
questionable calibration because of antenna position er- ror of space view
questionable calibration because of antenna position er- ror of black body
not earth located because of bad time
earth location questionable because of questionable time code (see time problem code bits)
earth location questionable - only marginal agreement with reasonableness check
earth location questionable - fails reasonableness check
earth location questionable because of antenna position check
Reserved
Missing value

Notes:

- (1) If bit is set to 1 then statement is true.
- (2) bits 1-4 represent TIME PROBLEM CODE. All bits off implies the scan time is as expected.
- (3) bits 5-10 represent CALIBRATION PROBLEM CODE. All bits set to zero indicates normal calibration. Where any of bits 5,7,10 are set, secondary calibration coefficients have been used.
- (4) bits 11-17 represent EARTH LOCATION PROBLEM CODE. All bits set to zero implies the earth location was normal.

**New flag table 033032 (24 bits)
“Channel quality flags for ATOVS”**

Bit No.

- 1 no good blackbody counts for scan line
- 2 no good space view counts for this line
- 3 no good PRTs for this line
- 4 some bad blackbody view counts for this line
- 5 some bad space view counts for this line
- 6 some bad PRT temps on this line
- 7-23 Reserved (bits set to zero)

All 24 Missing value

Notes: all bits off implies a good calibration

**New flag table 033033 (24 bits)
“Field of view quality flags for ATOVS”**

Bit No. Definition

- 1 Set if secondary calibration used
- 2-21 bit n set to 1 if brightness temperature in channel n-1 is physically unreasonable or has not been calculated due to calibration problems
- 22 set if all the channels are missing
- 23 reserved bit set to zero
- All 24 Missing value

Notes:

- (1) all bits off implies a good calibration
- (2) bits 2-21 used for HIRS, but only bits 2-16 used for AMSU-A and only bits 2-6 used for AMSU-B

To facilitate encoding of ATOVS data new sequence descriptors 310008, 310009, 310010, 310011, 310012, 310013:

		32	Add to code table 008023: vector mean

**FOR REPRESENTATION OF CLIMAT TEMP DATA IN BUFR
New Table B entries:**

011019	Steadiness of wind	%	0	0	7
026010	Hours included	Flag table	0	0	26

Note: The steadiness factor is the ratio of speed of the monthly mean vector wind to the speed of the monthly mean scalar wind expressed as a percentage. It is reported to the nearest one percent.

**New flag tables:
0026201 Hours included**

bit no.	meaning
1	0100 included
2	0200 included
3	0300 included
4	0400 included
5	0500 included

CODE AND FLAG TABLES
Additional entries to Code table 0 08 021
Additional entries to Code table 0 02 023
Cloud motion computational method

<u>Code figure</u>	<u>Meaning</u>
5	Wind derived from motion observed in the water vapour channel in clear air
6	Wind derived from motion observed in the ozone channel
7	Wind derived from cloud motion observed in water vapour channel (cloud or clear air not specified)
8-14	Reserved
15	Missing value

<u>Code figure</u>	<u>Meaning</u>
23-26	Reserved
27	first guess
28	start of scan
29	End of scan

New Code Tables:
Code table 0 02 020
Satellite classification

<u>Code figure</u>	<u>Meaning</u>
0	Nimbus
1	VTPR
2	Tiros 1 (Tiros, NOAA-6 to NOAA-13)
3	Tiros 2 (NOAA-14 onwards)
31	DMSP
61	EUMETSAT Polar System (EPS)
91	ERS
121	ADEOS
241	GOES
271	GMS
301	INSAT
331	METEOSAT Operational Programme(MOP)
332	METEOSAT Transitional Programme(MTP)
333	METEOSAT Second Generation Programme(MSG)
351	GOMS
381	FY-2
382-510	Reserved
511	Missing value

Include entries in Code table 0 02 024
Integrated mean humidity computational method

<u>Code figure</u>	<u>Meaning</u>
0	Reserved
1	Table with full range of humidity variation in layer
2	Regression technique on 2 humidity values in layer
15	Missing value

Flag table 0 02 152**Satellite instrument used in data processing**

<u>Bit number</u>	<u>Meaning</u>
1	High resolution infrared sounder (HIRS)
1	Microwave sounding unit (MSU)
3	Stratospheric sounding unit (SSU)
4	AMI wind mode
5	AMI wave mode
6	AMI image mode
7	RADAR altimeter
8	ATSR
9	Geostationary Imager
10	Geostationary Sounder
11	Geostationary Earth Radiation (GERB)
12-30	Reserved
All 31	Missing

Code table 0 02 163**Height assignment method**

<u>Code figure</u>	<u>Meaning</u>
0	Reserved
1	IRW height assignment
2	WV height assignment
3	H2O intercept height assignment
4	CO2 slicing height assignment
5	Low pixel max gradient
6	Higher pixel max gradient
7	Primary height assignment
8	Layer thickness assignment
9-14	Reserved
15	Missing value

Code table 0 02 164**Tracer correlation method**

<u>Code figure</u>	<u>Meaning</u>
0	LP - Norms least square minimum
1	EN - Euclidean norm with radiance correlation
2	CC - Cross correlation
3-6	Reserved
7	Missing value

Code table 0 02 166**Radiance type**

<u>Code figure</u>	<u>Meaning</u>
0	Type not defined
1	Automated statistical regression
2	Clear path
3	Partly cloudy path
4	Cloudy path
5-14	Reserved
15	Missing value

Code table 0 02 167**Radiance computational method**

<u>Code figure</u>	<u>Meaning</u>
0	Method not defined
1	1b raw radiance
2	processed radiance
3-14	Reserved
15	Missing value

Code table 0 33 035**Manual/automatic quality control**

<u>Code figure</u>	<u>Meaning</u>
0	Automatic quality control passed and not manually checked
1	Automatic quality control passed and manually checked and passed
2	Automatic quality control passed and magnolia checked and deleted
3	Automatic quality control failed and manually not checked
4	Automatic quality control failed and manually checked and failed
5	Automatic quality control failed and manually checked and re-inserted
6-14	Reserved
15	Missing value

Flag table 0 33 037 Wind correlation factor

<u>Bit number</u>	<u>Meaning</u>
1	U departure from guess
2	V departure from guess
3	U & V departure from guess
4	U acceleration
5	V acceleration
6	U & V acceleration
7	Possible land feature
8	U acceleration and possible land feature
9	V acceleration and possible land feature
10	U & V acceleration and possible land feature
11	Bad wind guess
12	Correlation failure
13	Search box off edge of area
14	Target box off edge of area
15	Pixel brightness out of bounds (noisy line)
16	Target outside of lat/long box
17	Target outside of pressure min/max
18	Autoeditor flagged slow vector
19	Autoeditor flagged vectors
All 20	Missing value
