

# OPERATIONAL NEWSLETTER

---

VOLUME 1998

No. 11/12 - NOVEMBER/DECEMBER 1998

## WORLD WEATHER WATCH

## MARINE METEOROLOGICAL SERVICES

WORLD METEOROLOGICAL ORGANIZATION  
GENEVA  
SWITZERLAND

The WMO Secretariat would like to express its appreciation to all those who have contributed material to the “*Operational Newsletter*”. ■

# EDITORIAL

---

The *Operational Newsletter* on the World Weather Watch (WWW) and Marine Meteorological Services (MMS) has been issued since 1982 at the request of the Commission for Basic Systems. It is distributed by the WMO Secretariat and is aimed at providing WWW Centres with a summary of the latest operational information on:

- I. The Global Observing System
- II. The Global Telecommunication System
- III. The Global Data-Processing System
- IV. Data Management and Codes
- V. Marine Meteorological Services

A feedback form is included in the *Newsletter* to assist WMO Members in reporting changes in the present status of implementation of observing programmes of SYNOP, TEMP and PILOT reporting stations.

Your co-operation in ensuring that the above information reaches the appropriate operational units of your service is greatly appreciated.

In addition to the printed version which is distributed by mail, the *Newsletter* is also available at the following locations:

**For access via FTP:**

<ftp://www.wmo.ch/wmo-ddbs/OperationalInfo/Newsletters/>

**For access via http:**

<http://www.wmo.ch/web/ddbs/jen/Newsletters/index.html>

The file is created in Adobe Acrobat PDF format so that users can easily download, view or print the document from different computer platforms, keeping the page layout and typography of the original document intact.

To view the *Newsletter* you will require "Adobe Acrobat Reader", which can be downloaded from:

[http://www.adobe.com/prodindex/Acrobat/  
readstep.html](http://www.adobe.com/prodindex/Acrobat/readstep.html)

Comments are more than welcome. Should you have any difficulties downloading, viewing or printing the *Newsletter* ... Our e-mail address is as follows:

PWOI@WWW.WMO.CH

We look forward to hearing from you.

**Rising costs demand that we scale down the distribution of the *Newsletter* by letter mail, so we strongly encourage our readers to help us become more cost-effective by using our new on-line service.**

# I. GLOBAL OBSERVING SYSTEM

---

## 1. INFORMATION ON THE OPERATIONAL STATUS OF ELEMENTS OF THE SURFACE-BASED SUB-SYSTEM

### 1.1 GOS Regulatory or Guidance Material

Changes in the Allocation of Station Index Numbers

The President of Regional Association VI has approved the allocation of station index numbers for stations operated by non-Members in the region. The range 40210 to 40249 shall be used for non-Member observing stations in the Middle Eastern area of RA VI. Assignments of index numbers from this range to observing stations will be made by the WMO Secretariat.

### 1.2 Guidance Material on Instruments and Observing Methods

"WMO Catalogue of Radiosondes and Upper-air Wind Systems in use by Members"

The new November/December 1998 edition of the above Catalogue is attached at the end of this Newsletter and is also available at the following URL:

<http://www.wmo.ch/web/ddbs/jen/>

CatalogueOfRadiosondes&Upper\_airWindSystems/index.html

<ftp://www.wmo.ch/wmo-ddbs/OperationalInfo/>

RadiosondeStns/

### 1.3 Feed-back from Members to the Secretariat on any changes in the observing network

In view of the difficulties experienced in identifying non-implemented observing stations, implemented stations which are closed or suspended for a certain period, or stations making observations that do not reach their NMCs, a special table accompanied by explanatory notes is included in this Newsletter. The table will serve as feed-back from Members to the Secretariat on any changes of the present state of implementation of observing programmes of SYNOP, TEMP and PILOT reporting stations.

Members are urged to fill in the table attached as and when appropriate, and to return it to the Secretariat before the 20th of every other month, i.e. February, April, June, August, October, December, to enable changes to be included in the next "Newsletter".

**I.****1.4 Automatic Marine Stations**

KEY: Observed or Technical Parameters

Column	Parameters
1	Wind direction, speed and peak wind
2	Air temperature
3	Air pressure
4	Pressure tendency
5	Sea-surface temperature
6	Wave period and height
7	Wave spectra
8	Drogued
9	Subsurface temperatures
10	Relative humidity
11	Visibility

Column	Parameters
12	Battery Voltage (BV)
-	Parameter not observed
X	Buoy observes this parameter
.	Data under evaluation, not reported
B	Buoy beached, sensor reporting
N	No sensor installed
Q	Data questionable, but reported
R	Buoy Retrieved
S	Sensor/system failure

#### **Remarks:**

- 44140 - Deployed Nov. 06.  
 44141 - Winds u/s Sept 03/98.  
 44153 - Buoy recovered in Sept.  
 45132 - Removed for the Winter Nov. 23.  
 45136 - Removed for the Winter.  
 45137 - Removed for the Winter Nov. 02.  
 45138 - Removed for the Winter Nov. 25.  
 45140 - Removed for the Winter Oct. 23.  
 45141 - Removed for the Winter Oct. 14.  
 45142 - Removed for the Winter Nov. 24.  
 45143 - Removed for the Winter Nov. 18. Failed Nov. 06.

45144 - No deployment in 1998.

45150 - Removed for the Winter Sept. 23.

46661 - Air temp failed Sept. 06.

46692 - Wind failed Nov.20.

46698 - Air temp. failed Oct 05

**Failed:**

44139 - Goes xmtr failed.

46132 - Failed Nov 27. Xmtng DBE.

46660 - Failed Nov. 25.

46657 - Drifter buoy failed Oct. 28.

## UNITED STATES OF AMERICA

List of U.S.A. Ocean Data Acquisition Systems (ODAS) included in the Data Platform Status Report of the Data Buoy Centre of the National Oceanic and Atmospheric Administration (NOAA) on 4 December 1998.

Data from moored buoys and platforms are collected by geostationary meteorological satellites and reports are distributed on the GTS in SHIP code. Data from drifting buoys are collected by the ARGOS system and distributed on the GTS in DRIFTER CODE.

**REMARKS (dates are represented as follows (mm/dd/yy):**

41008 - Water temp data failed 8/11/98.  
42001 - Water temp data failed 4/6/98, air temp data failed 9/10/98.  
42007 - Wave data failed 10/21/98, serviced and restored 12/1/98.  
42020 - Wave data failed 11/10/98.  
42040 - Wind data failed 11/10/98, service scheduled week of 1/11/99.  
44007 - Water temp data failed 8/14/98.  
44025 - Pressure data failed 10/27/98.  
45001 - Buoy recovered for winter season 10/21/98.  
45002 - Buoy recovered for winter season 11/5/98.  
45003 - Buoy recovered for winter season 11/6/98.  
45004 - Buoy recovered for winter season 10/21/98.  
45005 - Recovery scheduled week of 12/7/98.  
45006 - Buoy recovered for winter season 10/21/98.  
45007 - Recovery scheduled week of 12/7/98.  
45008 - Buoy recovered for winter season 11/16/98.  
46001 - Wind data failed 11/13/98.  
46002 - Buoy confirmed adrift 9/24/98.  
46003 - Parity errors in data.  
46014 - Water temp data failed 11/22/98.  
46026 - Wind data failed 10/23/98.  
46027 - Station failed 10/2/98.  
46035 - Parity errors in data.  
46041 - Station failed 12/1/98.  
46054 - Parity errors in data.  
46059 - Air temp and pressure data failed 12/10/97.  
46060 - Wave data failed 11/14/98.

## 1.5 EXPLANATORY NOTES

**S**eparate tables should be prepared for global exchange and regional exchange respectively. These tables should contain information concerning any changes of the present state of implementation of observing programmes of SYNOP, TEMP and PILOT reporting stations for Volume A and the Catalogue of Meteorological Bulletins.

**For entries in these tables, the following should be taken into account:**

**COLUMN A:** The station index number (IIii) and station name;

**COLUMN B:** Latitude and Longitude in degrees and minutes with the appropriate letters (N, S, E and W);

**COLUMN C:** The TTAAii CCCC of the abbreviated headings of the meteorological bulletins which contain reports from the station should be inserted;

**COLUMN D:** “X” for implementation and “-” for non-implementation should be inserted as appropriate. In order to easily identify changes in the programme, these should be marked in red;

**COLUMN E:** HP = Elevation of the station in metres (the datum level to which barometric pressure reports at the station refer);

H = Elevation of the ground, in metres, (average level of terrain in immediate vicinity of station), for stations not located on aerodromes;

HA = Official altitude of the aerodrome given for stations located on aerodromes is indicated by the letter “A” in the column “Other observations and Remarks” of Volume A;

**COLUMN F:** For those stations not indicating pressure reduced to mean sea level (group 4PPPP) in their synoptic reports, the entry in this column shows which information is reported in lieu of group 4PPPP (see table 1):

STATION	Pressure at station level reported using group 3P <sub>o</sub> P <sub>o</sub> P <sub>o</sub> P <sub>o</sub>
1000 hPa	Geopotential of the given standard isobaric surface reported using group 4a <sub>3</sub> hhh
850 hPa	
700 hPa	
500 hPa	

*Table 1*

**COLUMN G:** Reasons for temporary suspension of observing programmes and an expected date of resumption of the programmes should be given as far as possible. Non-standard collection and/or distribution times should also be included, and also possible alternate observing stations, as appropriate.

These tables should be sent to the WMO Secretariat

**BEFORE the 20th of the month**

for inclusion in the

**“OPERATIONAL NEWSLETTER”**

### III. GLOBAL TELECOMMUNICATION SYSTEM

#### 1. INFORMATION ON THE OPERATION OF THE GTS

##### Routeing Catalogues of RTHs

The following RTHs transferred their routeing catalogues or included information on the means to access their routeing catalogues into the WMO FTP server under the sub-directories GTS\_routeing/CCCC, CCCC being the location indicators of the RTHs:

RTH	CCCC
Algiers	DAMM
Bangkok	VTBB
Beijing	BABJ
Bracknell	EGRR
Cairo	HECA
Melbourne	AMMC
Moscow	RUMS
Nairobi	HKNC
New Delhi	DEMS
Nörrkoping	ESWI
Offenbach	EDZW
Prague	OKPR
Pretoria	FAPR
Tokyo	RJTD
Toulouse	LFPW
Washington	KWBC

More detailed information on the implementation of the mirror site at RTH Offenbach is available in the WMO FTP server in the file GTS\_routeing\mireadme.txt.

##### Results of the Special MTN monitoring (SMM)

The centres participating in the Special MTN monitoring archives the raw data during the monitoring periods. These raw data are processed by pre-analysis centres. The resulting pre-analysis files are further processed by the Secretariat and RTH Toulouse. The procedures for the SMM are further detailed in the WMO FTP server (wmo.wmo.ch) in the following files:

GTS\_monitoring\procedur.txt (DOS text format)  
GTS\_monitoring\procedur.doc (word format)  
GTS\_monitoring\pre\_anal.txt (DOS text format)  
GTS\_monitoring\pre\_anal.doc (word format)

For the last two SMM exercises, the raw data archived by each monitoring centre, the pre-analysis files, the results of the analysis made by the Secretariat and the results of the analysis made by RTH Toulouse are available in the WMO FTP server. This enables any WWW centre to further use this information available from the SMM. Detailed information on these data and the means to access them is given in the WMO FTP server (www.wmo.ch) in the files:

(a) GTS\_monitoring\SMM\from\_WMO\smYYM01.015\ANALYSIS\ readme.txt for the results of the analysis made by the Secretariat (YY being the year, M the month (2, 4, 7, A)).

(b) GTS\_monitoring\SMM\To\_WMO\PFLFPYYM\readme.txt for the results of the analysis made by RTH Toulouse (YY being the year, M the month (2, 4, 7, A)).

##### The format of the routeing catalogues is described in the file GTS\_routeing\routread.txt.

In order to provide access to GTS information in case of problems with the currently used server www.wmo.ch, RTH Offenbach has installed a mirror site for the GTS routeing catalogues. The following procedures describe how the mirrored data can be accessed:

- Establish an ftp connection to the mirror site using the command ftp: **ftp.dwd.de**

Login as user “anonymous” with your e-mail address as password **login: anonymous; password: your e-mail address**

Change to the directory that contains the GTS routeing catalogues: **cd GTS-routeing**

- Use the URL **ftp://ftp.dwd.de/GTS\_routeing** to access the information via your browser.

**III.**

**FOCAL POINTS OF RTHS**

**The WMO Secretariat was informed of the following designation of focal points of RTHs:**

RTH	Focal Point Name	E-mail	Tel.	Fax.	Address	Country
Algiers	Mr A. Kerbachi	onm@cerist.dz	213 250 7393	213 250 7940	Office national de la Météorologie, BP 153 DAR EL BEIDA	Algeria
Buenos Aires	Mr J.M. Afonso	afonso@meteofa.mil.ar	54 1 311 71 76	54 1 311 3968	Servicio Meteorologico Nacional, 25 de Mayo 658	Argentina

## **IV. DATA MANAGEMENT AND CODES**

---

### **1. WMO Publication No. 306 - “Manual on Codes”**

#### **NATIONAL PRACTICES**

**National coding procedures with regard to international code forms:**

##### **Notification from Finland:**

In accordance with the RA VI decision of starting to implement S.I. unit (metre/second) for reporting wind speed in Region VI, Finland has now implemented the decision for all SYNOP messages since 29 October 1998 at 12 UTC.

and since 4 November 18 UTC for some automatic stations.

Due to technical and methodical problems, a certain number of German sea stations will continue reporting FM 13 SHIP in knots until further notice.

##### **Notification from Germany:**

Observing station operated by the Deutscher Wetterdienst and the German Military Geophysical Services have been reporting wind in S.I. unit (meter per second) in all non-aeronautical WMO and National Codes, since 3 November 09 UTC,

##### **Notification from the United States of America:**

The USA notifies that as from February 1, 1999, U.S. National Weather Service upper-air stations will report the cloud data group in the WMO upper-air coded messages, FM35 TEMP, Part B, Section 8.
