FAST TRACK PROCEDURE FOR WMO CORE METADATA PROFILE OF ISO 19115 – FOR COMPLETION MAY 2015

BACKGROUND

1. The Fast Track procedure can be used to update the code lists used by the WMO Core Profile of the ISO 19115 geographic metadata standard (see WMO-No. 1060 *Manual on WIS* Appendix C).
2. Following submission, proposals have to be worked on by the team to create a workable response, and then that response has to be validated.

PROPOSED ADDITIONS TO CODE LISTS

Changes derived from request MM8

3. Change request MM8 proposes that an additional entry is inserted into WMO_DataLicenseCode (Table 14): “NoLimitation”. This indicates information for which there are no restrictions on use, and corresponds to the INSPIRE “No limitation” and to the GEOSS “” classifications.
4. Change request MM8 also includes a change to the definition of “WMOOther”. That component of MM8 was included in the Fast Track procedure of 2014 (MM5).

Document ID (include link)	Description
W-M-MM8-0-0-WMOOtherProposal_en	Proposal MM8 – add keyword “NoLimitation” to WMO_DataLicenseCode.

Changes derived from request MM14

5. Proposal MM14, submitted by ECMWF, asks for two keywords to be added to WMO_CategoryCode (Table 16 in the WMO specification): “radiation” and “atmosphericComposition”. Of these, the second was included in the Fast Track procedure that ran in 2014 (MM5).
6. Following discussions at TT-WMD-3 relating to WIGOS metadata, during which it was considered important for WIGOS metadata to recognize observations of river/lake/ocean chemistry and of soil chemistry, it appears prudent to introduce “hydrosphericComposition” and “lithosphericComposition” in the WMO Core Metadata Profile.

PROPOSAL FOR FAST TRACK

7. Proposal MM15 proposes adding the following keywords:

7.1. WMO_DataLicenseCode: NoLimitation

7.2. WMO_CategoryCode: hydrosphericComposition, lithosphericComposition, radiation

Document ID (include link)	Description
W-M-MM15-2-2-Simple201501_en	Proposal for contents of Fast Track change package MM15.
W-M-MM15-2-2-CodelistXML_en	XML file containing updated code list
W-M-MM15-2-2-CodelistXML2_en	XML file containing updated code list if “radiation”, “hydrosphericComposition” and “lithosphericComposition” are accepted.

ACTION REQUIRED

8. Members are asked to:

8.1. Validate the proposals associated with MM14: hydrosphericComposition, lithosphericComposition, radiation

8.2. Recommend whether MM15 should proceed to formal consultation with national focal points.

8.3. Record their decisions at <http://wis.wmo.int/page=ChangesRespond> before 14 January 2014.

Request prepared by: S Foreman

Date: 19 December 2014
